A GREAT SUCCESS

Final Day of Annual

In the sheep exhibit Mr. Shopland gained the special prize offered by the Farmers' Institute, and in the swine class the Vortechies has carbibled by

class the Yorkshire boar exhibited by

Mr. Gillam was awarded the first

SAANICH FAIR IS

Ewe—1 J. S. Shopland.
Special prize given by Victoria Farmers' Institute for best pen of sheep—1, J. S. Shopland.

The sheep—1 of tablishment of Fairview—Es large Crowds Attend on the

light draught horses the exhibit was especially fine and for a rural district the best that Mr. Logan has yet seen. Some very fine sucking colts of the general purpose type were shown. The imported hackney mara, the property of George Sangster, is an unusually fine all-round animal. It captured first prize in the saddle horse class, and although being off type as a readster, took second in that class on account of its good action and gait.

Major Mutter and Wilson Clark, the judges of sheep and swine, said that the various classes were well represented, the bulls in particular, while dairy stock was generally good. Special mention must be made of Halden Bros'. Ayreshires and Mr. Gillan's Holsteins. In the opinion of the judges the exhibits of cattle and sheep were the best ever shown at the Saanich fair. In the Jersey class Wesley tros, captured the prize for the yearling bull, while Mr. Michell took the prize for his bull, any age.

In the sheen and for a rural district the best even blow and district the best even shown. The imported has yet seen. Stallion—1st, C. Moses; 2nd, Geo. Sangster. Span of horses—1st, Geo. Sangster. Saddle horse—1st, Geo. Sangster; 2nd, Holdon Bros. One-year-old—1st, Geo. Sangster; 2nd, W. Michell. General purpose—1st, A. Munro; 2nd, J. Brethour.

for the best fruit cake made by a
girl under 16 years was captured by
Miss Muriel Brethour.

Ministerial Movements
Ottawa, Oct. 18.—Sir Wilfrid Laurier
returned to Ottawa this morning from

Right off the propagating house the ostrich feather plants and calla lilies are to be found. Theirs is a warm abode 76x75 feet. At the end again is attending the banquet to Hon Mr. Flelding at Halifax last Tuesday. Mr. Flelding is expected back tomorrow morning and Mr. Oliver on Monday. Mr. Aylesworth leaves for Toronto tonight for a few days' rest.

The University of Chicago will have a vegeterian football team this year. Their yell is expected to be:
We eats,
We eats,
Cabbage and beats,
Raw, raw, raw.
Members of the team will sleep on wire matresses, lest they should mistake the ordinary mattress for their breakfast and eat enough of it to slow them down in practice.—Chicago American.

FLORAL GROWTH

quimalt Greenhouses, Ltd.

other contains nothing but carnations. There were 6,000 plants of this beautiful flower set out in the greenhouse the other day, of two kinds of the famous Enchantress variety. But these 6,000 plants do not by any means constitute their entire stock of carnations. The nearest of the older houses is also full of them. This house is 232150 feet and holds 2,500 white carnation plants, chiefly Lady Bountifuls and White Perfections. And then just as he was wondering what on earth they could do with so many carnations, F. Francis, manager of the concern, took the astonished reporter to the adjoining greenhouse, where there were about 3,000 more carnation plants, chiefly of the red varieties. This house which measures 30x152 feet has been recently rebuilt, as has the next house to be noticed.

Flowers are, in the estimation of the ordinary man, a lixury not to be provided until nearly everything class is supplied in abundance, so it speaks volumes for the prosperity of Victoria, that one of the several florist establishments in the selty, should find in the constant of the cost of the prosperity of Victoria, that one of the several florist establishments in the selty, should find in the constant of the cost of the prosperity of Victoria, that one of the several florist establishments in the selty, should find in the constant of the cost of the most interesting houses, the maximum that the constant of the popular though the centure is the constant of the cost of the most interesting houses, from the point of view of the inquisitive amateur is the propagating house.

The interesting houses, the propagating house, the popular though the centure is the propagating house.

The interesting houses is a popular though the centure is the popular though the cen

for Mr. Francis is one of the very few men on the Pacific Coast who is uniformly successful in raising a very high proportion of cuttings of this beautiful plant. He uses leaves and gets results from over 90 per cent. Many a fiorist has to be content with 20 per cent but Mr. Francis seems to land.

Rough barley—1st, J. S. Shopland.

Rough barley—1st, J. F. Harrison; de dance, and the merriment was kept in till a late hour. All who attended he dance voted the occasion one of the eather the history of the society.

The results in the stock and grain in the various houses must be kept up, and the new 70 hors power steam boiler which supplied the newded warmth must be kept up, and the new 70 hors power steam boiler which supplied the newded that interesting of the young plants at the time of the visit was the lily-of-the-valley. There were hundreds of this beautiful flower in full growth in the various houses must be kept up, and the new 70 hors power steam boiler which supplied the newded warmth must be kept going plants thrive. But perhaps the most interesting of the young plants at the various houses must be kept up, and the new 70 hors power steam boiler which supplied the newded warmth must be kept going plants thrive. But perhaps the most interesting of the young plants at the various houses must be kept up, and the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the required knack, and his plants thrive. But perhaps the most interesting of the young plants at the various houses must be kept up, and the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the required knack, and his plants thrive. But perhaps the most interesting of the young plants at the various houses must be kept up, and the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boiler which supplied the new 70 hors power steam boile time of the visit was the lily-of-the-valley. There were hundreds of this beautiful flower in full growth, evidently none the worse for having been kept frozen for a large part of their earlier career. The history of the lily-of-the-valley may be worth the telling to those who have not studied horticulture. In the first place, the plant is not produced in this country. It has to be imported in various parts of Germany, Belgium and Holland, the production of lilies-of-the-valley is a highly organized industry, and they export the "pips" to all parts of the world. These pips are to the lily-of-the-valley what the bulb is to other blinds of flowers and rossess the un-

> the pale purity of its beauty. The pip is not self-producing. It grows, shoots a tuft of beautiful leaves around the delicate bell-like flower, and then dies forever. Thus new supplies of pips have to be constantly on hand. This is why lilies-of-the-valley are equally obtainable the year round. In a state of nature they bloom only in the spring, but, thanks to cold storage, the florists can grow them at any time florists can grow them at any time.

a long, narrow house 12x100 feet, given up to pot plants of various kinds. Next is the chrysanthemum house, 25x100 feet, where the favorite flower of the Japanese is to be seen to the fullest advantage. Every hue is to be found nestling amid the luxuriant foliage. From the chrysanthemums one passes

How Do You Know That You Have Not Kidney Disease?

EVERY YEAR THOUSANDS DIE OF NEGLECTED KIDNEYS

rapidly abolishing any question of seasons for dowers.

Across the foot of the last runs another small greenhouse fox 10 feet, which is given up exclusively to begonias of the favorité variety of Glorie de Lorraine. The firm does a big export business in this plant about Christmas time. They are sent not only to points in British Columbis, but also in large quantities to the Puget Sound cities. Seattle and Tacoma, especially the former, are good customers, although the United States customs authorities do everything in their power to hamper this trade. The plant is a very popular one in Seattle.

Mr. Gilliam was awarded the first book.

Mr. Gilliam was awarded the first book.

Mr. White least important event of the day was the least important event of the day was the judging of the baby class. Case cleaves and seem the futges, the immarried present were given the fast hone of the correct of hints are considered to the fair counted by a bunch of cross was allowed and the fair correct in the futges. The futges in the futges in the futges that one of the several fortis sent that one of the several fort

the courteous manager, and the sight the courteous manager, and the sight of the flowers will well repay the time taken. There can be seen all the favorite flowers and not a few of the less common kinds growing in full luxuriance. Their career can be traced from the shoot to the full grown shrub or plant. The greenhouses themselves are beautiful, with their masses of varying shades of green, enlivened by countless blooms of every hue. They acres of open-air culture. Straw berries, asparagus, hardy roses and various perennial plants are grown with the same success which charac-terizes the greenhouse-cultivation.

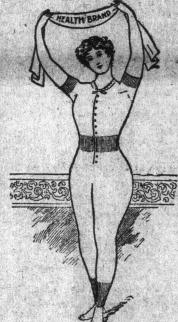

Australian Town Threatened nestling amid the luxuriant foliage. From the chrysanthemums one passes to a mass of green and color. Not a very large house (it is 16x75), it is crowded with the choice begonias, "Glorie de Lorraine" and Poinsettias. This last grows in the open in California, but in this climate it must be reared under glass. It is not a summer flower, but about Christmas time it bursts into flaming red shoots. These are much used for decorative purposes, and are in great flemand at

Ladies' CANPBELL'S Everything Ready-to-wear

Our Ladies and Children's Underwear and Hosiery merits attention from all ladies and parents recognising the great advantage and comfort in wearing of first-class underwear and hosiery. We do not allow any unknown or untested makes to enter our stock, and the temptation of a little extra profit does not enter into our consideration, as we cater entirely for the satisfied customer who comes again. It is our large turnover; exclusive contracts with celebrated manufacturers, and cash purchasing power which permits of our low range of
