

pion" threshing machines have had such extensive sales during the past few years that the season of 1898 found the company incapable of filling the many orders that rushed upon them in the beginning of the season. In order to meet the large demand for their machines a spacious brick warehouse was built this fall along the G. T. R. siding, the structure being sixty by two hundred feet in area and two storeys high. This will be filled during the coming winter with engines and threshers ready for shipment in the early spring. Besides giving special attention to the thrasher trade, the company manufacture tread powers (for one, two and three horses), ensilage cutters, straw cutters (all sizes), hay loaders (side delivery), hay rakes, grain crushers, root pulpers, plows, cream separators and gasoline engines. All lines of manufacture are guaranteed equal to any of the same class in the market.

TUBERCULOSIS IN CATTLE

The following letter is addressed by the Department of Agriculture at Ottawa to persons desirous of having their cattle tested for Tuberculosis, and sets forth the conditions under which the Dominion Government undertake to apply the Tuberculin Test

FREE OF CHARGE

DOMINION OF CANADA.
DEPARTMENT OF AGRICULTURE.
OTTAWA, 1898

DEAR SIR,—In response to your letter of the 18th inst., I beg to say that the following are the conditions upon which the Department applies the tuberculin test to cattle:

When a person makes application to the Department to have his cattle tested, for the purpose of ascertaining whether any of them are affected with tuberculosis, a Government Inspector is sent to test, and all expenses in connection with this are paid by the Department. The owner must accept all responsibility for the result of the test. The Government do not order the slaughter of diseased animals. No compensation will be given in cases where owners slaughter of their own free will. If any of the animals are found to be suffering from the disease they will have to be isolated and the shed or corral in which they are kept will be quarantined. The owner will then be prohibited from selling any of them or their raw products. Should he desire of his own free will to slaughter them and dispose of the carcasses for food, he will have to consult the local authorities as to whether he will be allowed to sell them. The premises in which diseased animals have been must be cleansed and disinfected to the satisfaction of the Government Inspector, as recommended on page 11 of the Farmers' Bulletin on Tuberculosis, a copy of which I enclose you. The premises in which the diseased cattle have been quarantined will also have to be disinfected and cleansed, as mentioned above, after the animals have been disposed of. When the Minister of Agriculture receives a certificate from the Inspector that the disinfection has been done to his satisfaction the premises will be released from quarantine. No application will be considered unless the owner agrees to submit all his cattle to the test.

If an applicant refuses to have his cattle tested after having made formal application, he will be charged with and will have to pay whatever expenses may have been incurred by the Department in connection with the sending of a Veterinarian to make the test.

Upon your signing and returning to us the attached form of request a Government Inspector will be sent to test your cattle. Yours truly,

W. R. SCARTH,
Deputy Minister of Agriculture

T.

The Honorable
The Minister of Agriculture for Canada,
Ottawa, Ontario

DEAR SIR,—I hereby request that my entire herd of cattle consisting of—

Bulls,
Cows,
Steers,
Heifers,
Calves,

be tested for Tuberculosis with Tuberculin, and I hereby agree to conform to the Government conditions as expressed in their letter dated 18th inst., which I acknowledge having received.

The nearest railway station to my premises is on the line of the Railway Company, and if I am notified when the Inspector will arrive at the Station I will meet him and drive him to my premises, and when the testing of my animals is completed, will drive him back to the Station, free of charge.
