... might try their hands upon the Scandinavian men and which are Normans of Eng... ...ay sooner is their platform made than ... ...ed to the capitalist to fight it out on the ... ...ground. We are quite certain that the ... ...Scandinavian specials are not the people, the force will be the conversion among these ... ...classes and when it comes upon the ... ...ground of robbery in real earnest, ...friends from the rich, but we shall see ... ...most of these excellent people who now ... ...middle class mutual admiration society ... ...ce for the discussion of Socialism from ... ...ademic study into that of the object of ... ...ceivement realization.

The truth is that any steps save very ... ...tual and cautious ones will scare the ... ...capitalists. Our friends the Fabians, ...that they know this by whittling ... ...n as much as possible every thing ... ...able politician, an Eight Hours Bill, and ... when the capitalist is scared whether it ... by unemployed riots against strikes, ...no rent movements, dynamite explosions, ...more awful still the return of a large ... ...number of Social Democratic members to ... Parliament he will not hesitate to use ... ...merciless repressive measures. Well, let ... ...m it will be all the better. There is ... ...nothing like persecution to make a people ... ...far more in earnest. But in that case our ... Fabian friends need not be nervous. The ... ...blows of the rich will not fall on their ... shoulders. The doctrines they preach ... ...tend so much to promote a feeling of rev... ...erence for rank and order among the ... ...lower classes of they would only ... ...listen that we should not be surprised if ... ...a statement of the situation upon them by ... ...persons and put on a beginning of ... ...other effort. In that case the Fabians ... ...an ill substitute for old commands to ... working people to order themselves lowly ... ...and reverently to their betters that they ... ...may obtain a heavenly mansion in a fu... ...ture world, an instructor to vote for the ... ...creation of ground rents and rear chil... ...dren's children in a couple of hundred ... ...years time may enjoy ...

... THE REVOLUTION OF SOCIALISM ...

But whether the administration of the new clergy will be more successful than our present lady men remains to be seen. In any case our position remains unaltered. None of the great changes that have occurred in the world's history have been achieved either by voting papers or by the moralization of the possessing classes, and we are firmly convinced that the great change is approaching will be wrought out by the same "brutal and barbarious means as those of the past. The robber classes will not resign their plunder without a fight for it, and, knowing this, we honestly proclaim our opinion that the approaching Revolution must be one of "violence," and that the only salvation of the people lies in their might and courage

WENDELL PHILLIPS

In the lecture season of 1867 or 68 Mr Phillips addressed the Freedom at Athol, Mass., and returning home by the cars next morning fell in with a lady who got upon the train at a way station. She was a Southern refugee, who had been suddenly reduced from affluence to poverty, and was supporting her fatherless children by giving an occasional lecture before a country audience. It was a struggle, for the field was full, and she was almost unknown and friendless, but with a brave heart she worked on, never asking aid of any society or individual. Mr. Phillips saw her get upon the car and asked her to sit beside him. It was a winter day and she was thinly clad, shivering from the exposure of a long ride in the cold morning. Observing this Mr Phillips asked

"Where did you speak last night"

She told him it was a town about ten miles from a railway.

"And I suppose it would be impertinent how much did they pay you"

"Five dollars and the fare to and from that place."

"Five dollars," he exclaimed, "why, I always get more than two hundred and your lecture must be worth more than mine you give facts, I only opinions.

"I shall ask it, I am very glad to get it, Mr. Phillips, answered the lady. I would talk at that rate every night during the week."

He sat for a moment in silence, then he put his hand into his pocket, drew out a roll of bank notes, and said, in a business tone

"I don't want to give offence, but you know I preach that a woman is entitled to the same as a man if she does the same work. Now, my price is one or two hundred dollars and if you will let me do it with you I shall be more than glad to have you go with me."

The lady at first refused but after a little gentle urging she put the bank notes into her purse. At the end of her journey she counted the roll, and found that it contained five hundred dollars. It may add a point to this incident to say (what is the truth) that the lady was a niece of Jefferson Davis. ...

...

In reply to Lady Middleton's remarks that it is the province of women to choose Mrs Bassett said to me, that ... where so many different things ... different people. Mr. H ...

It was said that while Miss Neaves ... Assembly rooms were full of dignitaries ... and notorieties were always welcome ... in their right place, and his dinners were ... admirably served.

Mrs. HENRY KINGSLEY and recently, that "during the past sixteen years the women of our country have steadily grown more intemperate, and only among the degraded classes, but every class is pervaded by the insidious evil of drink.

The husband of Mrs. Ann Teuffel remarked recently that it would be a blessing to his executioner if her marriage should paralyze his wife's literary faculties. He is said to be very proud of his wife's literary abilities.

LADY HENRY SOMERSET, President of the British Women's Temperance Association allows no cider orchards to be planted on her estates. In place of these fruit orchards are being extensively cultivated and grafts are given freely to the tenants, who are encouraged to combine thrift and temperance. *The Queen*

A SUPERABUNDANCE of carbonaceous food increases the use of alcoholic drinks. It is also true, however, that foods rich in carbon, used without stimulants, lessen the system open to the ready reception of contagious and pernicious influences. Cream, sweet butter and mayonnaise should be included in the diet if one ... digestive invalids. When there is any trouble in digesting fatty substance ... mayonnaise, with oil, will serve the needs of the system. In the coming spring days a debilitated vitality is apt to assume all forms of energy ... foods to them is therein valuable. A great benefit can be derived from the free use in diet of fish, ripe fruit and vegetables, especially oranges and lemons. Shaddocks and grape fruit are also good. If very tired, or fearful of a sleepless night, take, in little sips, a glass of milk as hot as can be drunk *Above all sleep in pure air.*

In regard to conducting Working Girls' Societies and Clubs, Florence Lockwood says in the *Century* for March "one of the most noticeable things about the work is the great difference among the workers. A difference not only of opinion but of atmosphere, intention and personality, but it is personality, I think, which is the weightiest factor, and which makes success or failure. Good as the general work may be, intelligent as ... lines upon which it is carried on, just ... the workers, it is the personal force which, in nine cases out of ten, fits the lovesome in the arch, binds the girls together and makes the club a success; and, one may add—it is the string of that personal force, which so often breaks down the workers in the end. It is this and not the literal amount of time and labor and wisdom given, although they, too, must play their part this personal element which in theory is so ignored. The working girls want more than classes and club-rooms they want inspiration and sympathy, often an individual interest and sympathy to fit their individual needs

ONE WAY TO PREVENT

The laboring man of today hope to win their way to greater freedom of life. They are eager to make use of every method that may be helpful. Night schools often, however, but of one the greatest aids of all, and this is the influence of home life. It is only by the intelligent and united efforts of its disciples that any cause can be greatly benefited. It is precisely by the training that might be developed out of the home life that an efficient element for successful action might be obtained. In this work a day ... when the father of a family need spend each hour of the day in grinding toil in order to provide for the physical well being of those belonging to him, it is with the mother that lies the power for that unconscious and training that are so needful to teach the self denial, patience and perseverance that will make useful members of any movement. Therefore it will be found that one of the safest avenues to success lies in the education of our daughters in such ways as will make them indeed helpmates to men in their life struggle. It is a lamentable truth that one of the greatest drawbacks to success in any movement of woman reform lies in the indifference of ... women ... to all that constitutes an ... interests. This indifference is augmented by the out spoken dislike of their women kind to any suggestion that looks like a change from the existing order of things. Look at the family life of most of the leaders of Social Reform who belong to the class they represent. It will be found that, with few exceptions, the female ... are antagonistic in every way to ... fathers cruelly ... upon even the most earnest worker in the cause but of how ... importance ... is the element so dimmed when it comes into the life of the average man. His ... is so greatly needed ... all his glory ... but his sympathy is dulled and all ... other ... towards ... are ... ranging ... which is sure ... ... other ... towards the ... part ... ... attitude of women in general ... to the fact that they feel ... to ... the brunt ... the tyranny of the employer whose aim ... is ... ... employed ... ...
