

FOX SPARROW (*Passerella iliaca*).—This wonderful singer is one of the earliest sparrows, appearing about April 14. By May 5, the nest is completed and full set of eggs laid.

ROSE-BREASTED GROSBEAK (*Habia ludoviciana*).—Common summer resident, arriving about April 22.

CLIFF SWALLOW (*Petrochelidon lunifrons*).—Reported as common in Edmonton by Mr. Spreadborough in 1897. Arrived May 13, common by May 21.

BARN SWALLOW (*Hirundo erythrogaster*).—Tolerably common summer resident.

TREE SWALLOW (*Iridoprocne bicolor*).—Common summer resident. First observed about May 12.

BANK SWALLOW (*Riparia riparia*).—A number nest annually in the Saskatchewan river banks.

CEDAR WAXWING (*Ampelis cedrorum*).—Very irregular. Observed several pairs on June 15, 1913.

WHITE-RUMPED SHRIKE (*Lanius ludovicianus*).—Occasionally observed during November and December, 1912. The birds of this region are referable to *excubitorides*. Mr. Spreadborough collected a female of this variety at Edmonton on May 21, 1897.

RED-EYED VIREO (*Vireosylva olivacea*).—Common summer resident. First observed about May 20. Found on June 23, 1913, a nest containing three eggs in a small poplar. The nest was about fifteen feet from the ground.

PHILADELPHIA VIREO (*Vireosylva philadelphica*).—Mr. Spreadborough found numbers breeding at Edmonton in May, 1897.

WARBLING VIREO (*Vireosylva gilva*).—Noted at Edmonton by Mr. Atkinson, in 1906.

SOLITARY OR BLUE-HEADED VIREO (*Lanivireo solitarius*).—Not common. Breeds no doubt as I have seen them in July.

BLACK AND WHITE WARBLER (*Mniotilta varia*).—Rather rare. Remains in the timber near the river.

ORANGE-CROWNED WARBLER (*Helminthophila celata*).—Three males were collected by Mr. Spreadborough on May 5, 7, and 19, respectively, at Edmonton, 1897. These specimens were examined by Mr. Oberholser, two of them determined by him as belonging to the sub-species *orestera* and one to *celata*. (P. A. Taverner).

TENNESSEE WARBLER (*Helminthophila peregrina*).—A male specimen was collected by Mr. Spreadborough on May 22, 1897. He believes they breed at Edmonton.

YELLOW WARBLER (*Dendroica aestiva*).—Common summer resident. Arrives about May 15.

MAGNOLIA WARBLER (*Dendroica maculosa*).—Mr. Spreadborough obtained two males on May 22 and 25, respectively, at Edmonton, 1897.
