

# Amatite ROOFING

For Mine Buildings.

AMATITE is exactly suited to mining buildings because:

1. It can be laid by unskilled labor.
2. It has a real mineral surface which requires no painting.
3. Its cost is lower than that of other roofings of less weight.
4. It comes in rolls ready to be unrolled on the roof and nailed down.
5. The necessary nails and cement are supplied free, packed handily in the centre of each roll.

The mineral surface of Amatite is somewhat of a novelty; and the fact that it obviates the old painting nuisance, is giving to this roofing the leadership of the ready roofing industry.

The surface consists of mineral particles embedded under great pressure into a tough plastic matrix of pitch.

A sample of Amatite will be sent free on request.

## MARITIME MINING RECORD.

ISSUED ON SECOND AND FOURTH WEDNESDAY MONTHLY.

The organ of the rapidly expanding Coal Trade of the Maritime Provinces.

It covers the entire field, and that adequately.

There is no better medium in the Dominion for 'Supply' men, whether they be makers of Fans, Pumps, Engines, Boilers, Wire Ropes, or, in short, of any kind of Mining Machinery needed for the extraction and preparation of minerals, or if they be producers or agents for the numerous articles that enter into consumption at the collieries.

The Record is always consulted on all subjects, and its advertising columns are carefully scanned by Directors, Managers, and Purchasing agents.

**Advertising Rates are Moderate**

AND FORWARDED ON APPLICATION.

Every Coal Company of any standing a patron of **The Record**.
