

the solemn stillness of the scene. The rain seldom falls, until the violence of the gust begins to subside; when a torrent of rain usually pours down for a short time, seldom more than half an hour; after which the wind shifts around towards the west; and, generally, in about an hour from the commencement of the tornado, the sky becomes serene, and sometimes almost cloudless.

The weather during the month of May, is usually more pleasant than during the two preceding months. The atmosphere is generally not quite so warm and oppressive. Sometimes copious and protracted showers of rain fall, during the latter half of this month. So that the beginning of the rainy seasons usually occurs in this month. Tornadoes also occasionally appear during the month of May. The average height of the mercury in the thermometer, is usually two or three degrees less than during the four preceding months.

June is perhaps the most rainy month in the year. More or less rain usually falls nearly every day or night in this month. Although there are sometimes clear and pleasant days in June, yet there are seldom twenty-four successive hours of entire freedom from rain. The sun is, however, seldom entirely obscured for a week at a time; and he frequently shines out brightly and pleasantly, in the interstices between the floating clouds, several times during the day; occasionally for several hours at a time. During this month, as during all the other rainy months, more rain always falls at night than in the day time; and, indeed, there are very few days in the year in which the use of an umbrella may not be dispensed with some time during the ordinary business hours.—In the month of June, the atmosphere is always considerably cooler than during the preceding months; and I have generally found it necessary to wear woollen outer as well as under garments; and to sleep beneath thick covering at night, in order to be comfortably warm. The sensible perspiration is always much less during this month and the five succeeding months, than during the other six months in the year. The mercury in the thermometer seldom rises above 80° in this month, the average height being about 75°.

During the months of July and August a great deal of rain also generally falls; but, perhaps, less in both these months than in the preceding one.—There is always a short comparatively dry and very pleasant weather, in one or both these months.—This season usually continues from three to five weeks; and generally commences about the 20th or 25th of July. Sometimes, for several successive days, the sun shines brilliantly and pleasantly all day; and no rain falls at night. The air, however, is always refreshingly cool and agreeable.—This is perhaps the most pleasant time in the year. This is what is commonly called "the middle dries." It seems as if Providence had specially ordered this temporary cessation of the rains, for the purpose of permitting the ripening and gathering of the crops of rice, which are generally harvested in August.

September and October are also generally very rainy months; especially the former. Sometimes more rain falls in September, than in any other month in the year. Towards the close of October the rain begins to be less copious; and sometimes slight tornadoes appear, indicative of the cessation of the rainy season. The sea breezes are usually very strong during these two months; and the atmosphere is generally uniformly cool and invigorating to the physical system.

During the month of November the weather is generally very pleasant, the temperature of the atmosphere being agreeable to the feelings—not so cool as during the five preceding months, and not so warm as during the five or six succeeding ones, the average height of the mercury in the thermometer being about 82 degrees. Frequent showers of rain usually fall during this month, both in the day and at night; but generally they are of short duration: Slight tornadoes also generally appear in this month. The sun may usually be seen during a part of every day in the month; and frequently he is not obscured by clouds during the whole of the time in which he is above the horizon. The middle of this month may be regarded as the beginning of the dry season.

December is also generally a very pleasant month. Occasional slight showers of rain fall during this month, sometimes several sprinklings in one day, but seldom for more than a few minutes at a time. The mornings in this month are peculiarly delightful. The sun usually rises with brilliancy and beauty, and the hills and groves, teeming with the verdure of perpetual stars. Nothing that I have ever witnessed in the United States exceeds the loveliness of a December morning in Liberia.

On the whole, I regard the climate of Liberia as decidedly pleasant; notwithstanding the scorching rays of the tropical sun, and the "abundance of rain" which falls during the year, especially during the months of June, July, September and October. So far as the pleasantness of the climate and weather is concerned, I would decidedly prefer a residence in Liberia to one in any part of the United States.

The extremes of the thermometrical state of the atmosphere may be set down at 65 degrees and 90

degrees. I have never heard of the mercury of a good thermometer having sunk below the former nor arisen above the latter point in the shade. The average height of the mercury, during the rainy season, may be set down at about 67 degrees, and during the dry season at 84 degrees. The mean temperature for the year is about 80 degrees.

In regard to the comparative healthiness of the two seasons, I may state, that my observations fully convinced me, that the rainy season is decidedly more conducive to health than the dry season, in both new comers and old settlers. The oppressiveness of the atmosphere, and the enervating effects of the weather, during the dry season, tend to debilitate the physical system, and thereby to render it more susceptible of being affected by the local agents of disease. Consequently, those persons who arrive in Liberia during this season, are more liable to frequent attacks of fever, than those who arrive during the rainy season. In reference, however, to the acclimating process, I do not think that any great advantage can be gained by arriving at any particular time of the year, more than at any other time. Unnecessary exposure to the heat of the sun during the dry season, and to the rain during the wet season, should alike be avoided. Care and prudence should be exercised by new comers at all times during the year.

PREPARATORY BOARDING SCHOOL FOR LITTLE GIRLS.

A LADY residing in the Township of Scarborough in a good New Cottage, within a mile and a quarter of the Church, very pleasantly situated in an extremely healthy neighbourhood, would be happy to take charge of four to six little girls to whose Education she would devote her whole time. She would instruct them in all the Branches of an English Education and Music.

References may be made to the Rev. W. S. Darling, Incumbent of Christ's Church, Scarborough, and to Thos. Champion, Esq., at the Church Society's House, Toronto.

Terms, £25 per annum, including Board and Washing, £5 additional for Music. Toronto, Nov. 27, 1850. 18-1f

NOW IN PRESS.

CANADA; Past, Present, and Future; being a Geographical and Statistical Account of Canada West, (formerly Upper Canada), exhibiting its past history, present condition and future prospects; shewing its Resources and Capabilities as a great Agricultural and Manufacturing country, and its relative advantages as compared with the other British Colonies, and the United States, as a new home for British emigrants. Also, containing a particular account of the mineral wealth, and other valuable available resources of each district; with an Analytical description of the Mining Region of Lakes Huron and Superior. The whole compiled from information obtained in each locality, up to the date of publication, by W. H. SMITH, Author of the Canadian Gazetteer.

A chapter will be devoted to the special benefit of Emigrants—furnishing them with information concerning the proper measures and precautions to be taken in order to reach the Province in a comfortable and economical manner; with hints as to the readiest and most advisable means of acquiring land, on their arrival, &c.

Corrected tables of distances from place to place will be added, with abstracts from such Provincial acts as are necessary to be generally known; and a variety of miscellaneous useful matter. The whole forming a complete text book on the subject of Canada for families, a valuable book of reference for the man of business, and a guide for the traveller and emigrant.

For the convenience of subscribers, the work will be issued in numbers at 1s. 3d. each, and in parts, of double size, at 2s. 6d. each; and will be completed in about ten parts. Each part will be accompanied by a Map, containing one or more Counties; and a general MAP OF THE PROVINCE, compiled expressly for the purpose will be appended to the work. The Maps will be engraved on copper, in the best style of the art, and will contain the latest divisions of Counties, and all the new settlements in the Province up to the latest dates.

The work will be furnished to Subscribers only. A complete Business Directory of the Upper Province will be added to the work, being the first ever published in either Province. As the Author and Publisher possess peculiar facilities for collecting the necessary information; the subscribers will have the advantage of receiving this portion of the work WITHOUT ANY ADDITIONAL EXPENSE.

The first part of the work will be ready for delivery in about a fortnight, and will be supplied to Subscribers or Agents.

Local Agents wanted to canvass for the work; to whom liberal encouragement will be given. Apply personally, or by letter (post paid) to the publisher, Toronto.

Papers inserting this advertisement, and noticing the parts as they appear, will be furnished with a copy of the work as it is issued. THOS. MACLEAR, Publisher, 75 Yonge-st. Toronto, October 30, 1850. 19

AYER'S CHERRY PECTORAL For the Cure of COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA and CONSUMPTION

The annals of medical science, affording as they do ample proof of the power and value of many medicinal agents, have furnished no examples to compare with the salutary effects produced by "AYER'S CHERRY PECTORAL."

DR. PERKINS, President Vermont Medical College, one of the most learned and intelligent physicians in the country, considers it a "composition of rare excellence for the cure of that formidable disease, Consumption." Norwich, April 26, 1846.

Dr. J. C. Ayer—Dear Sir—Agreeable to the request of your agent, we will cheerfully state what we have known of the effects of your CHERRY PECTORAL and they have been astonishing indeed. Mrs. Betsey Streeter had been afflicted with a severe and relentless cough, which reduced her very low; so low that little hopes could be entertained of her recovery. Numerous remedies had been tried without effect, before the CHERRY PECTORAL. And that has cured her. George Watkinson Esq., had to our knowledge been afflicted with Asthma, for eleven years, and grown yearly worse, until the CHERRY PECTORAL has now removed the disease and he is as free from any of its symptoms as we are. The Rev. Mark Dane had been so severely attacked with the Bronchitis, as to disable him from the duties, and nothing had afforded him relief until I (Mr. Thorne) carried him a bottle of your PECTORAL, which cured him at once, and he now officiates as usual in his place.

These are three of the cases in which we have known it successful, but never to fail. We have great pleasure in certifying to these facts; and are, respected sir, your humble servants, REV. DAVID THORNING, HON. JOSEPH BATTLES.

Among the distinguished authorities who have given their names to recommend CHERRY PECTORAL, as the best remedy that is known for the Affections of the Lungs, are "The London Lancet," "Canadian Journal of Medical Science," "Boston Medical and Surgical Journal," "Charleston (S. C.) Medical Review," "New Jersey Medical Reporter," Prof. Bartlett, Transylvania University of Medicine, President Perkins Vermont Medical College, Dr. Valentine Mott, New York City, Parker Cleveland, Bowdoin College, Prof. Butterfield, Willoughby College, Ohio, Prof. Braithwaite, Leeds (Eng.) Medical School, Sir Richard Kane, Queen's College, Ireland, Prof. Rosenbaum, Leipzig.

The public have but to know the virtues and astonishing success of the "CHERRY PECTORAL," in curing diseases of the Lungs, when they will feel secure from these dangers whenever this remedy can be obtained.

PREPARED BY J. C. AYER, CHEMIST, LOWELL, MASS. Sold by Lyman & Kneshaw, Toronto; Hamilton and Kneshaw, Hamilton; Wm. Lyman & Co., Montreal, Agents for the Canadas.

CHURCH OR CHAMBER ORGAN. FOR SALE, FOUR ROWS OF PIPES.— Cheap for Cash, or approved Credit. For particulars, apply to W. TOWNSEND, Berkley-street. September 5, 1850. 6-1f
