

HEARTRENDING SCENES. Horrible Sufferings OF IRISH EMIGRANTS At Buenos Ayres. FROM POVERTY TO STARVATION.

The Buenos Ayres papers of February 22, just to hand, contain heartrending accounts of the sufferings of the Irish emigrants who have recently arrived in that city...

Arrival of the Immigrants. On Saturday the immigrants were landed and were conducted to what is called the hotel, where they were led to believe, by the Argentine agents in Ireland, they would receive all sorts of kind treatment...

Not Until the Judgment Day will all the horrors which our brothers and sisters experienced there in Buenos Ayres be known—that day when the guilty shall give an account of their deeds, and man's inhumanity to man will be thoroughly exposed...

The Good Samaritans. We regret that it is out of our power to mention the names of all those who generously came forward and made every sacrifice to save their fellow men...

They Were Met by Hundreds of Women with infants in their arms complaining that their children were dying for want of milk. Thereupon Mr. Drysdale offered to give double its value for all the milk that could be procured in the city...

Blind of Dirt and Infamy and despair. Mr. John McKernan, Jr., when going home on Sunday night, met a large family lying on the footpath, the children sleeping, and the mother and a girl of seventeen years weeping and moaning...

The Noble Impulse of a True Born Irish American proposed to take all the immigrants out of the "Home," and forthwith he and his countryman Daniel J. Byrne, hired a carriage in the Calle Velazquez...

John Cunningham, Mrs. Macken, and Mrs. Kirke took charge of a number of girls. Mrs. Kirke also lodged under the care of the Nuns of the Sacred Heart. Mrs. Lace provided breakfast for many others. The Passionist Fathers visited the asylum every day, and Father Gaugrean spent nearly his entire time with the emigrants, administering to them corporal and spiritual consolation...

Organization of Relief—The Government Does Nothing.

The British Immigration Committee met at the office of Messrs. S. B. Hale & Co., on Tuesday. Mr. Casey, who presided, had to leave for the meeting of Directors of the Provincial Bank. Mr. John Drysdale then took the chair. The attendance was larger than usual...

On Wednesday Mr. Gartland attended a meeting of the committee and stated his proposal in detail. Mr. Casey presided. Mr. Gartland presented the terms of his contract, which, after some discussion, were approved...

A Still Air.

Character requires a still air. There may be storm and upheaval around, but there must be peace within for the soul to thrive. But anxiety is the reverse of peace. It teases the mind with questions that it cannot answer...

Her Son's Wife.

A keen-eyed, wiry old lady, with a determined expression upon her countenance and an aggressive air generally, sat directly in front of me on a western railroad train, writes a correspondent. We had just left a small, dreary-looking little town in Kansas...

The "Felon" Literature of Ireland.

The literature of any nation that has struggled for freedom should be one of the most cherished possessions of that nation. Every volume belonging to it is a relic of the era in which that volume was written. It mirrors faithfully the passions, the thoughts, the hopes, the circumstances, and the policy of the movement to which the writer was attached...

of time, made attempts to work out that problem in their own special way. The student who would trace their source certain lines of belief—who would view movements and developments in their true light—must carefully follow, as far as he can, the current of national thought and national action as he finds it preserved in our national literature. Both the statesman and the student, who aim at the understanding of the complex Irish problem, can betake themselves with advantage to the pages of this "felon" literature of our country...

Hints About Men's Dress.

A well-dressed man is always particular about his hats or shoes. One may have his shoes half-soled, but they should never be patched. If possible one should have a silk hat and a derby. A silk hat is to a man what a best bonnet is to a woman...

What is in a Trade.

A trade makes you independent. A strong crutch upon which to lean. It is a passport to all countries and climes. A demand note which passes current everywhere. Something which can be carried in your hands and hand...

How to Get Fat or Lean.

To increase the weight:—Eat, to the extent of satisfying a natural appetite, of fat meats, butter, cream, milk, cocoa, chocolate, bread, potatoes, peas, parsnips, carrots, beets, farinaceous foods, as Indian corn, rice, tapioca, sago, corn starch, pastry, custards, oatmeal, sugar, sweet wines and old ales. Avoid colds, exercise as little as possible, sleep all you can, and don't worry or fret...

How to Get Along.

Do not stop to tell stories in business hours. If you have a place of business, be found there when wanted. No man can get rich sitting round stores and saloons. "Never fool" in business matters. Have order, system, regularity, liberality and promptness...

A Wash For Women's Hair.

Ammonia and borax are both used as invigorators of the hair, but they should be used only in small quantities, or they will do more harm than good. For too much ammonia will inflame the scalp, and too much borax will make the hair dry and brittle. Nor is soap good for the hair. The scalp may be cleaned with the yolk of an egg, beaten in a very little water and rubbed into the scalp, where it should be allowed to dry, and afterwards rinsed off with lukewarm water containing a little ammonia...

LONDON, April 16.—Canadians are urged to carefully note the success of the present agitation against foreign live stock imports.

LONDON, April 17.—The Board of Trade Journal for April contains news for Canadian live stock interests. The Argentine republic has passed a law guaranteeing 5 per cent. interest for ten years on eight million dollars, to be invested in establishments devoted to export beef. This means keener rivalry for Canadian exporters to the British market...

YOU PAY WHEN CURED. During the past eleven years we have cured with our wonderful electric medicated appliances, thousands of patients suffering with chronic ailments after all other treatments had failed. We have so much faith in our goods that we will send you, on 30 DAYS' TRIAL, one of our electric medicated appliances to suit your case, provided you agree to pay for it if it cures you in one month. Can anything be fairer than this? If it does not cure you it costs you nothing. Different appliances to cure Dyspepsia, Rheumatism, Liver and Kidney diseases, Piles, Lung Diseases, Asthma, Catarrh, Lame Back, Ague, Nervousness, Debility and many other diseases. Write us at once for our free Illustrated Book giving full particulars and testimonials from every State in the Union, and blank for statement of your case. We do not ask you to buy our APPLIANCE until you have tried it, but merely to TRY THEM AT OUR RISK. Address: ELECTRIC PAD MFG CO., 44 Flatbush Ave., Brooklyn, N. Y.

The Death Roll of Alcoholism.

Dr. Norman Kerr, an eminent physician of England, believing the statement of temperance people that 60,000 people died annually from the effects of strong drink to be extravagant, began as early as 1870 a personal inquiry in connection with several medical men and experts, expecting to quickly disprove the figures. According to their deductions the latest estimates of deaths of adults annually caused through intemperance are in Great Britain 120,000; in France, 142,000; in the United States, 80,000, or nearly a half-million each year in three countries aggregating a population of 112,000,000.

FARM AND GARDEN.

Pointers on Agriculture worth Knowing.

It improves bran to scald it before feeding it to stock. March winds do more harm to stock than the cold of January. Feed no corn to stock at the beginning of warm weather. It will not pay. When scours occur in a herd of hogs give them burnt corn, or charcoal once a day. The weak pigs of a litter may need nursing and food if the sow has too many of them to care for.

The calf can be easily taught to drink from a pail by using a nibble, and will cause but little difficulty in management. One cause of trouble with churning (provided the temperature of the cream is right) is too much milk with the cream. All material for building should be kept under cover. Boards absorb moisture, and swell or shrink according to circumstances. For vermin on sheep use snuff or very fine tobacco. Dipping sheep is cruel, and should never be practised except when all other modes fail.

Pure fresh water for stock must be the first essential from now on. Drinking from mud puddles and other filthy places will cause disease. Chestnut rails make the best and most lasting fence of wood, but wire is cheaper and more easily made into a fence. No animal will attempt to pass a barbed-wire fence. This spore in the pasture may be seeded. Use plenty of seed, rake the ground over, it can be done, in order to cover the seed, and do not turn stock on until the grass has covered the bare places.

Recent experiments in England show that wheat at the rate of three quarters of a pound for each sheep, is not only a safe ration for the one of the best, and at current prices for wheat one of the cheapest. As the warm weather approaches vermin will begin to multiply. No kind of stock is free from lice, and especially if in poor condition. If berded too closely, or not given an opportunity of wallowing in dry dirt, lice will attack the stock.

Badding for sows and pigs should never be made of coarse material. Leaves are best, but if they cannot be had use cut straw or any other fine material. Unless the pigs can have an opportunity to move about without difficulty the sow may crush them. Nearly all poultry diseases are caused by cold, wet, want of cleanliness or bad feeding; and by neglect somewhere. It is easier to guard against than to cure birds when they are ill, which is almost always a very unsatisfactory explanation.

Wool waste contains ammonia, but, as in hair and leather, it is an insubstantial form, and is consequently an inferior source of plant food. Those manufacturers who use it in their fertilizers are in one sense pulling the wool over the eyes of their patrons. In making a hotted dig out fully two feet deep, and save a considerable part of the subsoil to bank up the sides, then fill in with plenty of good fresh manure. It may be necessary to have heat sometime, and sufficient manure should be used to supply it.

Colton-seed meal is a very rich food for fowls. It may be used sparingly, say half a pint in the ground feed for 100 head, administered twice or three times a week. In the abuse of this article troubles have arisen, but in its proper use good results only will be secured. According to the German values of the albuminoids, fats and carbohydrates in stock foods, the digestible parts of a ton of oat straw have nearly 70 per cent. of a ton of wheat straw nearly 50 per cent. of the digestible portions of a ton of green meadow hay.

Use the dry food liberally now, as grass will soon be ready. Cut it fine, and make it as palatable as possible. Nearly all kinds of dry food will be relished if cut and scalded, and a small quantity of salt sprinkled on it. A handful of linseed meal, occasionally added, will improve the quality of the mess. Mulin frames for protecting young plants can be made at very little cost. A few melon plants, if protected at night with such coverings, can be made to grow before the season becomes warm. Tomatoes and other plants may be protected in the same way. Mulin will not last as long as glass, but it is much cheaper.

The hog can be made to attain a very large size. A Vermont farmer killed a cow, 8 years old, that dressed 877 pounds, but a hog, only 2 years old, owned by another Vermont farmer, dressed 653 pounds. Large hogs, however, are only desirable for producing lard. The best pork comes from hogs that weigh about 150 pounds dressed. For relief of heartburn or dyspepsia drink a little cold water in which has been dissolved a teaspoonful of salt. Kid shoes can be kept soft and free from cracks by rubbing them once a week with pure glycerine or castor oil. To perfume clothes take cloves, cedar and rubarb, each one ounce; pulverize and sprinkle it in the closet or drawer. It will also prevent moths. When lifting little children by the wrist, the bones of the arm not being wholly formed, or solidified, are very liable to break. The hands should be placed under the armpits. The fluid extract of quercacho is an excellent remedy for slight skin wounds. When painted over a wound it forms a water-proof covering which takes the place of the skin, and allows healthy healing to take place underneath. The comforts we enjoy here below are not like the anchor in the bottom of the sea that holds fast in a storm, but like the flag on the top of the mast that tumbles with every wind.—C. Love.

Do not stop to tell stories in business hours. If you have a place of business, be found there when wanted. No man can get rich sitting round stores and saloons. "Never fool" in business matters. Have order, system, regularity, liberality and promptness...

animals have been kept too closely confined and given but little exercise. When the horses begin to work for the season they should be examined every day in order to avoid chaffing from the collar or harness.

The early plants and grasses largely abound in water, and contain but a small proportion of nutrition. They assist in regulating the system and promote better digestion of the dry food. All changes from dry to green food should be made gradually, in order to avoid bowing trouble. Cows that provide milk for infants should be fed very carefully at this season.

The best way to keep down thistles is to cut them off as fast as they appear above ground. No plant can endure such treatment, and the thistle is no exception. They will in time become exhausted and die. The work must be done at the proper time, however, and must not be neglected, as a single plant, if allowed to grow will cause extra cornmeal, and if the boy never had a cow to mature seed, and if the boys are kept down the roots will be given extra duty and fail to sprout. Persistent warfare, however, is necessary.

Well-Balanced Rations.

The composition of various grains and fodders and how to feed these articles to as to give stock well-balanced rations are well stated in the first annual report of the Vermont Experiment Station. The following daily rations, it is believed, will furnish ordinary cows of 1,000 pounds live weight the different elements of animal food in such proportions that the largest possible quantity of the food will be digested and made use of by cows:

No. 1.—9 pounds wheat bran, 3 pounds linseed meal (new process), 10 pounds corn stalks, 5 pounds wheat straw, 8 pounds wheat straw.

No. 2.—8 pounds cornmeal, 5 pounds linseed meal, 10 pounds corn stalks, 4 pounds cornmeal, 4 pounds of bran, 9 pounds hay, 9 pounds corn fodder.

No. 3.—2 pounds cottonseed meal, 3 pounds linseed meal, 6 pounds barley meal, 6 pounds wheat straw, 12 pounds hay.

No. 4.—2 pounds cottonseed meal, 3 pounds linseed meal, 6 pounds barley meal, 6 pounds wheat straw, 12 pounds hay.

No. 5.—2 pounds cottonseed meal, 3 pounds linseed meal, 6 pounds barley meal, 6 pounds wheat straw, 12 pounds hay.

No. 6.—5 pounds linseed meal, 5 pounds bran or middlings, 15 pounds straw, 5 pounds hay.

No. 7.—4 pounds gluten meal, 5 pounds wheat bran, 3 pounds cornmeal, 20 pounds ensilage, 10 pounds hay.

No. 8.—3 pounds linseed meal, 4 pounds bran or middlings, 40 pounds corn ensilage, 10 pounds clover hay, 30 pounds ensilage.

No. 9.—4 pounds linseed meal, 50 pounds ensilage, 9 pounds clover hay, 9 pounds timothy hay.

The following rations are calculated per head per day for milk cows weighing from 600 to 900 pounds, as in the case with most of the Jerseys and grade Jersey cows:

No. 10.—2 pounds of linseed meal, 4 pounds bran, 5 pounds cornmeal, 40 pounds corn ensilage.

No. 11.—4 pounds bran or middlings, 40 pounds corn ensilage, 40 pounds corn ensilage.

No. 12.—2 pounds cottonseed meal, 4 pounds bran, 1 pound cornmeal, 6 pounds corn stalks, 10 pounds straw, 2 pounds clover hay, 30 pounds ensilage.

The next three rations are for heavy cows giving large quantities of milk:

No. 13.—4 pounds cornmeal, 2 pounds cottonseed meal, 4 pounds wheat bran, 2 pounds linseed meal, 10 pounds straw, 10 pounds clover hay.

No. 14.—4 pounds cornmeal, 4 pounds cottonseed meal, 8 pounds wheat bran, 10 pounds hay.

No. 15.—4 pounds cornmeal, 4 pounds cottonseed meal, 8 pounds wheat bran, 18 pounds corn fodder.

No. 16.—4 pounds linseed meal, 1 pound cottonseed meal, 5 pounds barley meal, 5 pounds corn meal, 19 pounds corn stover.

No. 17.—3 pounds cottonseed meal, 2 pounds bran, 30 pounds ensilage, 17 pounds hay.

For fattening cattle, the following rations may be allowed daily for each 1,000 pounds live weight of the animal:

No. 18.—6 pounds linseed meal, 6 pounds cornmeal, 20 pounds corn fodder.

No. 19.—5 pounds cottonseed meal, 20 pounds hay.

No. 20.—For 800 pounds weight 5 pounds linseed meal, 3 pounds bran, 10 pounds rye straw, 10 pounds hay.

For oxen at hard work, per 1,000 pounds: No. 21.—12 pounds cornmeal, 10 pounds clover hay, 10 pounds meadow hay.

No. 22.—10 pounds cornmeal 3 pounds wheat bran, 17 pounds clover hay.

No. 23.—4 pounds linseed meal, 5 pounds bran, 25 pounds oat straw.

No. 24.—3 pounds cottonseed meal, 2 pounds wheat bran, 8 pounds clover hay, 20 pounds corn fodder.

For horses heavily worked, per day per 1,000 pounds live weight: No. 25.—2 pounds linseed meal, 6 pounds rye bran, 10 pounds cornmeal, 6 pounds corn fodder, 8 pounds clover hay.

No. 26.—2 pounds linseed meal, 6 pounds rye bran, 10 pounds cornmeal, 6 pounds corn fodder, 8 pounds clover hay.

No. 27.—6 pounds bran, 12 pounds cornmeal, 6 pounds meadow hay, 6 pounds clover hay.

No. 28.—2 pounds bran, 6 pounds oats, 8 pounds cornmeal, 8 pounds wheat straw, 8 pounds meadow straw.

For horses at light work, per 1,000 pounds: No. 29.—12 pounds oats, 12 pounds hay.

No. 30.—3 pounds oats, 4 pounds oatmeal, 3 pounds wheat bran, 12 pounds hay.

Best care for cattle, cough, consumption is the best. Veterinary. Putnam's Balm. Cutler Bros. & Co., Boston. For a large bottle send 25 cents.

PROVINCE OF QUEBEC, DISTRICT OF MONTREAL, Superior Court, No. 556. DAME ROSE EMMA SERRIERE, duly authorized, enter in justice of Montreal, Plaintiff, vs. LOUIS MARVIN PARISE, formerly of Quebec, The Defendant. An action in separation as to property has been instituted in this case.

Montreal, 1st April, 1889. D. C. DUMAS, Attorney for the Plaintiff.

INFORMATION WANTED of one Ellen Elliggett, daughter of John Elliggett deceased, who lived in the Parish of Kilkenny, County of Kerry, Ireland, Blacksmith. The party who desires the information is James Elliggett, brother of Ellen Elliggett. The last known address of Ellen Elliggett was that she left Ireland for Canada about twenty-six years ago. Parties having any knowledge of the whereabouts of Ellen Elliggett are requested to address JAMES ELLIGGETT, Fremont, Ohio.

HEALTH FOR ALL HOLLOWAY'S PILLS. This Great Household Medicine Rids the System of all the Leading Necessaries of Life.

These famous Pills Purify the BLOOD, and act most powerfully on the LIVER, STOMACH, and BOWELS, driving away all the impurities of the system, and restoring the system to its normal state. They are especially recommended in all cases where the system is disordered, and the blood is impure, and the system is weakened. They are especially recommended in all cases where the system is disordered, and the blood is impure, and the system is weakened.

HOLLOWAY'S OINTMENT. It is searching and Healing Properties are Known Throughout the World.

FOR THE CURE OF AD LEGS, BAD BREASTS, OLD WOUNDS, SORES AND ULCERS.

It is an infallible remedy. It is especially suited to the Neck and Chest, as it is used in all cases of these parts, and is especially recommended in all cases where the system is disordered, and the blood is impure, and the system is weakened.

It is especially recommended in all cases where the system is disordered, and the blood is impure, and the system is weakened. It is especially recommended in all cases where the system is disordered, and the blood is impure, and the system is weakened.
