

December 1973 contract between Atomic Energy of Canada Ltd. and Comision Nacional de Energia Atomica but Argentina has been advised that no further nuclear co-operation can take place until Argentina fully meets Canada's non-proliferation policy requirements.

*(e) Korea*

In 1975, AECL concluded negotiations for the sale to the Republic of Korea of one CANDU reactor, including the technology necessary for its construction and operation. As required, a bilateral nuclear co-operation agreement incorporating non-proliferation requirements was concluded in January 1976. Korea acceded to the NPT in April 1975 and in November 1975 concluded a NPT-type safeguards agreement with the IAEA. Therefore Korea meets the requirements of Canada's policy. Construction of the Wolsung reactor is now nearing completion.

*(f) Romania*

Romania acceded to the NPT in 1970 and concluded a NPT-safeguards agreement with the IAEA in 1972. Moreover, in October 1977 Romania and Canada negotiated a bilateral nuclear co-operation agreement, which was ratified in June 1978. Romania, therefore, meets the requirements of Canada's policy. AECL and the Romanian state trading corporation, Romenergo, have signed contracts for two reactors.
