December 1973 contract between Atomic Energy of Canada Ltd. and Comision National de Energia Atomica but Argentina has been advised that no further nuclear co-operation can take place until Argentina fully meets Canada's non-proliferation policy requirements.

(e) Korea

In 1975, AECL concluded negotiations for the sale to the Republic of Korea of one CANDU reactor, including the technology necessary for its construction and operation. As required, a bilateral nuclear co-operation agreement incorporating non-proliferation requirements was concluded in January 1976. Korea acceded to the NPT in April 1975 and in November 1975 concluded a NPT-type safeguards agreement with the IAEA. Therefore Korea meets the requirements of Canada's policy. Construction of the Wolsung reactor is now nearing completion.

(f) Romania

Romania acceded to the NPT in 1970 and concluded a NPT-safeguards agreement with the IAEA in 1972. Moreover, in October 1977 Romania and Canada negotiated a bilateral nuclear co-operation agreement, which was ratified in June 1978. Romania, therefore, meets the requirements of Canada's policy. AECL and the Romanian state trading corporation, Romenergo, have signed contracts for two reactors.
