

	<i>Carried</i>	<i>Carried</i>	<i>Carried</i>	<i>£</i>
1845.....	236,000	1,200,000	550,000	£102,000
1846.....	370,000	1,250,000	850,000	167,200
1847.....	500,000	2,000,000	*390,000	183,400

*Falling off caused by Irish famine.

The total number of horses carried in 1847 was 99,405, and the receipts £80,216.

Taking the saving by conveyance of cattle on Railways at 40 lbs. per beast, 8 lbs. for sheep, and 20 lbs. for swine, the gross saving in 1847 will be 43,800,000 lbs. of animal food.

Large quantities of dead meat reach the London market by Railway from the country : it comes in excellent condition from Scotland. By means of Railways, great quantities of hind quarters of mutton are sent up from the country—as the butchers there kill large quantities of sheep and sell the fore-quarters at home amongst their own population—sending the hind quarters by Railway to London. It is the general opinion of butchers, that country killed meat is better than town killed meat. It is ordered and sold by telegraph, and is not damaged by the journey, even in hot weather.—*Evidence given in late Report on Smithfield Market.*

PROGRESS OF RAILWAYS IN UNITED STATES.
