When the court to be settled. When the county quarterly board of audit next meets there will be only one constable's account to be passed. This certainly is a record for the County of Frontenac. In three months' time there was only one arrest. The synod of the Diocese of Ontario

is called to meet Feb. 17. There is not a very heavy grist of business to come before the session.

## WILD HORSES ABOUND

**ON ISLAND OFF VIRGINIA** 

Supposed to Have Been Castaways From Some Wrecked Vessel Centuries Ago. When the outside world hears of Chincoteague, an island off the eastern

coast of Virginia, it is usually on account of the half-wild horses that roam over the stretches of the island and of Assoteague. They are strong shaggy little creatures, somewhat larger than the Shetland ponies, and they plunge boldly into the salt water when they want to swim to some toothsome islet of marsh grass, writes Maude R. Warren in Harper's Maga-

reservoirs for themselves by digging with their hoofs.

Ozone, as a supplement to the or-

and, in the course of time, to have de-generated in size They came to a good haven, for there are five different kinds of hatural grass to feed them, and for drink little pools of slightly brackish water in the sands. Some of the sing details of the camel corps and its work. "British officers who join the came corps are men who want excitement and danger and plenty of it," he said. "The official headquarters of the corps are at Caro, but the men are seldom or ever seen out. The micro-organisms of putre-faction immediately become active with the details of the camel corps and its work. "British officers who join the camel corps are men who want excitement and danger and plenty of it," he said. "The official headquarters of the corps are at Caro, but the men are seldom or ever seen there." They work principally from Aden, but have no set incipally from

petitions are being prepared and will be sent out for signature by the citi-zens of Brantford, asking the minister of justice to have competent allenists examine the unfortunate man and de-termine whether he is is or is not ac-countable for his actions. Those behind the move are of the belief that he is insane, and they think that there are a large number of other people here who are of the same be-lifer, and will sign such a petition. Taylor's execution is set for Jan. 23.

ELIZABETHTOWN MAN'S DEATH.

BROCKVILLE, Jan. 9-(Special.)-Mr. Gilbert Olds, a lifelong re-sident of Elizabethtown, died suddenly this morning. He left his home, one

Problem One of Temperature, Relative Humidity and Movement of the Air.

A great number of old and generalby accepted theories corcerning venti-lation and impure air have been recently upset by a paper which has been published by the Smithsonian Institution, in which it is set forth that the ventilation problem as essentially one of the temperature, relative humfdity and movement of the air. The ordinary tests of air for carbon dioxide are de-clared to be worthless. The percentage of carbon dioxide in the worst venti-lated room does not rise above 0.5 or ated room does not rise above 0.5, or, at most, 1 per cent, whereas the nor-mal concentration of carbon dioxide in the lungs is from 5 to 6 per cent. of an etmosphere. A great number of ex-periments and observations prove that percentages regarded as deleterious or deadly by hygienists are quite harm-less. It is also a fallacy to assume that a diminished amount of oxygen is harmful. At noted health resorts in the Alps the barometer stands at such the Alps the barometer stands at such the barometer stands at suc suit of the fallacy is that the laws re-Scientists Have Long Been sarding ventilation of mines insist on a high percentage of oxygen, and thereby increase the danger of mine splosions. Finally, the widespread belief in the presence of an organic polson in expired air is equally erro-
