RESPECTFULLY DECLINED

Use Canadian Torren

By Diverting Bed of River To Preserve U. S. Falls

Scheme Proposed to Congress RAILWAY COMMISSIONERS posing the Burton Bill, Which Places Sentimental Value on Niagara's Cataract Above That of Commerce.

Washington, April 16 .- How Niagara Falls may still retain its beauty and grandeur and at the same time be harnessed to sufficient electric generators to revolutionize the industrial output of Northwestern New York, was explained to the house committee on rivrepresenting the Niagara County Irriration and Water Supply Company.

To accomplish the suggestions made several changes would be necessary in Goderich. the pending Burton Bill, which the committee is considering. This bill provides that no additional water shall be taken from the river for power or other purposes and no additional power shall be allowed to come in from the Canadian side. The company represented has a state charter, authorizing it to take an unlimited quantity of water from the river, for the development of power. This charter has just been approved by the state courts, and the company has already expended something like half a million dollars in the erection of its plant and the construction of its plant and the construction of the privy council, dated Nov. 11, 1902, and Jan. 6, 1903, that Toronto Railway Company bear and pay increase of cost of erecting and operating protective appliances at crossing at Avenue-road, and the operating of its railway thereon, over and above the cost of erecting and operating protective appliances formerly maintained at said crossing, under the order of the Toronto kallway Company at said crossing. taken from the river for power or other thing like half a million dollars in the erection of its plant and the construc-

given by the constitution only for the purpose of preserving their navigabil-ity. The Burton Bill had for its object

purpose of preserving their navigability. The Burton Bill had for its object the avowed sentimental purposes of preserving Niagara Falls, and in his opinion would not be upheld by the courts.

H. L. Cooper, in charge of the engineering features of the new plant, preserving features of the new plant, presented a plan which he said could be easily accomplished and which would not only preserve; but increase the amount of water going over the American side of the falls and would also permit the use of such water as his company would need in carrying out its plans. This plan was to lower the bed of the river for a short distance above the falls. This would draw the water from the Canadian side. He explained there could be no objection to the construct and operate branch line to the property of the Polson Iron Works, in Toronto.

How It Began.

The trouble started at 5 o'clock, when Deputy Sheriff McMullen went to the mass meeting held by the striking miners in a wood at the edge of the town. Many of the miners had been drinking, and the sight of the deputy made there is crossed by main line of G.T.R. Company for an order authorizing the railway company to construct a siding to the premises of the Polson Iron Works, in Toronto.

High Level Don Bridge. water from the Canadian side. He ex-plained there could be no objection to

use of the water, it contemplated using but 17.000 cubic feet per second. From this 450,000 horse power could be developed. Industries which would depend on this power, he said, would furnish employment to 228,000 men and give this section of the state an added opulation of 1.140,000 people and yield said, was but 40 per cent. of this amount. Another reason also was ad-vanced why the contemplated plant should be allowed completion: to de-velop the power the company will have construct a canal, which for half its Toro distance would parallel the proposed deep waterways canal from La Salle to Lewiston. The company's canal, said the witness, could be utilized for navigation for this distance and would may be supposed to the sunder tracks of G.T.R. Company, company for leave to carry its tracks or lines under tracks of G.T.R. Company, main line division, and the C.P.R. Company, morth of St. Clair-avenue, Toronto the men had decided to return to work on the operators' terms, when Deputy McMullen appeared. It is said that an insulting said the witness, could be utilized for navigation for this distance and would save the government \$2,000,000 in the construction of this canal. The development of this power would save the coal supply of the country to the extent coal supply of the country to the extent af three million tons a year.

T. & N. Power Co. Cases.

Reference was made to the plans of Canada with reference to the use of the waters of Niagara River. Lord Kelvin was quoted as saying that the future development of the Dominion depended largely on the power to be eveloped from this waterway.

"L'Opinion" Reads Le Soleil Lesson on Its Continued Harangues Against Orange Lodge.

Montreal, April 16.-(Special.)-Mr Arthur Beauchemin's paper, L'Opinion, reads a good lesson to Le Soleil, Sir Wilfrid Laurier's Quebec mouthpiece.

"Le Soleil, continuing the work of L'Electeur, has always been governed by the principle of combating the Conservatives by appeals and prejudices of all kinds. Le Soleil's great battle cry is Orangeism. It invariably the French-Canadians that such and such a Conservative is a member of the so-called anti-Catholic order. Formerly they served up to us Clarke Wallace, while to-day they regularly attend to Dr. Sproule, who is far fro mdreaming of demolishing our nationality or our belief.

"Why is it that the religious belief of certain people is always before their eyes? Why force the electors to make comparisons between Catholicism and ultra-Protestantism? What good, apart from a political advantage, can be gained? Is it patriotic or even nable to thus create race prejudice? There are Orangemen and Free Masons in both political camps, and there always will be in spite of all Le Soleil may say to the contrary, it the work of a good citizen to keep Orangeism constantly before a Catho-lic community? All our efforts should tend, on the contrary, to make us for-get the dierences of race and religion. "We live in a mixed country where a good understanding is above all necessary. Our duty to-day is to lead an active life employed in the development of our country rather than to create prejudices in the minds of the people. Let us, in a word, be broad enough to discuss political questions on their merits, and not from the point of view of popular prejudices."

St. Catharines, April 16 .- (Special.)-The vestry meetings of the Anglican churches of this city were held to-night. In St. Thomas' and St. George's everything went off smoothly, but in St. Barnabas', where of late there have been some very exciting incidents in connection with the relations of the pastor and the church wardens concerning the watch had been kept over her, by her

ladies of the choir, there were some ex-The meeting had but started when the spirit it was shown. The great majority present sided against the rector, Rev. W. Barrington Nevitt, and uout the whole session a series of cross-firing between several of the more important members was maintained. The rector occupied the chair, and arrayed on his side were E. A. Lancaster, M.P. for Lincoln, and several other gentlemen. Against him were the churchwardens and many others, and between the two factions there was outside of the Sunday school building,

where the meeting was held. Messrs. Elliott and Canute, the war dens, attempted to move a resolution of censure on the rector, but it was de-clared out of order, as the wardens had not yet been elected. The rector then appointed A. L. Jackson as his warden, and Charles Moors was elected by the people.

Then came the election of the lay

delegate to the synod. E. A. Lancas-ter, M.P., was nominated by the recter's faction. Frank Waite was his opponent. The result was a standing vote, which decided in favor of Mr. Waite, and his election was hailed with applause by those who had favored him.
There was plenty of loud talk and stamping of feet, and when Messrs. Elliott and Canute again pressed their motion, calling for the censure of the rector, the latter's supporters moved an adjournment. The rector took advantage of the motion and left the room, followed by his handful of supporters.

He entered the church, removed his robes and departed for his home.

The second faction, much larger in numbers, remained and held a congregational meeting. William Canute actel as chairman, and the lengthy reso lution of censure on the rector was then presented and carried, altho the idea of appointing a committee to interview the bishop was not put into action. The congregational meeting adjourn-

ed, subject to the call of the chairman.

Several Vestry Meetings Decide to Undertake Extension of Church or Sunday School Work-Encouraging Reports.

His Lordship Bishop Arthur Sweatman of the Diocese of Toronto is not strong. In the church circles there is anxiety regarding his condition, coupled with the love which his consideration to the community over which he presides and his kindly way in letting the layman relate ideas of the clerical curriculum has inculcated.

This sentiment was expressed last night by one of the wardens of Little Trinity Church, and it is felt thruout the diocese. Warden Stagg of Little Trinity said of Bishop Arthur Toronto:
"He is getting to be a very feeble man. He is in very weak health and likely we shall not have another opportunity at our annual meeting to express our appreciation of his kindness of thought and his willingness to see eye to eye with us on those matters upon which, unfortunately, it became our duty to seek his importunity as our duty to seek his importunity as our right; and his willingness and candid appreciation of our representatives and his ultimate coincidence with our views are matters for our most sincere con-gratulations, combined loyalty with the wish that his lordship may regain

the wish that his lordship may regain his health speedily."

The reports presented to the vestry meetings of the city and suburban Anglican churches last night, with but one or two exceptions, were remarkable for the growth in membership and increase in financial support noted. Projects for increasing the accommodation of church or Sunday School was brought forward in several meetings. dation of church or Sunday School was brought forward in several meetings. At St. Aaugustin'es an enlargement to cost \$3500 is proposed and the rector. Rev. F. G. Plummer, will have Rev. Mr. McCausland, formerly of St. Thomas' Church, as a curate. The Church of the Epiphany will at once consider the purchase of a new site, St. Simon's raised \$10,000 on Easter Sunday towards a new Sunday school building and rectory. St. Mary's, Dovercourt, have established a mission just north of the city limits, which will in time develop into a new parish. St. Clement's, on Brooklyn-avenue, will build a temporary addi-tion. St. Matthew's have under consideration disposing of the present Sunday school, which is some distance from the church, and the erection of a new building. A curate may also be appointed. St. Barnabas' (Chester) will have a new rectory. St. Mary
