The value put upon the lambs at the commencement of the experiment was the actual cost per pound when laid down at the farm. The actual weights were taken as the basis of computation, and the price per pound charged was the average paid for the lambs from Ontario and Prince Edward Island respectively. The cost of shearing was put at 5 cents per animal.

All the food consumed from the time of the arrival of the lambs at the farm until they landed at the Liverpool docks was charged at market values, less the cost of marketing, as previously stated in The cost of growing the rape was put at \$8.46 per acre. In Bulletin Lx. the cost of growing an acre of rape is put at \$11.77. In that estimate however a liberal quantity of manure is supposed to have been used, while in the present instance no manure had been applied to the greater portion of the land for the past six years, and a portion of the rape grown was a catch crop. The basis of compu-The hay which was the tation in both instances is exactly the same. most expensive item of food, was charged at twice the price put upon it in the corresponding experiment of the previous year, owing to the advance in market values. The other food factors were not materially different in price.

The cost of attendance in the corresponding experiment of the mevious year was an estimate. In the present instance it is based upon actual experience in caring for the lambs. One man cared for over 600 lambs so long as that number was here on the farm, and butcher of Man about half of his time while thus engaged was spent in work of a fully examined purely experimental character. We therefore feel safe in assuming erits, and that that one man will feed and care for 800 lambs when the food is all In reference repared. The cost of sending the lambs to England and of selling ed to have see them there was \$357.69 or \$3.61 per head, which was 56 cents per examining you head less than in the corresponding experiment of 1891.

ollowing are the items:

Railroad freight charges to Montreal	\$61	10
Charges of stock yards	4	91
