

THE NEW DIAMOND CALK HORSESHOE

HOG PRICES.

That the prices for hogs in Toronto are not in proportion to the value of feeding stuffs is apparent to anyone who may read.

The reports from the outlying districts that tell of poor yields, together with the high prices prevailing for barley, oats, wheat and other grains, tell that many hogs will be fattened for \$6.25 live weight.

An old-time hog buyer says that there seems to be a combine among the packers to depress prices and to make them uniform. If this is so, and it looks that way, how long are we farmers going to raise hogs for big firms to declare fifty per cent. dividends.

In the name of decency, the big packing houses ought to be ashamed to quote hogs so low with the prices of grains that prevail. Feeding stuffs are high. Prince Edward County reports \$25 a ton for bran. Corn cannot be bought less than 7c. Oats are high and some millers interviewed do not look for any lower prices. What is costing over \$1, and barley is what is up. There seems to be only one thing for this country to do, and that is to follow the example of Denmark and make co-operation the basis and safeguard of good times.

THE FARMSTEAD

Now for the other farms.

Save your fodder.

Many live stock left Toronto for Sherbrooke last night.

Auction sales should be advertised on this page.

Thomas Redmond sold his prize yearling Shorthorn for a good figure.

A good corn crop; how good it is!

The O. A. C. has one of the best corn crops in its history.

There are bad times in some parts of Ontario.

After all a well-tilled farm can stand a pile of drouth.

Did you see the Bissell exhibit? They are all right.

The Niagara District Horticultural Exhibition will be held in St. Kitts on 15th and 19th. It will be better than ever.

The Grange is a growing force in Ontario and ought to be felt in the province.

George Miller of Brougham reports conditions in his vicinity to be good.

John Bright of Myrtle is looking for a bumper fair at Oshawa this year.

Read the market reports for live prices. They are revised daily by first-class men.

The Junction horse market is growing into shape gradually.

Hogs are too low at country points. High price of feeds demands more.

The American-Abell people had a working display of his machinery at their works.

Never was a year when the silo was more in evidence as a useful saver of forage.

John Miller, Jr. of Ashburn has handled over 120 sheep this season and has over 250 on hand. He is only a young farmer, but is a lover of his business.

The prices paid for hogs by the packers is a crying shame. It is robbery from the farmers. Feed is too high to sell pork for \$6.25 now.

W. H. Bunting of St. Catharines says that the grape outlook is good. People may expect to pay high prices for peaches this year. Four baskets of yellow peaches sold in Toronto to day for \$10. I heard of one also selling \$2.75.

A. E. Sherrington of Walkerton, the veteran enthusiast in the development of the co-operative fruit shipping societies, has sold the whole of that society's output to an English firm at growers nearly \$3 a barrel. Individual buyers will please sit up and take notice.

W. H. Davy B. S. A., of Guelph, is about closing up a very successful season's work with the department's drainage operations on the Ontario farms. He has found that the work is appreciated, and that the demand for assistance is likely to be great next year. Already they have to turn down applications. He was at Donlands Farm this week, completing the survey for a swamp field there.

A GRANGE BANQUET.

The Whitty-Union Grange, at the town line, will have a social meeting next Wednesday evening, when a good time and discussion is expected.

Death in English Honey.

A considerable increase in the price of English honey is probable this season, owing to the bad weather in Wiltshire, Berkshire and Hampshire, the principal honey-making counties. Storms have killed many suitable blossoms, thus preventing the bees from picking up the nectar in anything like the quantities of previous years. A large honey-storer, interviewed by one of the English papers, said that the English honey season this year was a disappointing one, and that he would have to buy either Chilean, Irish or Italian honey to obtain it at a third reasonable price. English honey will be very dear, and some of the leading firms have already been compelled to raise the price of it twopenny per pound. The supply of English honey is, generally speaking, somewhat limited, and that is the reason why so many firms prefer to stock French and German varieties.

THE NEW DIAMOND CALK HORSESHOE

Three Shoes in One--Description of the Unique Patent--Its Utility and Practical Value--On Exhibition at the Toronto Fair.

One of the exhibits at the Toronto Fair which is attracting the special attention of the many thousands of horsemen is the unique display of the Diamond Calk Horseshoe Co., Limited. This exhibit consists of a well-arranged display of the new Diamond Calk Horseshoe and its combinations--Winter and Summer Calks, Retaining Plates, Heel and Toe Calk Holders, Set Screws, etc. The exhibit is situated in the carriage building, under the grand stand, and is in charge of the managing director of the company, Mr. H. P. Kennedy, the well-known live stock dealer of Peterboro. Mr. Kennedy and his assistants were cheerfully explaining to visitors the practical value and utility of the new horseshoe and the different combinations thereto.

This Unique Invention. It is an improvement in horseshoes, consisting chiefly in the construction and arrangement of certain parts, by which the shoe calks are removably secured to the shoe and rigidly held in their place. The specific objects of the invention are: 1st--To overcome the frequent difficulties incident to the wearing parts of the calks of a horseshoe. 2nd--To secure greater safety and protection to the horse, by preventing slipping, sliding and falling. 3rd--To overcome the necessity and expense of employing expert labor in sharpening and changing the shoes. 4th--To provide a calk which may be quickly and easily changed, and which furnishes perfectly new wearing surfaces, without removing the shoe and without any extra cost.

The retaining plates for the calks have a rectangular orifice in the centre through which the upward projecting portion of the calk extends. The plates are fitted so as to fit the calk snugly, the inner wall being beveled for a good bearing surface.

Lugs are formed at the end of the retaining plate, fitting snugly against the sides of the shoe, and flange hug the shoe from the rear side of the plate, so as to hold it firmly in position.

The above is an illustration of the heel calk, showing calk parallel with shoe. The calk, when inserted in the holder, does not fit flush with the under side of the holder, but is about 1/16 of an inch full. This allows a spring or tension on set screws, and in case of any wear between the calk and the shoe, a half turn of the screw takes up any slack, and a tight fitting calk is always ensured. This is one of the specific points claimed in this invention.

The Plain Horse Shoes. The plain horseshoes used with the Diamond Calks are made in eight sizes. They are similar in construction to ordinary horseshoes; those for heavy draft or work horses being made of heavier steel than those for driving or road horses. Nail holes and holes for set screws are drilled in each shoe, ready for putting on.

Advantages to Farmers, Delivery Horses, Etc. The Diamond Calk Horseshoe is made a perfect fit to the horse's foot, the calks coming under the heel, and all danger of over-reaching is avoided. There is no need of having shoes put in the fire to sharpen the calks. You can buy the calks by the dozen and re-sharpen your horse at any time at your own convenience.

Comparison of the Cost of the Diamond Calk Horseshoe With the Old Way of Shoeing.

FOR AN ORDINARY SEASON covering a period of Six Months, from Nov. 1st to May 1st, when Shoes would be re-set.

From the T. Eaton Company, Toronto Toronto, April 9th--To whom it may concern: This is to certify that we have thoroughly tested the Diamond Calk Horseshoe, having had it on one of our hardest horses for five weeks, and we are still using it on the same horse.

It is a most economical shoe, and has several features in its favor over the ordinary shoe. The Calk comes under the horse's foot, where they are required, and we find our horse going better on this shoe every day. Besides, there is no necessity of putting fresh nail holes in our horse's feet every time it needs sharpening.

We certainly will adopt this shoe for general use as soon as they are placed on the market. We are, at the present time, having other shoes fitted by the company, which are much lighter in weight than the ordinary shoe, as there is no necessity of having such heavy stock as the old shoe, there being no wear, practically, excepting to the Calks.

Yours truly,
THE T. EATON CO.,
Per A. Barker, Stable Superintendent.

THE DEADLY GAS JET.

Editor World: Referring to the report of the death of two women in a Toronto hotel by asphyxiation by gas, may I enquire if it is known whether the tap on the gas bracket had a "stop" on it or not? In conversation with several people recently on this subject I was informed that it is a very common thing to find gas taps in hotels without these "stops."

Presuming that the one in the present case was without one, it would be an easy thing for anyone in turning off the gas to turn the tap too far, thus allowing the gas to escape.

In any case, seems to me that an inquest ought to have been held, when this question could have been dealt with. In fact, in my opinion, an inquest with every death which occurs by any other than the most natural means, testified to by a doctor who has been in attendance, should be held, and the present law methods, by which in many cases, enquiries are "buried," should be put an end to.

D. F. Kair,
Dixie, Ont.

CALEDON DISASTER.

Editor World: In reference to the Caledon disaster, we are told by passengers on special that the train was going at a terrific speed, some even quoting 50 miles an hour. By the Rev. Mr. Morris we are told the regular was only two miles behind at the curve. Now, taking the time that must have elapsed between the departure of the special from Orangeville and the arrival and departure of the regular, must not the regular train have been traveling at terrible speed to have so gained on special and to have put so short a distance between them (about three minutes' journey)? And yet we hear of no complaints of reckless speed from the passengers of regular train! What I would like to know is, the time the special train left Orangeville, the time of disaster at Caledon, and the distance between these points; also the time of departure and arrival of regular train. By this method I think you could arrive at a fair computation of the speed of both trains and determine if it was excessive.

To an ignoramus like myself it almost seems that the regular must have been crowding the special. Answer me if it is right that one train should enter this dangerous curve before the line ahead was clear?

William Beck,
200 West Queen-street.

GREAT DEMAND FOR HARVEST HELP.

Western Farmers Want Men for Late Harvest--C.P.R. Will Run Extra Excursion. Although several thousand men have been west on earlier excursions, the demand for harvest help still considerably exceeds the supply, latest advice from Winnipeg stating the farmers everywhere are short-handed. Despite rumors of frost and short crops there is well-paid work in the field for all comers. A last opportunity for laborers is offered by the Canadian Pacific, which has arranged to run an extra farm laborers' excursion to Winnipeg, leaving all Ontario stations on Tuesday, Sept. 17. Same conditions will apply as on earlier excursions, going trip \$12.00, return for \$18.00 additional, after at least one month's work harvesting. Full particulars can be obtained from C.P.R. agents and from C. B. Peater, district passenger agent, Toronto.

Every year each one of us consumes 15 lbs. of salt--Science says.

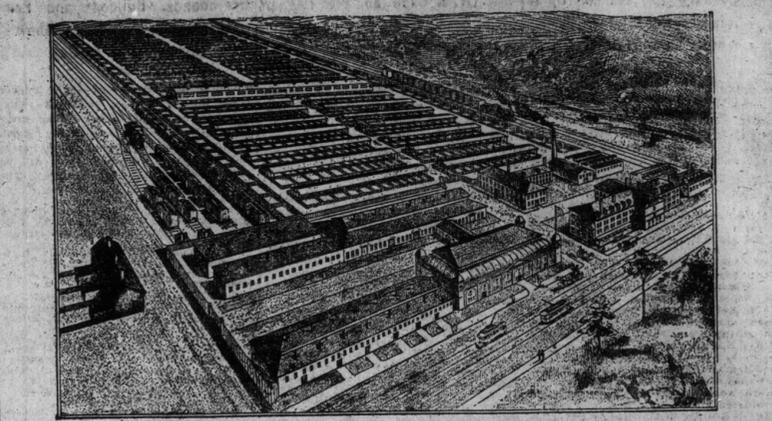

More than a pound a month. Just as well to have it pure.

Your grocer will tell you there's nothing purer than

ROYAL SCOTT Imp-in-Dam, Aged 4 Years. That great stock-getter of first-class horthorns is for sale cheap. He has proved a most successful sire--producing a majority of heifers of the low-down, right kind.

My only reason for selling is that I have to have another bull for the young stock. My mother, Imported Duchesse Anne 11th, is the greatest milker in Arthur Johnston's herd. Her mother, Imported Royal Scot, are for sale ready for service. Also a few choice heifers. Telephone and telegraph. Greenwood. JOHN W. DISNEY, Greenwood, 25 miles east of Toronto.

NEW UNION STOCK YARD HORSE EXCHANGE

The horse exchange and sale stables at the Union Stock Yards, building now under construction, will be completed in time for the fall trade in September. It will cost nearly \$40,000, and will be the most complete building of its kind in Canada. It will contain every known modern device to ensure health and convenience in stabling and handling of horses, and will no doubt be greatly appreciated by the dealers throughout Ontario. A railway siding is on the premises, whereby horses can be quickly and conveniently shipped. The area for selling and showing horses will be 120 feet long by 40 feet wide, and will have few equals anywhere for driving and showing horses. The management will be in charge of Herbert Smith, late of Grand's Repository, who is well and favorably known to the trade as an expert salesman. There will be accommodation of the highest class for about 300 horses, and the building will be constructed of brick and heated by steam, so as to assure the best protection against fire.

ABERNETHY, SASKATCHEWAN, CHEWAN.

The Most Successful, Most Prosperous and Most Influential District in Canada's West. We have for sale the choicest selection of improved farms yet offered in Saskatchewan. Picked wild prairie lands at tempting figures.

The Geo. W. Bewell Co., Limited, Real Estate Brokers and Financiers, Agents, Abernethy, Sask. 1357341

FARMS FOR SALE.

WILSON'S HOTEL, CLAREMONT. At 2 p.m. on Sept. 14, 1907, there will be offered by public auction two farms, namely, 100 acres in the Township of Uxbridge and 50 acres in the Township of Pickering, 14 miles from Clarendon Station, on C.P.R., intending purchasers may communicate with R. E. Michell, 55 Hamilton-street, Toronto, Ont. or Thomas Foucher, Auctioneer, Brougham P. O., Ont.

ONE FARM OF 14 ACRES, YONGE-STREET, NEWTONBROOK; possession for full price by A. Montgomery, 2 Givens-street, Toronto.

BEST FARM IN ETOBICOKE, WITH 10 ten miles Toronto; excellent orchard, brick house, Apply R. Montgomery, Canada Life, Toronto.
