GREAT BRITAIN AND THE UNITED STATES.

The so-called alliance, or entente cordiale, between the United States and Great Britain ought to be as satisfactory to the former country as we know it is to the latter. While the British are slobbering over their new ally, the Americans are attending strictly to business, and pushing out their tentacles into every country where there is business to be done. John Bull need not fear that Uncle Sam will ever declare war against him. Uncle Sam is quietly but surely cutting the ground from under his feet. An industrial war has already been declared, and Great Britain soon realizes that the British are slobbering over their new ally, the Americans are attending strictly to business, and pushing out their tentacles into every country where there is business to be done.
