The readjustment of cash value will be in evidence within a month, when the initial movement of winter wheat will dictate the price of cash. Situation of old wheat is so acute as to make the closest student of market conditions hesitate to forecast immediate tendency of futures until effect of movement is apparent. We think however, that it is conservative to venture the statement that cash wheat is established over the \$1 mark for coming crop, and after viewing market factors we do not hesitate to advise commitments on the long side of September and December on all good decided and the conditions hesitate to advise of the commitments on the long side of September and December on all good decided and the conditions hesitate to advise of the commitments on the long side of September and December on all good decided and the conditions hesitate to advise of the conditions and the conditions and the conditions are conditions and the Total-West Toronto-

THE MAN

and the man in the office. The man in the study and in the store. The man in the workshop, factory, or on the wagon. The woman in the home or in business. The student at college, and the boy or girl at school. Each and every one should drink freely and frequently "HOP-TONE"—the new sparkling, delicious Temperance and Health drink.

HOP-TONE

is new in flavor; new in its grateful and pleasing relish, and new in its genuinely beneficial effect upon the system. We must all drink something, and that something, especially during the summer months, should not only be cooling, refreshing, and thirst-removing, but should also be an aid to good health.

You can drink "HOP-TONE" to your heart's content. Every glassful is not only good in the mouth, but good in the stomach and good for the blood. The taste is not sticky nor sweetish and does not pall on one. It is just "nippy" enough to leave a clean-cut and delicious after-taste.

The best drink of all drinks for all the people all the time.

MANY DON'T KNOW HEART AFFECTED. More People than Aware of It Have Heart Disease.

"If examinations were made of everyone, people would be surprised at the number of persons walking about suffering from
heart disease." This startling statement was made by This startling statement was made by a doctor at a recent inquest. "I should not like to say that heart disease is as common as this would imply," said the expert, "but I am sure that the number of persons going about with weak hearts must be very large."
"Hundreds of people go about their daily work on the verge of death, and yet do not know it. It is only when the shock comes that kills them that the unsuspected weakness of the heart is made apparent."
"But undoubtedly heart weakness, not disease, is more prevalent nowadays. I

disease, is more prevalent nowadays. I should think that the trees of living, the wear and rush of modern business life, have a lot to do with heart trouble." There is no doubt but that this is correct, and we would strongly advise any one suffering in any way from heart trouble to try a course of Milburn's Heart and Nerve
