

The Halifax Visiting Dispensary.

DIRECTORS' REPORT,

FOR THE YEAR ENDED DECEMBER 31ST, 1887.

As customary at this season, the Directors, for the information of the members, subscribers and friends of the Dispensary, as well as for the satisfaction of the public in general, present their statement of its practical and financial affairs for the past year.

It is presumed that the parties above named, feel interested sufficiently to read these reports, to which the city press kindly give extended circulation by publication in their columns. It is the desire of the Directors, that all who bestow money or otherwise assist and countenance this useful and indispensable charity, should discover whether their substantial aid and philanthropic intentions are properly and successfully applied by those to whom the management of the Institution is entrusted.

While the Board, from year to year, endeavour to fulfil this responsibility, and to supervise the fiscal and general business of the Dispensary, its truly beneficent and useful work, as set forth in the Constitution and By-Laws, is solely effectuated by the continuous and faithful exertions of the Active Medical Staff. The details of their daily labours among the indigent sick of the City, Dartmouth, and vicinities, and also for strangers and transient persons unable to pay for medicines or medical assistance, are set forth in the special reports furnished by them, and hereto annexed.
