In 1816 the British Government, in perfect peace, victorious, and tranquil, spent £86,000,000 sterling, no part of which was applied to the extinction of the National Debt. In 1824 its expenditure exceeded £67,000,000. In 1844, the latest period to which the accounts have been completed, its expenditure was reduced to £55,000,000.

In 1816 the interest of the National Debt amounted to £33,500,000; it is now reduced to £26,000,000, and £4,000,000 on temporary annuities, which are gradually disappearing year by year. Whilst Great Britain was achieving these splendid results, she was effecting a vast reform in the manner and extent of her public burdens.

Between 1815 and 1841, a balance being struck between taxes increased and taxes diminished, this power has abolished an amount of £24,000,000 of taxation, and in 1845 suppressed a further sum of £6,000,000.
