

" G - 95 "

Q.425 And that is the actual cost of repairs?

A.425 That is the actual cost.

Q.426 What basis do you use for the fixing those prices for parts?

A.426 Through Parts Books, our Spare Parts Department have Parts Books from the different manufacturers listing these prices.

Q.427 Are those the authorized prices to be charged?

A.427 They are.

Q.428 Mr. Webster, in the summary of evidence you estimated the cost of repairing the vehicle at \$84.35, what is the discrepancy there? Had the repairs been done at that time?

A.428 When was this summary taken?

Q.429 2nd of September, 1943?

A.429 Second day of September. Oh! I would say that at the time that possibly - they took delivery of the car on the night of the first of September. I don't know if the repairs would be completed at that time - it was just a rough summary at that particular time.

PROSECUTOR: I would like to call to the Court's attention that the accused is only charged with the value of \$84.35 and the actual proof is greater than that amount.

PRESIDENT: On checking over the totals which you gave us, that is, at the beginning of your evidence, \$96.05 less a credit of 79¢ makes a total of \$95.26, whereas, your itemized figures make a total of \$95.58. Do you know what causes this difference of 32¢?

WITNESS: Yes, Sir, the 79¢ is less the 40%, if it was at 100% that amount would have been \$1.11.
