CARNEGIE ON U. S. STEEL INDUSTRY

TRIBUTE TO MR. SCHWAB

Congress Committee in Constant Laughter.

Washington, Dec. 22.—That the steel industry of the United States has reached a point where it does not need protection, but can stand alone in competition was the feature of the testi-

tariff bill. The Laird of Skibo Castle kept the committee and the audience in constant laughter by his ready retorts to the questions asked him. He would not deal in figures, claiming that the more figures were used the more the subject

would become "befoggled."

Mr. Carnegie characterized Mr. Schwab as a genius, and Mr. Gary as a most lovable man, but a very shrewd one. He expressed the opinion that wages would not be reduced if the wages would not be reduced in tariff was lowered or removed entirely. He was utterly opposed to an income tax, believing as he said, with Mr. Gladstone, that such a tax produced nation of liars.

The Laird of Skibo testified in support of the statement that he made in his magazine article declaring that the steel industry needs no protection. Mr. Carnegle interspersed his testi-mony with humorous remarks.

Mr. Carnegie suggested that con ing the methods of steel making. never met his equal," said Mr. Carnegie "and when we were partners we were a great team."

"That is very apparent," remarked Chairman Payne.

Speaking of the testimony of Judge

Gary before the committee, Mr. Carnegie said: "You should not place any real value on the testimony of an interested party. Judge Gary said that the U.S. Steel Company could stand for a reduction in the tariff on steel, but that the small steel manufacturers could not survive duties. That is SCHOOL CHILDREN Gary is like the monkey who desired the chestnuts, but wanted the cat to pull them out of the fire."

The room frequently rang with laughter at the quips of Mr. Carnegie. At one point Mr. Payne leaned over whispered to Mr. Dalzell, "I wish the chairman would tell me what he said to Mr. Dalzell, I think I ought to knew." Mr. Carnegie protested. There was a roar of laughter. Mr. Payne made no reply.

heaning over with his hand to his ear and his head cocked to one side in imitation of the attitude assumed by Mr, Payne, in which he spoke to Mr.

you get the more you will be 'befog-geled.' I don't judge by figures given by interested parties, I judge by re-The former steel magnate said that

Mr. Carnegie avoided direct replies to questions as to whether the cost of producing steel at the present time a

will probably be adopted at the said ary meeting of the board.

The present efficient management of the company is reflected in the showing since resuming operation in June last.

From the time the company's smelter is formally and the company's smelter always remembered by him. Tea was then served with delicious oat cakes, schwab around me, and got men like Schwab around me, and we made the cheapest steel that has ever been

"You have been out of the steel trade for some time," said Mr. Payne. "Can you tell us where we can get the figures on the present cost of making "I don't know whether you ca the figures," was his reply. "If a judge

was interested in a cause you wo e asked, referring to the steel me facturers who have appeared before Mr. Carnegie asserted that at the rate at which iron ores are being extracted the supply would be exhausted

Mr. Turner, who left last year for that this amount will have been aclosed the dividend action long, and it looks as though he prefers in January.

The testimony of Judge Gary was lead of what he believes to be gold ore, on the west shore of Mara lake about eight miles south of Sicamous. The
