ON VITAL SU

The secretary of the Retail Grocers Association wrote asking that the mat-ters set forth in former communications in reference to the raising of peddlers' licenses be considered at the earliest Ald. Fell said that the communication

brought up the old question of licenses. The system required remedying. The letter was laid on the table, the writer to be informed that the matter will be considered at an early date.

The sceretary of the License Victual-1ers' Association asked that the license fee be reduced to its former amount, namely, \$200 per year, in accordance with the prayers of petitions previously sent in. The writer pointed out that a large amount of liquor had been imported by Chinese into the city and sold, there is truce for a time, and calm after than those with high ones. The fruit is picked easier, there are not so many ported by Chinese into the city and sold, for which no license had been charged.

Ald. Beckwith asked if it was true that a fee of \$600 had been charged by the license commissioners which entitled that the license commissioners which entitled the Chinese to make any kind of disposal

of their liquors.

Ald. Vincent said some such arrange ment was made, but not by the commis-The communication was laid on the

ON VITAL SUBJECT

Delivered an Address on the Gospel and the Labor Question Last Sunday.

Dr. Campbell last Sunday evening, in a lecture at the First Presbyterian church on the relation of the Gospel to the labor question, said: "A year ago Canada, the American

republic, and many of the countries of which often occurs in badly pruned or to be at the bottom of the trouble, innocent as machinery may seem to be. "Before the introduction of machinery

into the field there was no labor problem, and there is no such problem in countries where there is little machinery now. A. Michaels wrote stating that he had bought a property on Elliott street on which he intended to build a residence.

Divers were thrown more together by the old order of things than they are now, and their sympathy was mutual, Referred to the water commissioner as possible. The result of this want of sympathy is combines on the one hand and city engineer for report.

Mrs. Jackson offered her house and and unions on the other, with the maand Cook street to the city for an Old The aim is to get rich as quickly as possible, which aim is based on selfishness, instead of the aim being to live for the James Phillips, whose place on Beacon elevation of character and the betterevery man is measured, hence the mad

"The employer wants to get rich, and the employee wants to get rich, and this ambition to become rich honestly is who found riches as the fox found the same as the fox found the sound to some grapes. Mr. Dawes has little doubt that the chose in shore. They come in rapidly with the flood tides, at times close to the contracts with before very long to increase his force surface, and break water frequently. . Passing Beachy Head they hold close to Race Rocks and pass to the northeast as far as Discovery Island, and thence east towards Rosario Strait. Men who have studied their movements at these places state that the first of the run after passing Race Rocks move to the east, heading for Rosario, and that

Haro to the Gulf. Such appeared to be their routes during the days of my observations in last July and August. On July 29th I located a school in the vicinity of Race Rocks, which turned to the north and made for Discovery Island, beyond which place I could not follow them. On the same day Mr. Schultz, the manager of the great lime kiln at Roche Harbor on San Juan Island, noticed a vast school, possibly a mile in length, passing outside the traps at Mosquito Pass towards the shores of Sidney Island. None were taken in the traps at Mosquito Point on that tide. The school was not traced further. It may have entered the Gulf of Georgia by the channels to the south of Saturna Island or may have continued to the north and entered the Gulf by way of Active Pass, or Plumper's Pass, as it is locally misnamed.
"It is impossible at this time to de-

passes through Haro, and what proporion through Rosario Straits. tionably, the movements of the fish in hese channels vary with different years, being influenced by their number, and two channels, while in the years of the big runs they are found not only in Haro and Rosario Straits, but in all the founded by reason of the numbers captured there. It is my opinion that the of the fresh waters from the Fraser the waters from Howe Sound and the eastern part of the Gulf are directed Pruning should be planned to obtain the largest crop of fruit of the highest grade with the least spread of branches. Often the whole ground is taken up by trees with long, bare limbs having fruit buds only at the extremities of the branch only at the extremities of the branch of the system, no time is to be lost. The companies must go to work at once, and
