THE STAR, ST. JOHN N. B. FRIDAY, MAY 28 1909

# ENCOURAGING EXERCISES AT THE U. N. B. YESTERDAY

FREDERICTON, May 27.—The annual assembly of the University of New Brunswick, which was held at the University yesterday, was a most successful gathering. There were present a large number of the leading educationalists of the province and parents and relatives of those taking part. Governor Tweedie presided, and seated on the platform were Chancellor Jones and members of the faculty, the president and members of the senate, judges of the supreme court, the president of the University of New Brunswick, and other distinguished persons. The program was carried out in detail. The annual address was given by the Chancellor, who spoke of the progress of the university since its foundation in 1827. He then summarized in a few words the present status of the university. The institution had now a staff of ten professors. It offered a complete course in arts, and three courses in applied science, civil engineering, electrical engineering and forestry. Dwelling on the future the chancellor said: "I believe the most pressing need is a chair of English language and literature apart from the present chair of modern languages. Such a department would do much to strengthen the arts course, which we can by no means afford to neglect. It would also be of great value in the technical courses. It is an evident advantage to the engineer or forester to be able to write a correct and intelligible estimate of work to be done or an equally clear and correct estimate of the value of other considerable advantage would be to provide opportunity for greater attention to modern languages and to give fair prominence to the study of German, which is now almost wholly neglected. The value of German for a future post graduate or professional student does not need to be dwelt upon here.

"The university has contributed very largely to the teaching corps of the province. A very large proportion of the leading teachers are graduates of the university. The university is itself a part of the provincial scheme of public instruction. It would seem that through a department of education to furnish means of training the young people whom we sent out from year to year to occupy prominent places in the teaching profession.

"Another need for instruction in the important subject of history. Our country has a history of which we may justly be proud. It is important that the future leaders of the province should be familiar with the details of its history. There is much to be done in the collection of historical documents and their preservation for the future.

"I wish also to refer very briefly to the suggested extension of our technical scholarship and other prizes followed after which the class honor certificates were awarded. Then came the conferring of degrees as follows: LL. D. (honorary)—Dr. J. H. Inch, M. A. (in course)—Robert C. Colwell, B. A. (in course)—Frank Baird, M. A. (in course)—Harvey P. Dole, M. A. (in course)—Allan Kray, B. A. (in course)—John C. Byles, B. A. (in course)—Clifford T. Clark, A. L. D., Esq., LL. D. (honorary)—Beatrice W. Weller, LL. B. (honorary)—Clarence T. Flanagan, LL. B. (honorary)—Grace H. Flanagan, LL. B. (honorary)—Maudie C. Smith, LL. B. (honorary)—W. Gordon Firth, LL. B. (honorary)—A. Varna Brown, LL. B. (honorary).

The candidates for B. S. C. degrees in civil engineering were presented by Prof. Stone, dean of the engineering school. Those for B. A. degrees were presented by B. C. Potter, M. A. for LL. B. degrees M. A. and M. S. C. by Dr. C. S. Bridges of St. John.

The proceedings were brought to a close with the valedictory remarks by F. C. Howard and the alumni valedictory by the Rev. Mr. Hooper, M. A. of St. John. Both the valedictory and eulogy were of exceptional merit and are among the best ever delivered in the university.

Miss Beatrice Walling, who this year made the distinction of winning both the Douglas and Alumni medals, the two highest gifts in the award of the University, was presented by her fellow class-mates after she had finished reading a selection from her Douglas medal next year is "The problem of the transportation of Canada and its

# "DRINK MILK," SAYS A DOCTOR, "IT IS MOST NUTRITIOUS, HEALTHIEST"

Drink more milk; save money. Here's why: A quart of milk equals in nutritive qualities one pound of meat; it equals one and three-quarter pounds of fish; it also equals in food value 32 quarts of strawberries. One pound of meat costs 15 cents; 1 1/4 pounds of fish also cost 15 cents; at the present rate 32 quarts of strawberries would cost \$4.80. So to get an amount of food value of milk you would have to put up \$5.10. Three quarts of good milk at 8 cents would cost only 24 cents. You'll save \$4.86 by drinking milk.

"We should drink more milk," said a prominent doctor and authority on food values. With a dish of fish, a dish of meat, a dish of strawberries and three quart bottles of milk he demonstrated for a reporter today the inferiority of fruit, meat and fish when compared to milk.

"Drink more milk," he advised. "You'll save more money and be better fed. We must cultivate a taste for milk and milk products. There's Holland, for instance. Holland is the greatest milk-drinking and milk-producing country in the world. The peasants eat meat only once a week. There is no more muscular and harder race than the Dutch. The muscles come from the cheese they eat and the milk they drink.

"We are eating too much meat. It produces most of our Bright's diseases. Meat is the most expensive of our food products, and this is proven by the fact that in the poorer countries meat is a luxury."

He himself drank a lot of milk drinking, but he also eats meat, likewise strawberries.

Which will you have for 10 cents he asks. The piece of fish, the dish of strawberries and the piece of meat and the quart of milk he shows each cost 10 cents. Yet the bottle of milk has more food value than any of them.

"You save the poor say, 'Well, we can't afford to drink milk.' It's absurd when one knows the relative price of food value of meat and other products. There is no better proof of this than the healthy babies who are reared on nothing but good milk."

# WOMAN'S CLIMB IN WILDEST PAMIRS Mrs. Workman Ascends a Peak 21,350 Feet High.

Husband Telegraphed Her as She Conquered the Snowy Ridge—Tribesmen on Strike

PARIS, May 27.—Dr. and Mrs. William Workman have arrived in Paris after an expedition to the Pamirs. Mrs. Workman's feat was made on this trip to an expedition to the Pamirs. Mrs. Workman, leaving her husband below, climbed a peak on the watershed between the Hindu Kush and the Pamirs, a feat never before accomplished by a woman.

It was a dangerous climb. Mrs. Workman took her correspondent that the peak was 21,350 feet high. The last 2,000 feet was a most precipitous shoulder not being more than eighteen inches wide in places, and this was capped with treacherous overhanging snow. Just as she was nearing the top a storm broke. Dr. Workman took a photograph with a telegraphic camera, which shows his wife and two guides on the pinnacle surrounded with clouds.

The couple, with their party, were in the mountains until October, working in conjunction with Prof. Brunhes of Freiburg University; Dr. Count Calciati, an Italian, and Dr. Dekonca, a Pole, special glacier experts, who mapped the country as has been done by the Swiss Alps. Mrs. Workman added:

"We had our own Italian guide, Savoye, and three porters, together with native coolies. We made curious and important discoveries in ice formation and found a certain pinnacle formation that has been found in the Andes and South Africa. We reached a definite conclusion concerning the causes of this formation, which we will publish soon in a German scientific review.

"We found the wildest tribe we have ever yet encountered. They threatened to kill our agent, who had hired some of them as coolies through the Rajah of the district, because he would not pay three times the price agreed upon. But in that wild country the people are not much different from those in civilized Europe.

"Our coolies went on strike just as though they were French postal employees. Our cooks and helpers stole our food. One day by luck we secured fourteen chickens, but the next day only two could be found. Our natives blamed the foxes for their disappearance.

"We took only six bottles of whisky, and brought back four. At one time we were seven weeks on the ice. Alcohol, in my opinion, is very bad for people attempting mountaineering. We never take stimulants before or during a journey. After a particularly hard day we take a couple of teaspoonfuls of whisky in a cup of tea, to remove the soreness from our limbs.

"On this trip, besides working, I walked upward of a thousand miles without trouble, but now that I am

# WAS A MEMBER FOR SIXTY-TWO YEARS Gurney Division, Pays a High Tribute to the Late Charles A. Everett.

Gurney Division, No. 5, Sons of Temperance, held its first meeting last night since the death of Charles A. Everett. Being the anniversary of the usual routine business the lodge passed the following resolution:

ST. JOHN, N. B., May 27th, 1909.

Inasmuch as our venerable and honored brother, Charles A. Everett, in the fullness of years, has gone to his rest, the members of this division desire to record their deep sense of the public loss, and their appreciation of his splendid services to the cause of the Sons of Temperance throughout a long and busy life, and to the development of public sentiment in favor of the prohibition of liquor traffic.

For sixty-two years Mr. Everett was a member of Gurney Division, having been one of its charter members. Connecting himself with the order while yet a youth, he rose through the various gradations of office until he attained the highest honors in the gift of the Sons of Temperance of Canada and the United States. To the very close of his life he was devoted to the welfare of this division, and was one of those who, when the interest of the members weakened, always rallied to its support.

Mr. Everett was a pronounced advocate of total abstinence when public sentiment was indifferent or hostile to such an attitude, and members of temperance organizations were frequently subjected to derision or insult when they appeared in regalia upon the streets. He lived to see the cause vindicated, and its emblems everywhere put on the defensive, with a wave of prohibition sweeping over the whole continent. In his own city he saw the number of licenses reduced, the saloons removed from saloon windows and the evil influence of the three wards, with bright prospects of further success in the near future.

Both by precept and example, throughout his life, Mr. Everett, at home and abroad, in private and public life, stood fearlessly for the principles of the Sons of Temperance. The influence he thus exerted in all those years, for he was also an able and convincing speaker, must have been very great, and his example should be an inspiration to every member of the order. It is therefore

Resolved, That the members of Gurney Division, recording their sense of the common loss, and paying tribute to the memory of an honored brother, hereby extend to the members of his family an expression of profound sympathy in their great bereavement.

GURNEY DIVISION, NO. 5, SONS OF TEMPERANCE.

S. F. SWAIN, H. W. WELDON, J. STARK.

Dolly—When they came back from his wedding trip he had just \$2.25 in his pocket.

Polly—The stingy thing!—Puck.

The Bride—I want you to send me some coffee, please.

The Groom—Yes, ma'am, ground.

The Bride—No, third floor, front.

Woman's Home Companion.

back in the dust of my trouble begins. We have been asked to lecture before the Geographical Society, the Alpine Club and the Sorbonne in France, and the geographical societies in Antwerp and Brussels. We are looking forward to appearing before the Royal Geographical Society in London.

# "ORANGE BUD" NAMED FOR GREAT QUEEN Little Princess of Holland a Joy of People.

Dutch Astronomer Says She Will be Trustworthy, Prudent and Honorable in Word and Deed

LONDON, May 27.—Princess Juliana, the "Dutch baby," as she is universally known, is sixteen days old, and everyone still speaks well of her. The "Orange Bud," as her own people delight in calling her, has like most babies, blue eyes and fair hair, and although Prince Henry, her father, is reported to have exclaimed: "Only a girl!" the Queen, her mother, greeted the announcement that the child belonged to the fairer sex with a smile.

Juliana is not a common name in Holland, and practically everyone expected as a matter of course that the baby would be named after her mother. But the parents preferred to give her as first name that of one of her most illustrious ancestors, Juliana, Countess of Stolberg, wife of William of Nassau-Dillenburg, was the mother of the five brothers, William the Silent among them, who helped to free Holland from the Spanish yoke.

The Dutch custom of distributing mules, or scaraway candies, on birthdays, was not neglected at Gurney. Everyone in any way connected with the court was presented with a bag of the little sweets with hilalets enclosed, the whole being put up in a bag of the national colors, red, white and blue, tied with an orange ribbon.

HER HOROSCOPE CAST.

An entered Dutch astrologer cast the horoscope of the little Princess twenty minutes after her birth. This is what he says: "Princess Juliana will be trustworthy, honorable and prudent in word and deed. She will possess great power of will, which, however, will not be sympathetic and philanthropic, and will work distastefully and quietly for others without desire for reward, but seeking perfection in all things. The Princess will also follow art and science, and will have a special talent for music and poetry. Companionable and eloquent of speech, she will possess the knack of getting on well with all sorts of people."

Photographs of Queen Wilhelmina, with the infant in her arms, were placed on sale on the day after the birth took place, and the only disappointed people are those who put on the market medals with the baby's effigy inscribed: "Born March—," the date being left blank for insertion later.

Newspapers and the writers of congratulatory addresses have been officially reminded that the new-born Princess is not the "Princess of Orange," as she has often been called, that title belonging exclusively, according to the constitution, to the consort of the Prince of Orange.

"We will teach those trusts a thing or two," said the statesman.

"Don't do it," answered Senator Sorghum; "my observation is that the trusts never learn anything new without making it a source of further profit."—Washington Star.

Mrs. Hoyle—My husband always smokes after a good meal.

Mrs. Doyle—Doesn't he ever smoke at home?—Home Reading.

# Traveler's Samples

White Wear, Corsets, Curtains, Top and Under Skirts.

to be sold at less than wholesale prices at

# THE PARISIAN STORE,

We have bought out trunks full of Traveler's Samples, every one containing articles that are up-to-date. In order to make a clean sweep we decided to give the purchaser the benefit of our purchase.

We have no space to mention the numerous lines and their Bargain Prices, but it will be for your own benefit to see them. We also decided for Saturday and Monday to give a Special Discount of 10 p.c. on all our Clothing and Furnishings for Ladies, Gents and Children.

# Here Are Some Of Our Reduced Prices:

- Ladies' Covert Coats in the Latest Styles and Collars.....\$4.75 to \$6.98.
- Ladies' Suits in Brown, Blue and Black in the latest make, nicely trimmed.....\$6.98 to \$16.50.

# \$28,000,000 CHARITY EXHAUSTED, RUINED CITIES STILL REMAIN

Remarkable Disposition of the World's Charity to the Italian Earthquake Sufferers.

LONDON, May 27.—Further remarkable details of the disposition of the world's charity to the Italian earthquake sufferers are furnished by the Daily Mail's Rome correspondent. He says that although the principal ruined cities have as yet not even been reorganized of normal life, practically all the relief funds have been already disbursed or promised. The president of the Central Relief Committee has furnished the following figures, which, however, are only approximate:—

The relief sent by foreign countries was valued at \$4,760,000, of which the cash subscriptions were approximately as follows:

Great Britain	.....\$800,000
Argentina	.....400,000
Germany	.....400,000
France	.....300,000
United States	.....200,000

The relief from other countries has not been calculated precisely. The foregoing sums do not include provisions from abroad, huts and warship relief. The Italian Government voted \$8,000,000 and imposed surtaxes equivalent to \$14,000,000, the latter being distributed over a series of years and to be expended in restoring public services in the earthquake area. In addition to these amounts, the Vatican received \$1,260,000 from the Catholics of the world, most of which was ready to be distributed by the Sicilian and Calabrian clergy. This is a total charity of \$28,020,000. The Central Committee disbursed \$4,450,000 and engaged very large sums for rearing orphan and other charities which must continue for years, and now has at its disposal only \$15,375.

# OVER \$100,000 NOW FOR HALIFAX Y. M. C. A.

May Change Plans and Have Enlarged Building Costing \$120,000.

HALIFAX, N. S., May 28.—The Halifax Y. M. C. A. building fund campaign has been on for about nine days. The largest single pledge was received yesterday morning, Miss Emily Searle, of Dartmouth, promised \$7,000 for the reception room, to serve as a memorial to her father, the late Frederick Searle, Mayor of Dartmouth. This, with the subscription collected by the young men, brings the fund up to more than \$100,000.

The goal set before the association was \$165,000, by June 1, but there is now a possibility that the plans of the proposed building may be changed, providing for an enlarged building to cost \$120,000.

# For Over 100 Years Brandram's B.B. White Lead

has been the Standard White Lead Paint in the markets of the world.

The Brandram Process make the whitest and finest White Lead known.

It has greater covering capacity, carries more Linseed Oil, and makes more Paint than other White Leads.

MADE IN CANADA BY BRANDRAM-HENDERSON LIMITED. MONTREAL — HALIFAX — ST. JOHN — WINNIPEG.

# Don't Paint the Floors

It seems that the world-wide has been right all along in their prejudice against painted floors and their preference for polished hardwood. The fact is known to be the victim of many diseases and holds dust about as badly as a carpet, and is known to be the victim of many diseases and holds dust about as badly as a carpet, and is known to be the victim of many diseases and holds dust about as badly as a carpet.

# Floorglaze

Floorglaze is an economy, because it will not show wear in many years, even under hard usage, and it will dry hard overnight. This perfect floor finish comes in tins, the size ranging from a pint to the gallon can that will cover 800 square feet. Dealers in almost every store sell Floorglaze, as well as the other first-rate paints and finishes made by Imperial Paint & Color Co., Ltd., of Toronto, who send free a readable booklet you ought to request.
