inal is made more easy by the fact that his compatriots in the employ of the railway sympathize with him and are assisting him in eluding the police. But from the information which has now been gained Sheriff Tompkins believes that he can go directly to the place where the man is concealed and place him under arrest.

Last evening a post mortem examination was conducted by Doctors Grant and Rankine at the undertaking rooms of A. Henderson and Co. The doctors found that one of the bullets had entered Lagany's chest passing entirely through one lung; another bullet entered the abdomen and had plerced the bladder. Either one of those would have proved fatal. More than a quart of blood was taken from the lung. The third bullet was not located. There will be no inquest and the funeral of the victim will be held this evening from the undertaking

When summoned to the chair the condemned man refused any aid and walked alone with just a trace of swagger from his cell to the death house and took his place in the chair.

Before he died Burtchey wrote letters to the widow of his vicitim and to many of those whose houses he had robbed, asking that they forgive him for what he had done.

A long series of robberies, which was A long series of robberies, which was was broken by one extended term in jail, led up to the murder. the authorities and the people are displaying the greatest energy in endeavoring to round up the murderer in the present case, and with good hope of success. The police arrangements in the vicinity of the scene of the crime are about as complete as they can be. The country has all been gone over carefully and although there has not reemed to be much success, still the sheriff has obtained a clue which he anticipates will solve the mystery of the disappearance of Sandy Manoti, the murderer. The district around Beechwood is thickly wooded and almost anywhere a man could lie hidden for days. The escape of the criminal is made more easy by the fact that his compatriots in the employ of the

Sea on Life Raft

Scarcely had the boat dropped into the tumbling seas than the Nezinscott lurched and plunged into the waves.

The captain, surgeon, engineer and three or four of the crew managed to haul themselves aboard a life raft which had been cut away. Then it was found that three of the tugs had gone down.

Sentiment Shown in Council Meeting-Chief's Job Safe for the

CHATHAM, N. B., Aug. 11—Enforcers of the Scott Act found themselves in a minority last night when a special meeting of the police committee took up the Scott Act Inspector's report for July. This had been laid on the table on two occasions as not showing enough evidence of enforcement of the law and finally brought a motion from Ald. Haley that the inspector be discharged. This motion was again put last night and was lost, 4 to 3, Ald. Carvell, Wyse, Cassidy and Gallivan voting nay, with Snowball, Tweedie, and Haley yea. Ald. Loggie was absent. Another motion was put forward that the chief of police be given one month in which to thoroughly enough more than a week now, of "Bargain Days" and to date very little has been done towards winning the Sun and Star prizes. We wish we could convince you that right now is the best time to secure votes since the contest began. Doesn't it sound reasonable to you that you can do better work when you are not interfered with by other contestants. If there is anything in the world that will incite you to put forth your very best efforts, the prizes which we are giving away certainly should do it. There is not one of them that is not working harder than you are in an endeavor to win whichever prize you may fancy.

No official information is obtainable concerning the trouble. chief of police was present and frank-ly told the aldermen that he would enforce the act if they wanted him to

The pilots entered for the races include every prominent aviator in France together with a few new-comers and a small number of foreign representatives. Among the different types of machines represented are the Wright, Volson, Bleriot, Antonnite, the Herring-Curtis, and the R. E. P., all of which already have given ample proof of their ability to fly.

There being no limit to the number of aeroplanes which may, be entered for the races organized by the Rheimo committee several makers have put in more than one machine. The Wright interests are represented by seven aeroplanes, the Bleriot by five, the Volsin by seven and the Antonnite by three.
