MRS. CURREY IS SUBJECTED TO SEVERE CROSS-EXAMINATION

On the Stand in Separation Suit for Five Hours Yesterday--Adheres to Her Previous Evidence--Frequent Tilts Between Counsel Enliven Proceedings--More Suit Money Wanted.

Yesterday's session of the Currey separation suit, which is being heard before His Honor Justice McKeown in the Divorce Court, was one of the most interesting since the case started in Fredericton some time ago...

The features of yesterday's proceedings were, the ability of Mrs. Currey to adhere to her previous story while under cross examination, the frequent tilts between opposing counsel and the surprise sprung by Mr. M. G. Teed, K. C., Mrs. Currey's counsel, just before the court arose at last past four o'clock when he announced that on Monday he would move the court for a further sum of suit money.

When the court met in the afternoon the cross examination of Mrs. Currey was resumed by Mr. Skinner. Asked by Mr. Skinner if she denied that the children's heads were unclean, the witness answered that she did not say so.

At this point counsel for Dr. Currey, Mr. Teed, entered into a joint debate over the condition of the children's heads which ended in Mr. Skinner saying: "Mind your own business, Mr. Teed, and I'll mind mine."

Continuing the witness said on this occasion Dr. Currey found the house at Woodman's Point locked. She arrived shortly after Dr. Currey landed from the Elatine. He was very angry because the witness used common decency in his method of asking questions. "The questions are absurd," he said.

At this juncture His Honor adjourned the court until Monday morning at eleven o'clock. In adjourning his Honor gave as a reason for not having a session today, the inability of Mr. Fred Devine, the official stenographer in attendance, to be present as he has another engagement.

At the opening of the morning session the cross-examination of Mrs. Currey was commenced by Mr. Skinner. The witness told that on the morning of the cross-examination of Mrs. Currey was commenced by Mr. Skinner. The witness told that on the morning of the cross-examination of Mrs. Currey was commenced by Mr. Skinner.

had treated her parents in a perfectly pleasant manner. On the birth of the child a bottle of champagne was opened.

Mrs. Currey stated it was a problem for her to get on with the schooling of the children. Dr. Currey's married sister had broken up her home and gone to the country. The other sister suggested that she should care for the children. Mrs. Currey consented and the sister cared for the children.

Miss Currey Arrives. Miss Currey had, later, reached St. John and established herself in the Currey household. Mrs. Currey was not called for help. Afterwards she went to the window and looked out on a Friday.

When she arrived at the house Mr. Currey yelled: "Seventeen pairs of gloves!" and catching witness by the shoulder, threw her across a cot bed, which was in the room. During the enactment of this scene, witness said she did not call for help. Afterwards she went to the window and looked out on a Friday.

On one occasion a servant, Lizzie Oldford telephoned witness at Mrs. McDonald's house, saying she was afraid that Dr. Currey would commit suicide. On another occasion at Woodman's Point Dr. Currey appeared dazed.

Q--What do you mean by a bad influence? Do you mean that Mr. Currey was only bad when influenced? A--Please repeat that question. My questions are long and are more or less involved.

Q--Did anything unusual occur on this occasion? A--I must tell you what led up to the affair before I can tell you what occurred.

Q--How do you know? A--Because Eliza would say something one day and Mr. Currey would repeat it the next.

Q--Did he move his toes? A--Oh, I don't know. Mr. Hanington objected to such tactics and thought that the learned counsel for Dr. Currey should use common decency in his method of asking questions. "The questions are absurd," he said.

HORN BROOK CASE GOES OVER FOR A FORTNIGHT

Case of Sussex Magistrate Charged With Misdemeanors Adjournd Until August 14th--Several Witnesses Were Heard Yesterday Before Commission in Support of Charges.

Sussex, N. B., July 30.--Investigation into the charges preferred by the advisory committee of Kings county council against Joseph Hornbrook, police magistrate, was opened this morning with Hon. J. D. Hazen as sitting commissioner. Mr. George W. Fowler appeared for the accused, and Mr. A. A. Wilson, St. John, for Magistrate Hornbrook.

The charges were read, alleging that information had been given out by the magistrate which operated against the proper enforcement of the Scott Act, that certain fines collected by Hornbrook had placed himself under financial obligations to persons who were violators of the Scott Act.

Wilmot G. Asbell, county inspector, was the first witness, and gave evidence as to the information being given out by Magistrate Hornbrook as to the charge laid against George Doyle before the papers were served. Mr. Skinner--What was the objection to Mr. Currey's condition at this time warranted her making that statement.

Mr. Hanington--I do not propose to stand that that Mr. Skinner. The court--When counsel address the court, they generally arise. Mr. Hanington--I apologize. The court--You are no worse than the other counsel.

Q--What do you mean by a bad influence? Do you mean that Mr. Currey was only bad when influenced? A--Please repeat that question. My questions are long and are more or less involved.

SCHWAB'S STUDYING NEW SYSTEM

Cape Breton Man Speaks of Steel Magnate's Visit to Sydney--The Strike Situation.

The visit of Mr. Charles M. Schwab and a party of officials from the Bethlehem Steel Company's plant at Alabama to the steel works at Sydney, has aroused considerable speculation as to whether the United States steel magnate was seeking to secure control of the Sydney properties.

The presence of practical steel manufacturers from the Southern States lends strength to this theory, and it is believed the visitors have in view the adoption of similar methods in the factories of the United States Steel Corporation. In Sydney, the system in use enables the workmen to keep the ore hot continuously from the time it enters the smelter until the rails are fashioned.

Public opinion, he added, was decidedly against the United Mine Workers, who were striking the W. A. Bennett. The visitors had had a long talk through the company. The night last two months more, as the walking delegates from the United mines were out for their money before they went.
