CITY VOTES \$1,000 TO HELP ONTARIO FIRE SUFFERERS
Engineer McGinnis to be Engaged for Water and Sewerage Department for Two Months' Term—Demonstrator to Teach Firemen Proper Care of Motor Apparatus—Other Business at Yesterday's Council Meeting.

At yesterday's meeting of the city council it was decided to subscribe \$1,000 toward the funds for the relief of fire sufferers in Northern Ontario. Authority was given for the pooling of the unexpended balances in the fire and police departments and the commissioner of public safety was given power to employ a demonstrator to instruct civic employes in the proper handling of the motor apparatus belonging to the city. A request for the city to pave Brunswick street was authorized to secure the cooperation of labor was received and laid over. The matter of the harbor survey was not brought up but will be discussed at the committee meeting at noon on Thursday. Commissioner Wigmore was authorized to secure the services of Engineer McGinnis for two months at \$300 per month and to call for tenders for the evacuation and back fill at Lake Latimer. The meeting was called to order at three o'clock by His Worship the mayor and all the commissioners were present together with the common clerk. The commissioner of harbors, ferries and public lands recommended that the order of council of the 8th day of August last instructing the chamberlain to collect one-half of the account of \$437.71 paid for repairs to the Union wharf, be rescinded, it having been put in the report of your commissioner under a misunderstanding. That a renewal lease issue to John Casey of Lot No. 516, Brooks ward for 7 years from 1st May last at \$18.15 a year rental being 10 per cent. on the present rental.
That the account of J. A. Gregory of \$1,147.71 contract price for deals furnished for repairs to South Rodney wharf be paid. Recommendations adopted.
The commissioner of public safety recommended that the unexpended balance of the fire department appropriation for the remainder of the year be cut into one fund to meet the expenditure of whatever part of the service requires the outlay.
That he be given authority to employ the services of a competent person to demonstrate the working of the auto fire apparatus, etc.
That the unexpended balances of the police department appropriation for the remainder of the year be put in one fund to meet the expenditure of whatever part of the service requires the outlay. Recommendations adopted.
The commissioner of public works recommended that the application of Messrs. Raymond & Davy for permit to erect an electric sign over their entrance on King street to the Royal hotel be granted on the usual terms. Adopted. He reported having had a verbal request from Louis J. Corey that the city pave with cement the roadway, curbs and sidewalks in Brunswick street from Brussels street to Erin street. Mr. Corey and the other property owners and occupiers to contribute the entire amount of labor required in the work, some of all of the money in addition to bring their contribution up to one-half the total cost, which is roughly estimated at \$4,700.
As the commissioner did not have a very high opinion of cement for road work he recommended that an effort be made to induce Mr. Corey to have his offer apply to some other paving material and that the city arrange to accept his proposition when in a position to issue bonds for the work.
Commissioner McLellan asked the commissioner of public works if he knew of any city where cement was used for road work.
Members of Cynnet Co. No. 5, U. R. K. of P. You are hereby notified to assemble at the Armory, Castle Hill, Germain street, at 1.30 o'clock sharp, on Thursday afternoon, Aug. 24, to take part in Decoration Day Services. By order of Captain. **JAMES E. AITKINS, Recorder.**

not giving satisfaction and quoted figures which he had obtained from 23 cities in the United States which were using cement roadways.
Between the years 1908 and 1915, 1,468 miles of cement roads had been laid, in the year 1915, 938 miles were laid and Wayne county, Ohio, had adopted the cement road as a standard. This section of the report was laid over for further discussion and the commissioner of public safety will supply the commissioner of public safety with what information he has in regard to cement roads. He also reported that applications had been received for the construction of new streets for the purpose of making more land available for the building of houses. That compliance with these requests by building the streets rapidly would enrich the owners of large blocks of land situated in the localities where the streets are to be made; these owners, as a rule, selling only a few lots in advance of the street making, and suggested that the council adopt a policy in this matter. This opened up quite a discussion and it was finally decided to consider the question in committee. Commissioner McLellan said this opened up the question as to whether the city should provide streets for real estate dealers or make them build the streets and the city take them over and maintain them. The practice in other places was for the real estate companies to build the streets and then the city would take them over. Commissioner Wigmore suggested that one way to overcome the difficulty was for the building inspector not to issue a permit for a building until the street had been made and the water and sewerage service installed and called attention to the fact that a number of houses had been built on Metcalf street extension to which it was almost impossible to extend the sewer. Commissioner McLellan said that this way of dealing with the problem never struck him before and he would advise the building inspector to follow this course in future. He further reported that the grading and finishing of the eastern block in Clarendon street, as petitioned for (about 500 feet in length), would probably cost about \$3,000 (or more), exclusive of paving, but including rock cutting, the building of retaining walls near eastern end of street, the laying of cement sidewalks on northern side and the placing of granite curbs on both sides, the contribution, which would be looked for from the property owners being probably only with regard to the cement sidewalks.
He recommended that the work be proceeded with as funds were available from appropriations; but that the expenditure for retaining walls be avoided if possible.
This will be taken up in committee to see if any plan can be devised whereby this work which was promised last year can be done this fall. A communication from the Domestic Sanitary and Heating Engineers asking that the next vacancy on the board of health be filled with one of their members and advocating the appointment of a plumbing inspector was received. Commissioner Wigmore asked that he be given authority to engage Frank McGinnis for a period of two months at a salary of \$300 per month, and that he be authorized to call for tenders for the excavation and back fill in connection with the water extension at Lake Latimer. Adopted. It was then decided to subscribe the sum of \$1,000 to the fund for the relief of sufferers in Northern Ontario fire. The mayor referred to the daylight-saving by-law and suggested

that possibly it would be wise to return to standard time the first of September instead of the last, but no action was taken, the feeling being if the people desired this change they would ask for it. Commissioner Russell announced that he would bring up the matter of harbor survey at the committee meeting on Thursday. Council then adjourned.
