

placed the estimate at a figure which he thought was right and fair. If the money was not needed it would not be used. Reference had been made to the three in connection with the Tobacco matter. This was a subject of the greatest importance which had to be attended to. The rights of the province had been invaded by the Dominion granting a charter which they had no right to grant, and it was necessary that these rights should be protected.

Hon. Mr. Pugsley said that he understood the leader of the opposition and the member for Carleton had referred to the payments made to him during the past year. They had added up everything, even the seasonal indemnity. As to the salary of the attorney general he did not think that people would say that it was too large. It is \$1,500 less than the attorney general of Nova Scotia receives. With regard to the sums paid for professional services, he was sorry that a man holding the position at the bar of the leader of the opposition should seek to receive the sum of eight years' salary. When these sums were paid to him he was not a member of the government. He did not seek the government's retainers, but he was not one of them larger than he would have charged private parties.

In the bridge investigation he charged \$30 per day, the same charged by Dr. Stockton. His bill was larger because he had extra work in making enquiries. He took the ground that the Ontario bridge companies were seeking to establish a market of New Brunswick and it was important to learn what they were charged for in the upper provinces. It was important to learn what they were charged for in the upper provinces. It was important to learn what they were charged for in the upper provinces.

Mr. Hazen said that the attorney general was unfortunate when he converted the duties of an attorney general of Nova Scotia with his own. There are only paid departmental officers in Nova Scotia. The attorney general of Nova Scotia is forced to be at his office every day and he cannot engage in private practice. He is the head of the crown land department and is also charged with other duties. On referring to the attorney general's sessional indemnity he only meant to make the project that he was paid for his attendance at the house and the fact that he should not have received a further sum of \$1,500 for appearing before the bridge committee.

Hon. Mr. Pugsley—What do you think of the charge of your own counsel, Dr. Stockton. Mr. Hazen—It was not paid at my request or that of the party. Hon. Mr. Pugsley—Dr. Stockton applied for it. His bill was rendered in the usual way and the government was asked to pay it. They had no objection in doing so, but finally concluded that it was the proper thing to do. It was absurd to stick the bill to the government. Stockton's bill in order that his own bill might be paid also.

The item passed. Supreme Court Reports. On the item of \$500 for printing and publishing the reports of the supreme court, Mr. Hazen said the reports were three years behind and would not be published until the next session. The government were taking any steps to bring them up. Hon. Mr. Tweedie—I am assured that the reports will be published very soon. This is not for the recent reports, however, but for the Chipman manuscripts. It is a review.

The item passed. Butter and Cheese Factories. The sums of \$500 for the department of agriculture, and \$1,000 for butter and cheese factories (industrial) were voted. In explanation of the last, Hon. Mr. Ferris said he did not anticipate so great an increase in the number of butter and cheese factories as last year. He said there were agricultural societies have been incorporated during the year, making a total of 29, with a total membership of 4,529, subscribing \$6,261. Six new roller mills have been erected, making the number now running 19. There was grown this year 301,300 bushels of wheat on 26,807 acres, being an average of 18.8 bushels per acre. This is an increase of 12,500 over last year, and an increase in average per acre of 7.10 of a bushel. The cost of wheat is perhaps the most important grain in the province, and shows an increase in bushels and average yield per acre, 5,281,000 bushels in this grain was grown in the province last year, with an average per acre of 29.12 bushels. There were in operation last year 24 cheese factories, making very close to 2,000,000 pounds of cheese, with a value of \$100,000, being an increase over the previous year of 250,000 pounds and \$22,000. 33 butter factories were also in operation, being an increase of eight during the year. These factories produced 462,000 pounds, with a value of \$84,018, being an increase over the previous year of 18,700 pounds of butter and a value of \$30,124.

The total value of cheese and butter manufactured in the province last year in factories was \$284,224. Of this quantity there was exported \$170,000. In educational work there were held during the last year 73 institute meetings, with a total attendance of 10,222 persons. It is proposed during the present session to obtain legislation authorizing the establishment of regular farmers' institutes in the different sections of the province, similar to the system now in vogue in Ontario. It is proposed to have one of these institutes in each county of the province, as possible, thereby interesting the people in each locality. It is proposed to amalgamate the small dairy associations throughout the province with these farmers' institutes.

Mr. Flennigan said that the indications were that in Carleton county there will be more these and butter factories this year than last, and he hoped the department would encourage the industry. Upon the item of \$2,000 for institute meetings, Hon. Mr. Ferris stated that he carried on all over the province during the present year. The following items passed, \$1,500, enclosure: Encouraging for dairying, \$1,500.

dairy school, \$500; dairy associations, \$883; school for horticulture, \$150. St. John Exhibition. When the item of insurance, exhibition building, St. John, \$225, was reached, Mr. Hazen asked what was the government's intention with regard to a grant for the St. John exhibition. Hon. Mr. Tweedie replied that the question was not yet settled. St. John wants the whole grant of \$5,000, but other counties want a share of grants. It was never intended that the grant for exhibitions should go to St. John in particular, nor exclusively, but is given for the purpose of encouraging agricultural shows. St. John has had the whole grant for three years in succession, and this year Carleton, Madawaska, Westmorland, York and Kings all have asked for a portion. Kings claims a good share because they have erected a fine exhibition building and track, a credit to the province, and they have received only \$4,000. York wants nearly the whole amount, because they have not had an exhibition at Fredericton for a long time. The government does not feel that St. John should have the whole of the grant and at the same time a delegation from the St. John Exhibition Association said that nothing should be done until the whole grant would do them. This delegation wanted the government to go in with a certain amount, and they were willing to let the government to call a meeting of its stockholders and see whether or not they approved of this scheme, or if they would prefer to let the government to do it. The government has under consideration the advisability of holding a maritime exhibition, having it at St. John and Halifax in alternate years.

The item passed. Contingencies. Under the head of contingencies, \$14,000, Mr. Hazen suggested the advisability of putting in an electric light plant to light the parliament and departmental buildings. Hon. Mr. Tweedie thought the suggestion a very good one. He also stated that he would make a strenuous effort to keep the contingencies within the sum asked for. The item passed. Deaf and dumb institution, \$500, was passed, the provincial secretary remarking that probably he would ask for a larger sum. The sum of \$1,000 for school houses, poor districts, was asked for and Mr. Hazen said that he would ask for a larger sum. The sum of \$1,000 for school houses, poor districts, was asked for and Mr. Hazen said that he would ask for a larger sum.

Legislative Library. On the item of \$1,000 salary for the librarian and books for the library Mr. Hazen said the library was not such a one as this province ought to have. We have the literary taste and historical interest of all the records, manuscripts and archives of New Brunswick. If it could be arranged that some gentleman of the literary taste and historical interest could be appointed librarian who would collect the records of the province it would be a great gain. Documents of the province are scattered all over the province. The grant for the librarian should be increased to a sum sufficient to secure the services of a large man. School books. The library has more books relating to the province and all the records, manuscripts and archives of New Brunswick. If it could be arranged that some gentleman of the literary taste and historical interest could be appointed librarian who would collect the records of the province it would be a great gain.

On the item of \$80,000 for the lunatic asylum, Hon. Mr. Tweedie said that \$30,000 had not been found sufficient. There are now 234 patients in the asylum. The number of patients in the asylum is now 234. The number of patients in the asylum is now 234. The number of patients in the asylum is now 234.

Imperial Institute. The item, Imperial Institute, \$50, was explained by Hon. Mr. Tweedie, who said that all the other provinces made an expenditure of the Imperial Institute at London. The agent general and Lord Strathcona had urged New Brunswick to do the same. We are in a better position now to do so than ever before, because of the purchase recently made by the surveyor general of the Boardman collection of birds and animals.

The sum, \$300, is asked for sending over the exhibit and paying a curator. In future only \$250 will be asked. He would say with reference to the collection of the Imperial Institute at London, it is considered one of the finest on the continent. It was purchased by the crown land department for \$5,500, less than one half its value.

Mr. Hazen suggested that the government might well consider the advisability of putting up a building, central for the care of the valuable collection of birds and animals belonging to the crown land department. Hon. Mr. Tweedie agreed that the matter was well worth considering. The item passed. Tourist Association. On the grant to Tourist Association of \$2,000, Hon. Mr. Tweedie stated that there are associations at St. John, Fredericton and Miramichi. It was trying to induce the associations to amalgamate and believed that if they did so the results would be much better. He might find it necessary to withhold any portion of the grant until the associations do unite. The item passed.

The committee rose and reported progress and supply was made the order of the day for Thursday, March 28th. The whole supply was passed in about four hours. The total amount authorized by law is \$434,124.48, and the amount voted was \$426,290.63. House adjourned at 4:15 p. m. Friday, March 23. The House met at 3 o'clock. The marine hospital bill, the registration of vital statistics bill, the Railway bill and the bill amending the Trinity church burial ground act were read a third time and passed.

Hon. Mr. McKeown presented the petition of the city of St. John for a bill to authorize the city to grant aid to a steel shipbuilding company. Mr. McKeown gave notice of inquiry with regard to the charges levied by the Metropolitan Police. Mr. Hazen gave notice of motion, for Monday, that no person shall be entitled to vote in more than one electoral district.

Mr. Lawson introduced a bill to incorporate the Riverview Canteen by Company. Mr. Hazen gave notice of motion, for Monday, that no person shall be entitled to vote in more than one electoral district. Mr. Lawson introduced a bill to incorporate the Riverview Canteen by Company.

Hon. Mr. McKeown introduced a bill to amend the terms of a will and personal estate in the St. John assessment. He explained that the principal object of the bill was to declare property held in trust for the benefit of the city of St. John and to amend the terms of a will and personal estate in the St. John assessment.

Hon. Mr. McKeown presented the petition of the Young Men's Christian Association at St. John for the passing of a bill to amend their act of incorporation. To Re-require Settlement Lands. Mr. Lawson gave notice of motion, for Monday, that no person shall be entitled to vote in more than one electoral district.

Hardware Bargain. Having recently purchased a large bankrupt hardware, consisting of SHELF HARDWARE, CHURNS, HAY AND MANURE FORKS, BUILDERS' HARDWARE, ETC. I can offer some good bargains in same.

A. M. ROWAN, 331 Main St., N. B. ROMANTIC TALE. Husband Returns An Old Man and Shock of Meeting Wife Ends In Death.

Detroit, Mich., March 19.—A special to the Free Press from Grand Rapids, says: Within the past ten days in the beautiful country home of Charles P. Lambert, a prominent business man, a sad and startling drama has been enacted.

It had been generally accepted for the past quarter of a century that Mrs. Lambert, the aged mother of Charles Lambert, was a widow. Recently she was stricken with paralysis and about two weeks ago called for her husband, asking to see him for but a few minutes. All attempts to soothe her were in vain.

One week ago an aged stranger drove to the house and asked Miss Clara Lambert, who is the constant companion of her invalid mother, if he might see Mrs. Lambert. He was told that she was too ill to see him. It then transpired that the visitor was the husband for whom Mrs. Lambert had been calling and the father of Charles and Clara Lambert.

He was taken into the house and permitted to see his wife. The recognition was instantaneous. But the excitement proved an unconscious condition and on Friday the Paryy sound line, the Intercontinental via the Ontario government railway to the north.

Mr. Campbell said that the promoters included in their scheme a proposition to build eight big steamers to run from the Great Lakes to the Gulf of Mexico, and on the line, and 11 steamers of 14-foot draft to run from the Gulf of Mexico to Montreal. He pointed out that only 13,000,000 bushels of western grain traffic went to Montreal last year, while 200,000,000 went to New York.

Mr. Campbell said that the promoters included in their scheme a proposition to build eight big steamers to run from the Great Lakes to the Gulf of Mexico, and on the line, and 11 steamers of 14-foot draft to run from the Gulf of Mexico to Montreal.
