

Stenography and Typewriting.

In consequence of the rapidly increasing demand for Stenography and Type-Writing in the complete equipment of students for commercial and professional life, provision has been made for adequate instruction in these subjects.

A Special Inducement.

Those wishing to graduate in different departments of Applied Science must take in connection with Mathematics, Science, etc., a course in Wood-work, Iron-work and Drawing. All this has hitherto been done at McGill University, or other higher Institutions at a cost of from \$350.00 to \$600.00 per year.

We are authorized to state that much of this necessary Manual work can be taken at our Manual Training Department along with the necessary Mathematics and other studies in our Academy and College.

The Student can do this at a cost of about \$160.00 a year and at the end of the Freshman year by taking a little extra Mathematical study he can be prepared to enter the second year of the Course in the Applied Science Department of McGill University.

This is a great advantage and claims the attention of both Academy and College Students, contemplating a course in Applied Science.

Graduating Exercises

MAY 31ST, 1898.

PROGRAMME.

Processional

THE MISSES SWIM.
PRAYER

Novolette.....Schumann

Miss Alicia Heales

ESSAY.....The Physical Basis of Character

Samuel J. Cann, Bradalbane, P. E. I.
