

RECEIPTS FOR DYEING.

General Instructions.

It is absolutely necessary that every article to be dyed, as well as every utensil to be used in dyeing, should be perfectly clean.

Every article to be dyed should be thoroughly scoured in soap and well rinsed out. In order to secure uniformity in colour, and to avoid spots on wool, yarn or fabrics, it is desirable that every article should be dipped in warm water, just before putting into the alum or other mordant.

In all cases **SOFT WATER** should be used if possible, and in quantity sufficient to cover the articles completely.

As soon as an article is dyed, it should be aired a little, then well rinsed out, and afterwards hung up to dry.

In putting dresses and shawls out to dry that have been dyed, they should be hung up by the edge, so as to dry evenly.

To Avoid Spots.

To remove and prevent spots when colouring black on silk or woollen, all that is necessary is to make a weak lye, and before it scalding hot, and put your goods in for fifteen minutes, or throw some ashes into your dye, and run your goods in for five minutes, and they will come out a jet black and even colour.

To Cleanse Wool.

Make a liquid of water, three parts; spirits ammonia, one part; heat it as hot as you can bear the hand in it; then put in the wool, a little at a time, so as not to have it crowded; let it remain in for fifteen minutes; take it out over a basket to drain, then rinse it in running water, and spread to dry; thus proceed in the same liquor; when it gets reduced, fill up in the same proportions, keeping it at hand heat all the time, not using any soap.

For Bleaching.

Take one gill muriatic acid and one gallon soft water; soak the wool or cloth for fifteen minutes, and rinse well in pure water.

To Dye Black.

On wool, silk or cotton. For every lb. of cloth or yarn, it will require one oz. of the extract of logwood, and half an oz. of blue vitriol. Prepare an iron kettle with a sufficient quantity of soft water to prevent the cloth or yarn from being crowded, bring the water to a scalding heat, then put in the yarn or cloth, and when thoroughly wet take it out and let it drain; then add the blue vitriol, and when dissolved and the water carefully skimmed, put in the material to be coloured, and let it remain half an hour at a scalding heat, airing it occasionally, then take it out and rinse it in soft water; empty the vitriol water into another vessel, and dissolve the extract of logwood in a sufficient quantity of water brought to a scalding heat and skimmed; put in the cloth keeping the dye at the same temperature, and let it remain half an hour, airing it frequently; then take it out and drain it, and add the vitriol water to the dye, put it in again, and let it remain fifteen minutes, airing it as before; cleanse it in soft water and let it drain and dry.

Bright Pink.

Two ozs. of cochineal, $\frac{1}{2}$ oz. cream of tartar; steep the cochineal in warm water sufficient to cover the cloth for two hours, or until the strength is entirely extracted, and add the cream of tartar; then wet the cloth in clean water, wring it out and put it in the dye; bring it to a scalding heat; let it remain a few moments and it will be finished. This will colour 3 lbs. If a light colour is wanted, use less cochineal, if a darker, more; the shade depends upon the quality of the cochineal used.

VICTORIA

COMPOUND SYRUP OF

HYPOPHOSPHITES

FOR THE PREVENTION AND CURE OF

Consumption, Diseases of the Chest, Defective Nutrition, General Debility, and all Nervous Complaints.

The **HYPOPHOSPHITES**, being the **SPECIFIC REMEDY** for Consumption, when once developed, are equally and **ABSOLUTELY A PREVENTATIVE** in cases of pre-disposition, from any cause; as easy to employ as tea, coffee, sugar or salt in the kitchen. So certain are its results that in no case among children or adults, where hereditary predisposition has existed, *has the disease ever developed itself* when the Remedy has been used; while it exerts a manifest influence in *quicken[ing] the growth of infants and young children*; possessing, in these respects, **A POWER IN THE ECONOMY UNEQUALLED BY ANY AGENT KNOWN TO MEDICAL SCIENCE.**

By their use as an *occasional stimulant to the vital forces*, the **HYPOPHOSPHITES** are a **CERTAIN MEANS** of maintaining the health and strength of the labouring classes, students, clergymen, fragile children, women during the periods of pregnancy and nursing, and of all persons of sedentary habits, or those who, either from excessive labour of body or brain, are called upon for a greater expenditure of **NERVOUS OR VITAL FORCE** than is or can be supplied through the normal channels of recuperation.

"I know," says **Dr. CHURCHILL**, "that the **HYPOPHOSPHITES** will prove not only as **SURE A REMEDY IN CONSUMPTION** as Quinine is in *Intermittent Fever*, but as **EFFECTUAL A PRESERVATIVE** as Vaccination in *Small Pox*."

EFFECTS OF THE TREATMENT.

On the Nervous System.—One of the first effects is an **INCREASE** of the **NERVOUS OR VITAL ENERGY**, followed by a feeling of unusual comfort and strength. This is more marked and earlier manifested in proportion to the degree of weakness and *nervous debility* previously existing.

The nervousness, or irritability, is allayed; the patient experiences a pleasant calm; and the sleep becomes profound and refreshing.

On the Blood System.—The effect upon the Blood System is equally marked. The quantity and colour are rapidly increased; the countenance becomes fuller and fresher, the lips red and the eyes brighter; the superficial veins are swelled out, and according to the doses employed and the duration of the treatment, the patient shows striking evidence of the **PLETHORA** or fullness of blood.

On the Nutritive Function.—The appetite is increased often in an extraordinary manner; the patient gains flesh, and the features, especially after the first two or three weeks, show a marked improvement in appearance. The remedy acts beneficially in all cases of impaired nutrition.

N.B.—This is the only Compound Syrup of Hypophosphites prepared from the formula of the original discoverer, and certified to be **Chemically Pure**.

Be sure, therefore, to use only the **Victoria Syrup of Hypophosphites**. The **GENUINE** has the Trade Mark—the **Queen's Head**—printed on the wrapper. **FRIDAY ONE DOLLAR** per bottle. Sold by all the principal Druggists in the Dominion.
