Calculating it by the Inch

Corporations have no souls to vice, and it is generally thought to be no sin to make large levies on their long purses. The late accident on the Grand Trunk, by which a Mrs. Humphreys, of St. Marys, unfortu nately lost a portion of her leg, is a case point. Without admitting their liability the Grand Trunk Railway, through thei Stratford solicitor, endeavored one day late ly to ascertain the amount claimed. solicitor met the husband of the injured wo man at St. Marys, but had considerable dif ficulty in getting out of him what he want ed. After two hours' talk, the man we house to consult his wife, and returning, beat about the bush for another hour, when he came to the point by preferring the modest demand for \$10,000! The principle or which he had calculated the amount of short time ago at L'Orignal, a woman me

Mining Intelligence.

There is an extraordinary excitement created just now out on the Moes and Salmon rivers, in the township of Ascot. No less than five different parties or companies have been lately buying up all the claims on these discovered in small particles in very many places on the above rivers, and in the creeks running into them. Very high authority has advised the purchase of claims on the has advised the purchase of claims on the ing home, about 8 o'clock, and was nearly which the donor received the warmest has advised the purchase of claims on the rivers in Ascot in preference to the Chaudiere, considering that they will at least equal that place if not surpass it. Copper has also been found in one or two places on the donor received the warmest thanks of the Society.

pound of the white transparent glue, costing twenty-five cents. The sixteen pounds of Paris White is about as much as a person will use in a day. It is prepared as follows:
The glue is covered with cold water at night and in the morning is carefully heated with-out scorehing, until dissolved. The Paris White is stirred in with hot water enough to give it the proper milky consistency for the proper milks and tried to the morning, performed his ablustors as at to give it the proper milky consistency for applying to the walls, and the dissolved gue is then added and thoroughty mixed. It is then applied with a brush like the common lime whitewash. Except on very dark and smoky walls, and ceilings, a single coat is sufficient. It is nearly equal in brilliancy to 'zine white,' a far more expensive article.

graphers. The lens magnifies the object the bowl was brought, dashed it upon the nearest to it, more than those more distant. Thus the hands, feet, nose, etc., are out of proportion compared with the eyes and face Colonel Wortly, who has been lecturing on the subject, recommends the plan of taking the head and shoulders only of the size of a shilling, and carefully vignetting it, with always a plain background.

the bowl was brought, dashed it upon the floor, breaking it in a thousand pieces. His irate spouse declared he was a brute. The husband coolly locked the chamber door, and informed his wife that he expected her to make use of the wash-bowl upon the stand in the room. She declared she would do no such a thing "if she went dirty-faced for a week." A matrimonal storm ensued, which
