

The Agent should certify that the Account is correct and that the services were rendered by his order. In this Account a visit and prescription to one Ward are charged for at the same rate (\$2.00). Is Ward an Indian? And why does the Doctor make the same charge for a visit as for a prescription?

N. 4041. It is observed that a figure "9" on this Voucher has been altered to "4", by the correct figure being written over it in red ink.

The Department has several times requested that this practice should be discontinued.
