

Evaporation of honey—

ings by them, read at January Brant Convention, and
ans on account, which will be found on pages 63 and 64,
got up by the C.B.J., February number, states that "if
e objection to any bee-keeper will place a colony of
l to teach the bees on scales and observe closely, he
y this means, will see that when the bees are gather-
am not origi- ing five pounds a day they will shrink
the inspectors one pound at night through evaporation.
od 'comb with Mr. Anguish has got it nearly right un-
Marys told me der certain conditions, but not under
y had a piece others. I tested two swarms of bees
en at his place some years ago, one hived on comb founda-
pleased to res- tion, the other on full-drawn comb.
rood this party It was only a one-day test, so would not
are quite clear perhaps be so correct as if a more ex-
n the midst of tended test had been made, but it taught
party referred enough to convince me that a better class
of honey will be produced where bees
as can the best have to build their comb as the honey is
question which stored, rather than by giving them full-
of us so much drawn combs. The colony (or swarm
ce the largest
h, in his paper
Honey Flow,

rather) that was hived on foundation gathered $9\frac{1}{2}$ lbs. during the day and evaporated $1\frac{1}{2}$ lbs. over night, whilst the one on full-drawn combs gathered 16 lbs. and only evaporated one pound in the same time that the others evaporated $1\frac{1}{2}$ lbs. from about two-thirds the amount of nectar, whereas they should have dropped fully 3 lbs. according to Mr. Anguish's estimate. My convictions, therefore, are that to obtain the very best class of honey we must either have the bees commence with comb foundation or else break down all the cell walls of full-drawn comb, let the bees build as they store and "leave all honey on the bees until the end of the season," as friend Anguish advises, and we will have a toothsome article.

You Can Heal Your Lungs At Home

DON'T give up hope.

Don't go away from home to die.
Don't ruin your stomach with useless "dope" and patent medicines.

Your lungs will heal themselves—as readily as a cut on your finger heals—if you give them a chance!

What they need is more oxygen—more pure air—and Lung Food to help destroy the most malignant germs of the disease.

All competent physicians today recognize that God's pure air is the first and last requisite in the treatment of all diseases of the lungs.

Our method of treatment—which has been successful in hundreds and thousands of cases—discards drugs, and invigorates and develops every cell of the lungs, and at the same time destroys the germs of disease in the affected cells by the aid of Lung Food, and allows Nature to heal them. Our LUNG BATH carries life-giving oxygen to every cell of your lungs, and increases your lung capacity from the first day of its use. Prominent physicians endorse the Lung Bath as the only rational method of combating the Great White Plague.

LUNG BATH MFG. CO., "Suite 131," 23 Scott St., TORONTO, ONT.

When writing, mention CANADIAN BEE JOURNAL

WE want every consumptive, and every person with tendencies toward consumption, to try the LUNG BATH.

At the worst it can do you no harm, and it may save your life.

It has never failed in a single case in which the patient had vitality sufficient to keep him alive for 90 days. Further than this—it has enabled over 90% of these same people who had vitality to live for only 30 days to cure themselves at home. If you can live a month, you have 9 chances out of 10 of getting well. These are results—not theory.

Is that record not worthy your investigation? Is a treatment with such a record not worthy a trial?

We will meet you more than halfway, for, though the treatment is inexpensive—we will guarantee improvement from the first (in the first 30 days), or refund your money.

You do not incur the slightest expense unless you and your friends see benefit and improvement. Your physician, if he is familiar with modern practice in the treatment of pulmonary tuberculosis, will endorse the Lung Bath and its use.

Remember it is not a medicine, but a natural method of invigorating and developing the lungs.

WILL YOU TRY IT?

You!
