LIFT YOUR CORNS OFF WITH FINGERS

Tells How to Loosen a Tender Corn or Callus So It Lifts Out Without Pain.

A noted Cincinnati chemist discovered a new ether compound and called it Frezone, and it now can be had in tiny bottles as here shown for a few cents from any drug store.

You simply apply a few drops of Frezone upon a tender corn or painful callus and instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can just lift it off with the fingers.

No pain, not a bit of soreness, either when applying Frezone or afterwards, and it doesn't even irritate the skin.

Hard corns, soft corns, or corns between the toes, also toughened calluses, just shrivel up and lift off so easy. It is wonderful! Seems magical. It works like a charm. Your druggist has Frezone. Ask him!

Gossip.

Farnham Oxford Downs.

Our live-stock advertising columns contain the advertisement of Henry Arkell and Son who for 40 years have used "The Advocate" to place their sheep before the breeders. The flock was established through selections from the best flocks in England, the initial importations being made in 1881. Such a record as this is sure to inspire confidence on the part of buyers. Of late years Messrs. Arkell have quit the show-ring and have made a speciality of breeding animals, paying particular attention to flock headers. Farnham Oxford Downs have made good all over Canada and the United States, and this explains the success of the flock, the beginning of which dates back almost half a century. For information regarding this year's offering see the advertisement and write to Mr. Arkell for full particulars.

Pettit's Shorthorn Importation Arrives.

Shorthorn breeders and importers throughout United States and Canada have not in the past two years found it a very easy task to get sufficient cattle in Britain to, in many cases, even replenish their own herds let alone supply an animal or two at odd times to their very oldest customers. Contrary to expectations, early in 1916 when the war began to promise two, three or four more years' duration, prices for all breeding cattle in England seemed directly to start climbing to find a new high level, with the result that we on this side of the Atlantic, not willing to pay the enormous advance in prices, have missed the more regular importation of former years. Great as these difficulties have been however, they have not stood in the way of the annual importations of the firm of J. A. & H. M. Pettit of Freeman, Ont. Early in the season of 1916 their importation of upwards of 60 head was on hand as usual, and now again their stables are once more filled with their 1917 allotments. They were sized up by a representative of this paper as "a uniformly good lot", thirty-six females and two young bulls. The bulls, which are 17 and 18-month calves, respectively, have not shipped well. The former is an Emmeline, by the Duthie bull, Royal Knight, while the latter on the dam's side is a straight bred Lancaster, got by Golden Clipper; both bulls are entitled to a little more fitting. The females, however, have shipped exceptionally well. With the exceptions of one four-year-old Claret cow, and two yearling heifers, all are two-year heifers, and all safely bred before going on the boat. Seventy-five per cent. of the importation are roans with the balance whites and reds, red predominating. One might add that there is not a badly colored heifer in the lot, but it is far more important to say that there is not a bad heifer in the lot. Every heifer is well grown, the majority have both scale and character, and then comes breeding which always has been the Pettit firm's "long suit". Every pedigree attached has a Duthie, Anderson, Marr or Bruce-bred sire right at the top. The Bruce Mayflowers are all direct from Heatherwick and are bred to the great bulls in service, Proud Star, Proud Chief and Golden Primrose. The Lancasters are bred to Collynie Silver Crest, a Roan-Lady Duthie-bred bull; the Roan Ladys to Bapton Prince Henry, a Deane Willis sire; the Missies to Burgie Underwood, and the Clarets to Collynie Ringleader. The latter are Duthie-bred bulls. The Rosebuds, Bessies, Rosewoods, Agustas, Secrets and Brawith Buds are the other families represented and having been selected from some of the best herds in Scotland they are bred to many of the best sires of the day. The offering surely affords breeders a chance of getting a choicely bred heifer carrying an imported calf that should in a short time reduce the first cost to a minimum. Messrs. Pettit report the following recent sales, to Canadian breeders: to Cecil Philys, Janetville, Ont., a Marr Flora cow with a heifer calf at foot, also a Kilblean Beauty heifer; to Patrick Maloney, a 10-months roan imported Broadhooks calf by Prince Clarion; to Frank Brown, Dundas, a roan 10-months Rosewood calf. Archie Pilkey, Wexford, Ont., got a 9-months imported Princess Royal calf, and Samuel Lyons & Son, Dunville, a two-year-old Missie bull.

Weigh this Yourself

The Average Yearly Revenue from all field crops of each Farmer:

Eastern Canada, \$490
Western Canada, \$1000

Why not double your earning power by taking up a Free Homestead in Western Canada along the lines of the Canadian Northern Railway? Low Homeseekers' Fares are in effect, once a week, till October 31st, from Eastern points.

For full particulars and any of our descriptive booklets, "The Homeseekers and Settlers Guide," "Peace River Guide," or "British Columbia Settlers Guide," apply to Gen. Pas'gr Dept., Montreal, Que., Toronto, Ont., or Winnipeg Man.

CANADIAN NORTHERN RAILWAY

Our No. 4 All-Steel Self-Dumping Rake

will give absolute satisfaction under any and all conditions. The wheels are solid, strong, interchangeable. The rake teeth are made of finest steel, oil tempered, elastic. The points of the teeth run parallel with the ground, and are so curved and adjusted that they gather up every bit of hay without digging into the ground or stirring up grit and dust. The self-dumping device operates from either wheel and is adjustable for use in either heavy or light hay, also adjustable for fast or slow driving. Our New Rake is made in 8, 9 and 10 ft. sizes, for either one or two horses. Write for free descriptive folder.
