

A TEST EXPERIMENT.

Peculiar Power Possessed by a New Medicine.

Of new discoveries there is no end, but one of the most recent, most remarkable and one which will prove invaluable to thousands of people, is a discovery which it is believed will take the place of all other remedies for the cure of those common and obstinate diseases, dyspepsia and stomach troubles. This discovery is not a loudly-advertised, secret patent medicine, but is a scientific combination of wholesome, perfectly harmless vegetable essences, fruit salts, pure pepsin and bismuth.

These remedies are combined in lozenge form, pleasant to take, and will preserve their food qualities indefinitely, whereas all liquid medicines rapidly lose whatever good qualities they may have had as soon as uncorked and exposed to the air.

This preparation is called Stuart's Dyspepsia Tablets, and it is claimed that one of these Tablets of lozenges will digest from 800 to 3,000 times its own weight of meat, eggs and other wholesome food. And this claim has been proven by actual experiments in the following manner: A hard-boiled egg cut into small pieces was placed in a bottle containing warm water heated to ninety-eight degrees (or blood heat); one of these Tablets was then placed in the bottle and the proper temperature maintained for three hours and a half, at the end of which time the egg was as completely digested as it would have been in a healthy stomach. This experiment was undertaken to demonstrate that what it would do in the bottle it would also do in the stomach, hence its unquestionable value in the cure of dyspepsia and weak digestion. Very few people are free from some form of indigestion, but scarcely two will have the same symptoms. Some will suffer most from distress after eating, bloating from gas in the stomach and bowels, others have acid dyspepsia or heartburn, others palpitation or headaches, sleeplessness, pains in chest and under shoulder-blades, extreme nervousness as in nervous dyspepsia, but they all have the same cause—failure to properly digest what is eaten. The stomach must have rest and assistance, and Stuart's Dyspepsia Tablets give it both, by digesting the food for it and in a short time it is restored to its normal action and vigor. At the same time the Tablets are so harmless that a child can take them with benefit. This new preparation has already made many astonishing cures, as, for instance, the following:

"After using only one package of Stuart's Dyspepsia Tablets I have received such great and unexpected benefit that I wish to express my sincere gratitude. In fact, it has been six months since I took the package and I have not had one particle of distress or difficulty since. And all this in the face of the fact that the best doctors I consulted told me my case was chronic dyspepsia and absolutely incurable, as I had suffered twenty-five years. I distributed half a dozen packages among my friends here who are very anxious to try this remedy." Mrs. Sarah A. Skeel, Lynnville, Jasper Co., Mo.

Stuart's Dyspepsia Tablets are sold by druggists everywhere at 50 cents for full-sized packages. A little book on "Stomach Diseases" mailed free by addressing F. A. Stuart Co., Marshall, Mich.

GOSSIP.

The season is now approaching when the horse's feet and hoofs require particular attention. Hoofs become dry and contracted when exposed in adverse surroundings, and require some application to maintain them in natural condition. For this purpose, Dr. Stuart's Hoof Liniment is advertised in another column, by A. Workman & Co., Ottawa. For sale at dealers.

MR. THOMPSON'S SALE.

Unfortunately storms totally prevented the holding of Mr. Thompson's sale of pure-bred cattle and sheep, at Walkerton, on the 3rd inst. April 6th is now fixed for the date of the sale, when it is to be hoped the winter's storms will have been spent. Everything will positively be sold, as Mr. Thompson is giving up farming.

HACKNEY STUDBOOK.

The twenty-first volume of the Hackney Studbook has been received at our office through the courtesy of the Secretary, Frank F. Eusen, 12 Hanover Square, London W., England. The volume contains the records of stallions numbering from 8,845 to 8,712, and mares from 15,550 to 16,887. The entries for this volume closed on August 1st, 1903. In the book are records of transfers to Canadians of twenty-four stallions and two mares. The frontispiece illustration is that of Administrator 8047, champion stallion, London Show, 1903, and on another page is the halftone engraving of Bashful Kate, champion female of the same Show. The Hackney Society's membership now numbers 2028, of which 484 are life members.

POISONING POTATOES.

Mr. C. M. Richardson writes us: "A person's observation has been somewhat limited who has not observed that blight and rot were not confined last season to wet, improperly-drained land. At the Dominion Exhibition at Toronto last fall, the first-prize American Wonder potatoes, judged on Thursday, were every one rotten before the Exhibition closed, nine days after. Surely no one will ask us to believe this to be the effect of wet weather. Again, why was it that potatoes treated with Paris green rotted badly, while those just beside them, on similar soil, and of the same variety, which were not poisoned, did not rot? When a person selects rows of potatoes as nearly alike as he can, with every condition of soil and cultivation the same, treats one-half with Paris green, the best way they can, so no apparent injury is done to the tops, and the other half with a preparation containing no arsenic, and finds that the poisoned ones die ten days to three weeks before the others, and on harvesting the crop that there are one-third more potatoes of a larger size and better quality where the poison was not used, what other sensible conclusion can he arrive at than that the damage done to potatoes by poison is enormous. I am well aware that other causes than poison produce rot, but why add this to the list, when it costs from 30 to 60 bushel of potatoes per acre to do it, and injures the quality of every potato to which it is applied. Blight and rot cannot be cured, but may be prevented. Conditions that tend to produce it may be improved by careful methods of cultivation, as suggested by your correspondents; but why counteract the good that may be done in this way by poison? One of your correspondents states that his potatoes, in 1883, rotted "owing to the wet weather." He does not give any facts to show that his conclusions are correct. I do not wish to be understood to say that too much wet will not cause rot, but if he will think carefully over his crops and the seasons past, he may come to the same conclusions that others have come to, viz., that he has raised as good crops and as good quality as ever he raised in seasons with more rain than we had last year. He also wisely calls attention to good seed, which is of great importance, and I should like to emphasize all he has said on this point, and I believe he will try to practice what he preaches, to do which he should never use for seed tubers of poisoned plants, because they are not mature; nor should he use seed that have been grown by late planting, the tops of which were killed by the frost; they are not mature."

FIGURE IT OUT YOURSELF

It's true that a cream separator costs something, but if you get an Easy Running

Empire Cream Separator

it will pay for itself TWICE the first year. It will save you a hundred dollars worth of time; it will add at least a hundred dollars to your milk income. There is no other separator made that will do for you what the EMPIRE will do.

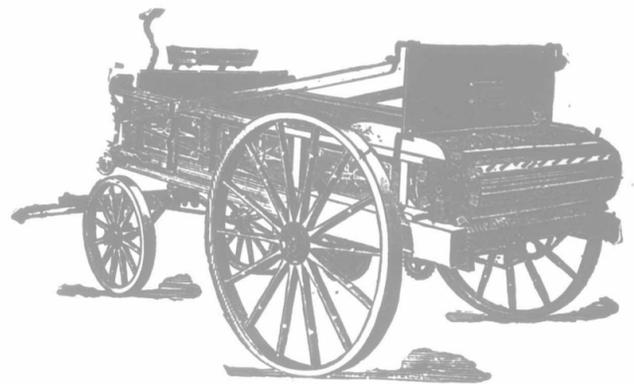

None other so simple in construction; so easy to turn; so easy to clean; so durable and so sure a skimmer. Send for our books and "figure it out for yourself."

Empire Cream Separator Company,

28-30 Wellington St., West, Toronto, Ontario.

Kemp's 20th Century Manure Spreader.

A CROP-MAKER and A LABOR-SAVER.

J. M. LeMoine, Director, Government Agricultural School, Compton Model Farm, Compton, Que., Aug. 19, 1903.

Dear Sir,—Some years ago I used two of the Kemp Manure Spreaders, which gave me the greatest satisfaction. I found the manure was well pulverized and evenly spread on the land. The result was an even crop. I have no hesitation in strongly recommending your Spreaders as one of the best labor-saving machines of the day. I consider that they are indispensable to good farming at present.

Yours truly, JOHN M. LEMOINE, Director.

Drop a postal card for our Booklet, entitled "Multiplying His Acres."

The KEMP MANURE SPREADER CO., Ltd., STRATFORD, ONT.

FOR SALE BY ALL LEADING JOBBERS.

CLIP YOUR HORSES

with 20th Century Clipper **ONLY \$7.50**

They feel better, look better, work better, and are less liable to catch cold. Don't let your horses stand in the barn all night with a heavy damp coat of hair on. It weakens them and they lose flesh. If clipped they dry out quickly, gain flesh and can be groomed in one fourth the time. Weighs only 15 lbs. Clip a horse in 30 minutes. Send for Catalogue to CHICAGO FLEXIBLE SHAFT CO., 110 La Salle Ave., CHICAGO, ILL.
