**Light Draft Deering Drills Sow Seed Evenly at the Right Depth**  
 PLANT wheat, rye, flax seed or any other small grain with the Deering Drill. Ten minutes after you are through with the small grain you can change to plant corn, peas, beans or other large seeds, with the same Deering. The Double Run Force Feed makes this possible—one run with large opening and one with a smaller opening. There are other Deering features. For example, the disk bearings on Deering Drills are practically dust proof. The oil comes in contact with the inner edge of the bearing surface first, oiling from the inside toward the outside. Instead of allowing dust or dirt to work in, the outward path of the oil and constant supply tend to force out any grit or dirt which may have worked into the bearing. Scrapers are easily moved away from disks. On the 13-disk drills, the feed is divided into the end of the field, saving seed. On special order, a complete Deering tillage line, including disk, spring scufflers, seeders and land rollers, merits your town, or, write to the nearest branch you desire.
