

**A SEARCHING INVESTIGATION WILL PROVE SUPERIORITY OF**

## IDEAL WOVEN WIRE FENCE

Investigate IDEAL fence. Do like the railways. Test the laterals for elasticity—the uprights for stiffness. Test both for smoothness and heaviness of galvanizing. Test the lock for gripping-tenacity. Put a roll on the scales and weigh it. The more searching your investigation the greater the triumph of IDEAL fence.

When finished, you will have indisputable evidence that IDEAL is the stiffest, strongest, heaviest, most rust-proof woven fence. If you are like the railways you will erect for permanency. That means an order for IDEAL fence. But first of all let us send you our free booklet, so you can see the different styles for hogs, cattle, etc.

**HAVE WE AN AGENT IN YOUR LOCALITY ?**

If not, there is a splendid chance for someone to increase his income. IDEAL fence is an easy seller. Its weight, quality and strength are appreciated by every man who is looking for a permanent fence investment.

## ROOFING

**" THIS IS THE ROOFING THAT NEEDS NO PAINTING "**

other layer of strong felt. That makes two roofs in one.

If the storms wore away the mineral surface and dug through the pitch and destroyed the felt, they would still be only half way through. And if the weather then removed the next sheet of pitch, you would still have left a final layer of felt—nothing more or less than an ordinary smooth surfaced roofing which could keep off the rain very nicely if painted every year or two.

But as a matter of fact, the weather never gets past that mineral surface securely gripped in its matrix of pitch. The mineral surface is there to stay. No painting—no bother—no further expenses after the roof is once laid.

We should be glad to send you a free sample of Amatite, and you can see for yourself how much better it is than the smooth surfaced kind.
