Generates 100-Horse Power-Other Notes

A meeting of the King Mining company, which is operating the famout Oro Denoro property in Summit camp, in the Boundary Creek country, was held at its office in the Burns block, in this city Thursday. Ross Thompson, the vice-president, was in the chair, and Angus MacNish acted in the chair, and Angus MacNish acted Fernie. as secretary.

as secretary.

The business transacted was the decision arrived at to purchase from James D. Sword, of the James Cooper Manufacturing company, a five-drill compressor, so that the property may be properly developed. ed. The plant is to consist of a large rizontal tubular boiler, hoisting engine, horizontal tubular boiler, hoisting engine, sinking pump and a five-drill compressor, with drills. This plant will be shipped immediately from Rossland, as the company from whom it was ordered have had the plant in stock here. It was thought that this plant should be in operation within a month from the time of shipment from this city.

This property, the management claims, romises to become a mine of considerable promises to become a mine of considerable importance. The surface showing is scarcely equalled, it is claimed by any property in the same stage of development in the Boundary Creek country. The ore is a chalco-pyrite, carrying fair values in sil-Boundary Creek country.. He lote is a chalco-pyrite, carrying fair values in sil-ver, and a little gold, the principal value being found in the copper. The ore is particularly amenable to concentration, having a soft gangue, and will be valuable to smelters requiring copper in a basic

The company intends to push the sinking of the shaft, which is now down 102 feet on to the 500-foot level, and there will be crosscutting and developing the veins at the usual levels. There is every reason to believe by the time the railroad reaches or a very short time thereafter, that the Oro Denoro will be in a position to ship

The Oro Denoro was originally bonded by Ross Thompson and John M. Burke, and the former is now the largest individual stockholder. It was finally purchased by Messrs. Thompson and Burke in 1895, and about six months since it was organized into a company. A large part of the stock was subscribed for in Montreal. The company has ample funds in the treasury to develop its property to the extent which its excellent surface showings warrant.

WORK ON THE DEER PARK.

The Ore Body Has Been Found in the 300-Foot Level.

Work is being pushed energetically on the Deer Park. When work was recently resumed on this property, a crosscut to resumed on this property, a crosscut towards the east was commenced from the bottom of the shaft on the 300-foot level. This crosscut was run through the country rock for a distance of 17 feet, and now the ledge has been met. The vein has just been broken into and is strongly mineralized. This the management regard as important, for the reason that it proves the ledge, which was found in the 150-foot level, to be continuous to a depth of 300 feet. The ledge will at once be crosscut, and when its width is ascertained it will be drifted upon. The ore found so far is simply the outside of the ledge, and so no assays have so far been made.

The Gladiator, Majestic and Jubilee mineral claims on Lookout mountain, have been acquired by a syndicate, which claims to possess ample funds for active and continuous development, crown granting, and the organization of a company to be styled the Gladiator Mining company, limited. Work will commence as soon as the weather will permit, under experienced management. As excellent assays have been obtained, \$11 in copper and gold from surface ore and \$23 at 20 feet denth. been obtained, \$11 in copper and gold from surface ore, and \$23 at 20 feet depth, and the locality generally has shown up well with development, good results are looked for. The syndicate will develop the claims to considerable depth before organizing the proposed company and placing treasury shares on the market.

## A Splendid Water Power.

On the No. 1 and Highlander, which are being operated by an eastern syndicate at Ainsworth, a four-drill Ingersoll-Sergeant plant is being installed. This plant is to be actuated by water power. The water has a head of 1,080 feet, which gives a hydraulic pressure of 440 pounds to the square inch at the water wheel. This is the highest head of water used to operate any mining plant in the Dominion. The water, though limited in quantity, develops in the neighborhood of 100-horse power. This power will be used to operate a mill and concentrator plant with and also to run the drills in the mine.

Opening Up Well.

K. K. Peyser, secretary of the Okanogan Free Gold Mines, Thursday received the following letter from Superintndent Edge-comb, who is in charge of the property: "I am pleased to say the mine is looking far better now than it ever did. The south vein in the open cut is opening up extremely well in sylvanite and free gold ore. Assays made went \$780 from a good sample. The fedge has since opened out to seven feet six inches, and is going down strong and rich. I am making preparations to make an exhaustive series of assays, and will also report on the property at an early date. at an early date.

For the Golden Crown.

A 60-horse power boiler, consigned to the Brandon & Golden Crown, was sent away yesterday. It is a portion of the plant, recently ordered by that company, and which it hopes to have in operation in a short time.

Placed in Montreal

William O. Magor has placed the City of Paris group, in the Similkameen country, with Montrael parties. The terms are withheld. There are two strong ledges on the properties in the group, the ore from which returns good assays.

The Gertrude and Coxey.

Superintendent Hugh C. Baker of the Gertrude and the Coxey properties, reports that both are being rapidly developed. In the Gertrude the 200-foot level has been reached and a station is being cut out preparatory to drifting, which will be commenced this week.

## Machinery Forwarded.

The machinery for the Oro Denoro property, operated by the King Mining company, was shipped from this city yesterday to the Boundary country. It consists of a five-drill compressor plant, hoist and pump. This plant was furnished by the James Cooper Manufacturing company. The Jenckes Machine company, through its agent, F. R. Mendenhall, has just sold an 80-horse power boiler to the Old Ironsides company in the Boundary country.

THE METHODIST CONFERENCE. A Paper Devoted to the Church's Inter

ests to Be Established. Rev. George H. Morden, pastor of the Methodist church, returned at midnight from Nanaimo, where he has been in attendance on the annual Methodist conference on the annual Methodist conference met on Thursday, the 18th. One of the most interesting features was the debate on the question of establishing a monthly paper devoted to the interests of the church. There was no opposition to the plan. The paper is to be published in Victoria, and is to be called the Methodist Recorder. John P. Hicks is to be editor. With regard to the ministers of this dispersion. With regard to the ministers of this district, there was only one change. Rev. R. Newton Powell was transferred from New Denver to Enderby, and will be succeeded by Rev. E. A. Roberts, from the Northwest Territories.

Additional ministers have been placed.

The reports from the several circuits and missions in British Columbia showed that Methodism is advancing rapidly and is generally prosperous.

## A BIG MINING DEAL

Grenville Mountain Property Bonded for \$60,000.

### BY A MAN FROM VANCOUVER

The Property has Two Parallel Leads of Free Milling Ore-Rich Assays From the Ores of the Zala M. in the Sheridan Camp and Other Notes.

J. B. Ferguson of Vancouver, yesterday secured a bond on the Cascade claim on secured a bond on the Cascade claim on Grenville mountain, from John Reagh, Steve Brailo and E. Terzick. The bond is for \$60,000 and the deal was negotiated through the firm of J. L. Parker & Co. Harold Girwood M. E., of the Columbia School of Mines, Cornwall, recently visit-vestigation and favorable report upon it. vestigation and favorable report upon it ed the Cascade and made a thorough in It is learned that it is Mr. Ferguson's intention to send another engineer at once to make an examination and further report. There are two parallel reefs run ning through the claim. The ore is of the free milling type. The average assay from the ore is over \$12 per ton in gold from the ore is over \$12 per ton in gold and the pay streak is three feet in width

Rich Ore From the Zala M.

The Zala M. Consolidated Mining Co., whose property is located at the Sheridan whose property is located at the Sheridan camp, seven miles from Republic, on the Colville Indian reservation, now has a shaft down for a distance of 150 feet, and has drilled north and south on the vein for a distance of 100 feet. Recently the company sent 3,600 pounds of ore to the Trail smelter for trial treatment. Richard Marsh of this city assayed three samples of this ore from the Zala M. with the following result:

the following result:
No 1 gave returns per ton as follows:
S326.80; 8 ounces in silver, worth .60, worth \$12; copper, 6 544.68 copper, 6 1-10 per worth \$21.96; total values, \$360.74. cent, worth \$21.90; total values, \$360.74. No 2 gave returns as follows: 335.44 ounces of silver, worth \$201.26; gold, 48, worth \$9.65; copper, 2 8-10 per cent, worth \$10.08; total values, \$220.44. 335.44

\$10.08; total values, \$220.44. No 3 sample gave returns per ton as follows: Silver, 364.24 ounces, worth \$182.54; gold, .30, worth \$6; copper, 2 1-10 per cent, worth \$7.56; total values, \$196.10.

A flower Service.

A flower service was held at St. George's church on Sunday afternoon last, at which there was a large attendance. The Rev. Rhodes of Nelson, officiated, to whom the Sunday school children presented a large and beautiful bunch of wild flowers. The service was a grand success. After the service was a sisted by D. N. Hammond, superintendent of the Sunday school, after which the children formed up in procession and marched to this there was found in another part of the property a few days since a vein of rich-looking white quartz. This vein is eight feet in width and, has been stripped for a distance of 50 feet. The intention is to sink on this ledge and determine if it carries ore of a pay grade. As soon as the rich chute is crosscut by the big tunnel it is thought pay ore will be found. Work is to be pushed, and the management expects to be shipping before the end of the year.

An Electric Coal Mining Plant.

George C. Hinton, of the firm of George C. Hinton & Co.,, of Victoria and Vancouver, is in the city and is stopping at the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vein of the property a few days since a vei

dragged along over the ties for some distance and then turned over on its side. Two men, who were on top at the time, managed to jump off on the safe side and so escaped injury. ## WITHOUT A RIVAL!

## Paine's Celery Compound as a Blood Purifier and Health Giver Ranks First in Every Civilized Land.

Professional men, members of parliament, bankers, business men, mechanics and our farmers, after happy results and experiences with Paine's Celery Compound emphatically assert the great medicine has no rival.

As a blood purifier, disease banisher and health giver it has won the admiration

As a blood purnier, disease banisher and health giver, it has won the admiration and praise of those in position and affluence, and people in humbler circumstances have largely added to its extended reputation

tion,

The vast army of sick and weakly people restored to health and vigor by Paine's Celery Compound have done more for the present world-wide sale of the great health-builder than all the press notices ever published.

Under such happy auspices, the proprietors of Paine's Celery Compound, with full and honest confidence, urge the use of this noblest and pest of medicines at this present season.

full and nonest confidence, and the state of this present season.

The work of purifying the blood, cleansing the system, regulating the nerves, is an imperative one, and should not be delayed a moment, if ailing people would have perfect health.

Men and women distressed by headache, nervousness, sleeplessness, dyspepsia, neuralgia, rheumatism and liver and kidney complaints, cannot afford to treat their toubles with indifference. Serious and fatal results follow delays. This is the time for the taking on of new strength and true vitality, and Paine's Celery Compound will never disappoint the sick and afflicted.

The old motto of Paine's Celery Compound "Makes sick people well," is as true today as it was years ago.

Colenel E. S. Topping, Trail, was a passenger on the noon train yesterday.
Mr. and Mrs. R. Dalby Morkill left for Halcyon Springs last evening.

### GOVERNMENT HOUSE BURNED PUMPS ARE AT WORK

Operations Have Been Resumed on the White Bear.

## CLOSED SINCE LAST FEBRUARY

Bunker Hill Group and Will Erect a Mill Thereon---The Copper King Has Been nded for \$50,000.

Work was yetserday resumed on the property of the White Bear company, on which operations have been shut down since the 1st of February. The entire workings are filled with water and the task of clearing them will doubtless occupy a week and perhaps 10 days. The intention of the management is to deepen the shaft, which is now down for a distance of 250 feet, to the 400-foot level. Crosscuts and drifts will be made at the different levels and the work will be push ed with energy. When work was last suspended the property, Mr. Cole says, was looking better than ever before and he feels confident that he will be able to he feels confident that he will be able to find pay ore bodies in a short time. The company has been reorganized and is in a good financial condition and will be able to carry on the work indefinitely. J. J. Warren, director of the company, is in the city for the purpose of seeing the operations on the property resumed.

Bought the Bunker Hill Group.

Messrs. J. J. Warren of Toronto, and Messrs. J. J. Warren of Toronto, and John Y. Cole of Rossland, have purchased from John R. Reavis, T. R. Newman and George D. Munk, the Bunker Hill group on Proctor mountain in the Pend d'Oreille river country. There are two claims in the group, the Bunker Hill and the Mormon Girl. There are 72 acres in the claims. The former owners have been being any the group for the past three the diams. The former owners have been working on the group for the past three years and have done considerable in the way of development. The principal work consists of a tunnel, which has been driven in for a distance of 320 feet. Two hundred feet of this is on the vein, which is five feet in width. For over 100 feet of this distance the ore goes \$9.35 to the ton in gold and silver. There are 10,000 tons of ore in sight and about 200 tons on the dump. There is ample water power and the intention is to erect a tramway will have to be built over a distance of 2,000 feet. It is thought the plant will cost between \$15,000 and \$20,000. A force of men will be dispatched to the Bunker Hill group at once for the purpose of recommencing operations on purpose of recommencing operations on the property. The price paid for the property is withheld, but is said to have

which is operating the Rio Grande, Shan pagne, Sandaulphin and Floral Float mineral claims, on Porcupine creek, two and a half miles from Nelson, is in the city on a visit Mr. Helm reports that good pryoress is being made in the tunnell that is being run to tap an ore chute which was discovered last summer. The tunnel is now in a distance of 104 feet and it is expected that the chute will be encountered in the next eight or 10 feet. In running this tunnel a ledge of 12 feet of concentrating ore was met. In addition to centrating ore was met. In addition this there was found in another part

school, after which the children formed up in procession and marched to the Sisters' hospital and presented the flowers to the sisters and patients.

Had to Jump.

At 7:30 on Sunday evening a freight car on the C. & W. jumped the track at the siding opposite the city. The car dragged along over the ties for some distance and then turned over on its side. Two men, who were on top at the time, managed to jump off on the safe side and so escaped injury. The contents of the car were unpacked without much damage,

A COMPLETE FOUNDRY NOW. Orders Given Yesterday for a First-class Plant for Rossland.

Plant for Rossland.

Cunliffe & Ablett, the proprietors of the Rossland Engineering works, have now decided definitely to add a foundry to their present plant. They have two lots adjoining the machine shops on the west that will be utilized for this purpose. The orders for the plant for the foundry were given yesterday and it is proposed to have an ample and complete establishment. The machine shops have now been running for some weeks and orders have been coming in steadily and even faster than the firm could handle them. The remainder of the machinery for the shops is expected every day, and when here the firm will be able to handle about all the work offered.

Capital Stock to Be Increased.

Capital Stock to Be Increased.

At the adjourned annual meeting of the Dardaneles company, held in Victoria last week, four-fifths of the total capitalizatino was represented. It was unanimously decided to authorize an increase of the capital by the issue of 500,000 new shares. The first issue of 200,000 at 12 cents was taken up at once. The manager reported striking high grade ore in the eighth and ninth levels, the find in the first named being further from the shaft than hitherto encountered. The total shipment for the past year was 125 tons. A report received from the mine last week gave an assay of ore in the ninth level as 239 ounces of silver and 58 per cent lead. The ore in the eighth gives 300 ounces of silver and 67 per cent lead. There is good ore on the opposite side of the shaft.

TWO YEARS ABED.

Eight Years of Rheumatic Torment-South American Rheumatic Cure Drives Out the Torment in a Day.

Mrs. John Cook of 287 Clinton street, Toronto, says: "For eight years I suffered as no one ever did with rheumatism. For two years I lay on my bed and could not so much as feed myself—I was so helpless. The torture was indescribable. I doctored and tried every remedy I could hear of but received no lasting benefit. I am grateful for the day when a lady friend recommended South American Rheumatic Cure. After three doses I was able to sit up in bed. I continued its use and today—look at me—I am as strong and active as ever in my life." Sold by Goodeve Bros.

DESTRUCTION OF THE BUILDING

WITH MOST OF ITS CONTENTS.

The Lieut.-Governor Had Only Just Time to Escape-Loss, \$25,000-Insurance,

The following letter was received Monday by Mayor Goodeve from Attorney residence of the lieutenant-governor, this morning, was the fourth that has occurred during Mr. McInnes' occupancy, all from the same cause, a defective flue. Attempts to remedy the defect have been made, but without success, the age of the chimneys, no doubt, causing many weak spots. The fire was discovered by the private secretary, who heard the crackling of the flames in the attic and telephoned for the brigade, but the old phoned for the brigade, but the old house burned like tinder and the firemen little. Lieutenant-Governor do McInnes had time only to get out with

the clothes he had on. "I do not think I have any more than I stand in," he said, "save my uniform, which I managed to throw out when the was first given. I have lost all my clothing and a great deal else besides. How much, I really could not give any in formation on that point. Some of the furniture was saved, quite a lot, thanks to the workers who helped to remove it to the workers who helped to remove it. Some of that in the bedrooms and the upper parts of the building, though, will be lost. Mrs. McInnes has lost considerable, besides her clothing, and other things she has, and jewels. As to what papers have been lost I can not say now. Some of the official papers have been lost and some were saved."

and some were saved. The amount of insurance is \$12,000, \$4, on the amount of insurance is \$12,000, \$75,000 of which is on the furniture. The value of the building and contents is placed roughly at \$25,000. The building destroyed was built in 1859 by G. H. Carey, the attorney-general at that time for the crown colony of British Columbia at a crown colony of British Columbia at a cost of \$36,000. It was first occupied as the government house by Lieutenant-Government house by Lieutenant-Governor Kennedy, who succeeded Sir James Douglas. He lived at the old Driard until the castle was completed. It was designed and built by Fred Walter Green. The ball room, the only saved portion of the building, was added to the main building by Governor Seymour in main building by Governor Seymour in the early sixties. The provincial execu-tive met this afternoon to consider the question of providing a residence for the lieutenant-governor, but no decision has yet been arrived at.

purpose of recommenced the property. The price paid for the property. The price paid for the property is withheld, but is said to have been a good-sized one. It is the intention of Messrs. Warren and Cole to form a company for the purpose of operating this property.

Work on the Rio Grande.

T. A. Helm, superintendent of the Rio Grande Gold & Silver Mining company, which is operating the Rio Grande, Champagne, Sandaulphin and Floral Float minpagne, Sandaulphin and Floral Float minp ited, of Rossland, capital \$1,000,000; Carpenter Creek Mines, limited, of Rossland, capital, \$75,000.

A DISFIGURED DOLLAR.

It Followed Leo H. Schmidt From Montana to British Columbia.

Leo H. Schmidt, who, runs a billiard hall in this city, has had an experience with a silver dollar that is rather odd. It is an American dollar of the mintage of 1880. Some coin mutilator punched out a cheek of the shaft in the dollar on the cheek of the goddess of liberty and this has raised a mound on the wing feathers and body of the bird of freedom on the opposite side of the coin. This dollar he took in several of the coin. This dollar he took in several years since in Argenta, Montana, when he was keeping a general merchandise store there. It took him three months to get rid of the coin. Time amost without number he passed it on residents of the town and those who lived outside of its limits. In a short time they would return and hand it back to him. Then he would pass it again and if he went to lunch advantage would be taken of his absence to pass the mutilated money on the man left in charge of the store. It was like the proverbial bad penny it returned so frequently. Finally he passed it on a man who was just starting out on a long journey. Then Mr. Schmidt felt sure he had got rid of the dollar for good. The other night Mr. Schmidt was counting up the day's receipts when lo and behold there was that disfigured dollar again. There are certain markings on the coin that are unmistakeable and Mr. Schmidt says as the money followed him into British Columbia he will not try to pass it on anyone, for the reason that it would give him endless trouble to be bothered by its constantly coming back to him, and so he will keep it for a pocket piece.

A High Explosive Factory.

A High Explosive Factory

A company is in process of formation in Rossland for the purpose of establishing a manufactory of high explosives of the same character as those now in use in England, which do not generate the deleterious gases which prove so troublesome in the mines at present. Those who have the matter in hand claim that they have the right to the process and are in a have the right to the process and are in a position to establish the works.

Trail's New Industry.

Trail has a new industry. A brick-making plant has been installed there by A. C. Luff and Richard Tunswell. The plant is in complete running order and is turning out 20,000 brick per day. There is so great a demand for the brick that the advisability of adding machinery sufficient to increase the plant to a capacity of 40,000 per day is being considered. 40,000 per day is being considered

Machinery for the B. A. C.

Yesterday a carload of machinery for the machine shops of the British America corporation arrived at the Red Mountain depot, and will be placed in position almost at once. The rest of the machinery ordered will be here shortly and then the machine shops will be in full working order directly after, and the money that has to be sent out of the city for necessary repairs will be saved.

Will Be Crown Granted.

J. D. Anderson, P. L. S., has gone to Ymir for the purpose of surveying the properties of the New Brunswick Mining company. There is considerable work done on these properties and the intention is to secure crown grants for them.

Albert Dyer, who has been sick for two months with pneumonia, is able to occasionally appear on the streets. He is still weak, but is in excellent spirits.

W. K. Esling of the Trail Creek News, was in the city last evning. He came up to attend the Masonic meeting.
