GRAND FORKS RACES.

Results of the Consolation Events-The Last Day.

GRAND FORKS, B. C., July 3 .- The

GREAT LEAD MINES John C. Drewry has returned to the by actual operating tests extending over city after a lengthy trip through the several months, of slightly over 100 East Kootenay country inspecting var- tons of concentrates per diem, so that

ious mining propositions with which it is an important factor in the lead he is identified. Mr. Drewry is enthusiastic over the prospects for the development of a great mineral industry Marysville, where the work on the Sulthrough East Kootenay, and particu- livan smelter is under way, although larly with regard to the St. Mary's building operations are suspended, tem-

river country, a district of which com- porarily the management says. Following the St. Mary's river, Mr. paratively little has been heard and which is not likely to come to the front Drewry went to the Great Dane prountil transportation facilities by rail perty, an exceedingly promising silverare provided. Fortunately indications lead proposition acquired by the manseem to point to a likelihood of the Can- aging director of the Canadian Gold adian Pacific building up the valley of Fields Syndicate and his associates last

summer. Since August, 1901, Mr. Drewry has had a crew of men steadily at As managing director of the Canadian work on the Great Dane and he states. Gold Fields Syndicate holding a heavy that sufficient progress has been made block of shares in the St. Eugene mine, in development to enable him to state Mr. Drewry naturally took advantage without qualification that in the Great of his visit to East Kootenay to spend Dane he has a mine. The showing is several days at Moyle and go over immense and the ore averages 26 ounc the workings of the property, which is of silver and 70 per cent lead, making in several respects the biggest lead a desirable concentrating ore, or one mine in America. He states that the de- that could be shipped to good advanvelopment work in the lower levels tage were lead prices more favorable of the mine as mapped out several to the miner. The main ledge of the months since when shipments were suspended, is being carried ahead stead-ily with a force of 25 men. It will be remembered that one of the features of which great things are expected, of this new development work was the From the outcrop of this second lead sinking of a shaft on the Lake Shore a shaft was sunk for 15 feet to deterground within a comparatively short mine the dip of the vein prior to cross-distance of the bank of Moyle lake. On cutting at depth, and in this short space the start there was a doubt as to the ended on this score, and the sinking reach the point where the lead show was carried ahead without the slight- be tapped. Work is to be continued all

summer on the Great Dane. Although exclusively in the development stage as yet, the St. Mary's river which is the 1925 foot level of the mine.

The results attained by the work at this point are described by Mr. Drewry including both forks, is dotted with the camps of prospectors who are doing agement. Development is also being the annual assessments on their holdpushed on St. Eugene ground—the up- ings. When the country is properly opened up it is certain to go ahead rap-

compressor plant two new Babcock & idly,
Wilcox boilers of 150 horsepower each The question of railroad facilities is are being installed to expedite working the vexed problem in connection with operations when shipping is resumed. In every direction the management of the St. Eugene is taking steps to handle the mine with every facility when it is determined to commence stoping ore. This juncture is no nearer, however, and act as a feeder for the entire counthan it was several months ago. At try, but the railroad has not as yet that time the company asserted that stated when the branch will be pr no ore could be sent out until the price ceeded with, although the Canadian of lead reached £13; the quotations Pacific's bone fides in the matter is now are slightly above the £11 mark, demonstrated by the fact that last year now are slightly above the E11 mark, demonstrated by the fact that last year so that quotations will require to be enhanced substantially to tempt the St. Eugene people into mining their product. Without having any definite basis upon which to base the forecast, there appears to be a general feeling that appears to be a general feeling that mer to the summit, and an announ an improvement in respect to silver-ment as to the company's intentions lead prices may be expected in the com-paratively near future. The St. Eugene looked for in the course of the next concentrator has a capacity, as proved few weeks.
