These Premiums are exclusive of the usual Compensation.

Complaints, &c., may be sent to the Editors, June 10, 1860.

THE COURIER.

SATURDAY, JULY 20, 1860.

Whence Mayat.

The crowded audiences that have assembled the last few nights at this Establishment, prove that the Raval have made a decided hit, and that the good people of Montreal, so much raffled at their want of taste, by some individuals, can appreciate good talent, when brought before them.

The performances of the Raval are both attractive and amusing, but of such a character, that they cannot fail in being popular to both young and old.

On Tuesday evening, all three of new members from the Theatre, had a rich treat, both of the art and the intellect. A very beautiful girl, entitled Diane, or Love and Jealousy, was entered. The principal dancer being Madeline, Melle-Bertin, in the character of Diane, excelled her former performances, and will not be short of fame Montpensier. The pretty Mademoiselle Letmaine also proved herself a first-rate artist, and obtained a following of the most exacting audience. M. Brillant was to no consider equal to M. Montpensier, but nevertheless he is a talented and excellent dancer. We were gratified to find, during this season of Gratuities, how hard for these charming artists, and troupe, we shall not have to search the world over, for a house which was bestowed upon Montpensier.

Montpensier's performances on the right side of Madame Margaretti, Leon Lortillot, and the Raval family, we have never seen surpassed anywhere, and but seldom equalled. The last piece, "Joys, or the Brazilian Alps," a pastime, threw the delighted audience into fits of laughter, as to render us perfectly nervous. M. Margaretti, as the Alpine, enacted the character to life. Indeed, it would be hard to find one of the performers of this Company, with whom it would be possible to find fault.

In a future number we shall give a more extended note.

The President of the Rome and Cape Vincent Railroad Company, under date of the 15th instant, thus writes to a gentleman in Kingston—

"I have just returned from New York, and am happy to inform you that our funds have been more than doubled; that we will incur a vigorous prosecution of the work on the whole line of our Road, provided our Stockholders do their duty. We expect to commence laying the track next Spring at Cape Vincent; and in the mean time, will be engaged in the building of stations, and making roads, &c., &c."

"Would not your business pay for cutting a Canal across the Island?"

—
CANADIAN AFFAIRS.

(FROM OUR OWN CORRESPONDENT.)

Montreal, July 17, 1860.

The University Commission, which has been sitting two years, is about to have its labours brought to a premature close. After today, it will cease to be a secret, that the Council of the University has passed a statute for transferring the duties of the Commission to a Committee Board, created by the Statute of last Session. The effect of this move will be to prevent the Commission from continuing during the present Session; which it otherwise would be able to do, greater part of the investigation having been got through.

The appointment of the Commission, by whom it was instance of the Government, the latter body deeply displeased by the conduct of Professors, Lecturers, and the rest of the Ecclesiastical gentry, who believed that there was something mysterious, quite beyond the understanding of common mortals, in this talismanic number—although it passes our knowledge to know why his particular suit should be thought more befitting with the fitness of things than any other.

But we have to pay it; that's the rub; and we shall continue to have to pay it until we can contrive to procure a set of representatives, who will be more thoughtful for the interests of their constituents, and less anxious to please the Brammingtonian majority, and the individuals who hold office, not very sincerely in accordance with the will of the people, who are heavily taxed, of them, and by virtue of a thoroughly corrupt and unscrupulous minority.

For what in a large salary catered by paid to the Representative of the Seven, to enable him to keep up a style considered suitable to his high position. Well, but it does not cost us three thousand of the 'em, and seven four, if it manifest, that not more than the three is required.

Whereas the people, not blessed with a superabundance, are compelled to pay more.

A few men in this Colony are in the enjoyment of incomes, much too sufficient for the wants of themselves and families; few can save money from their incomes; yet they should be taxed to enable a Governor to save it. Why is this country to be taxed, and specially to pay off the mortgages on the estates of a noisy political adventurer, for Lord Elgin is nothing more?

The Globe tells us that the reduction of this very despicable man's salary could only amount to a "half penny per head according to the population." This may be so, but if this inference per head amounts to some thousands, who not used to a hereditary property? We wish Bellenden, Schomberg, and a hundred other public improvements and developments; but a sum of £2000 a year would pay the interest of money enough to construct a permanent public work, or provide half a dozen Normal or Agricultural Schools. Individually we are not highly taxed, but that is no reason why the taxes, should not be applied to a dozen, greater, than paying of mortgages outside in Scotland.

The thing to seek is—what value for our money, and we don't think that any one, who has ever seen the "thing" they call a Governor, or knows the history of his career in this country, will answer that question in the affirmative. What the electors have to consider is, that the thing paid for costs more than it is worth, and shrewdly whether they had better keep their money in their own pockets.

The inquiry into this grievance, and the first step towards getting rid of it, has been hurried for the present by the intrigues of the Government, and the vice corruption of the Legislature; but it will be a question for the battalions, and now, in other intolerable grievances, to kept aware, that people until that ominous time comes. We shall then see whether a pause, Scotch, Lord, will be permitted longer to ponder on, and whether he will be abettor in doing so by a set of the most profligate and unprincipled political brutes that ever existed.

The Board of Government:

We received information yesterday, on which we may rely, to the effect, that all parties in Canada West will unite, if possible, to prevent the removal of the Seat of Government from Quebec.

The probable consequence of this will be a compromise, and its result to agree,

that the Government, &c., &c.

The Globe adds,

A despatch from Washington, dated July 17th, says, that the Navy Department has received information from Cuba, promising a happy and immediate termination of all the difficulties growing out of the former expedition.

The "Wrecker,"

Montreal, July 17, 1860.

An American paper hints that a large portion of the rock of the Falls is in existence, which indicates that it will soon follow the example of Table rock.

The "Wrecker,"

Montreal, July 17, 1860.

We regret to learn from the New York papers that this fine steamer has been abandoned and left to go to pieces on the rocks, it having been found impossible to leave her off.

The Duchess of Montpensier has been created an infant of Spain, with all the honours due to the rank.

one of the students of the University of the Dominion, who shall be voluntary. The students of this part of the Bill have postponed.

Some uninteresting discussion took place on the Grammar School Bill for Upper Canada; of which the second reading was postponed.

The House went into Committee, the Auditor General, Mr. C. F. T. St. George, agreed to accept the amendment proposed by Mr. Johnston on Friday night, defining "persons property," and limiting it to the unrepresented areas; & sent the substance of the amendment on Saturday.
