****************** PARADISE FOR THE ANGLER. ********

(Chicago Chronicle.) For the devotees of rod and gun the Georgian bay district holds out unlimit. ed attractions. Fish are plentiful in the bays and inlets throughout this wast ex-panse of water and the rivers and streams which empty into the water way teem with several varieties of the mo my of the finny tribe, among them ing black bass, pickerel, muskcllunge, Deing black bass, pickerel, muskellunge, whitefish, speckled trout, lake trout and salmon trout. Many of the smaller stretches of water, including the iakes inland a few miles from several points on the steamer's route, are well stocked and, to the angler who wishes to rough it canital sport is assured. For the humit capital sport is assured. For the hun-ter during the open seasons deer, bear, muskrat, duck, partridge, geese and pig-eon are found in abundance, and the region throughout may be called the rich-est game land on the continent. From Slide Bay, near Sans Souci, the hunter or angler can reach the Muskoka lakes

or angler can reach the Muskoka lakes with ease by covering sixteen lakes with several portages, the longest of which is one mile, the others ranging from ten to 100 yards. The word "Temagami' is derived from the Indian word "temagagmingue," and means "deep water," and is applied to a magnificent territory in New Ontario that embraces all the attractions that are sought after by the canceist fourist. are sought after by the canceist, tourist angler and hunter. It is, comparative ly speaking a region known only to a few who have been fortunate end traverse the district under adverse cir-cumstances, owing to the difficulty ex-perienced in reaching its confines. This, however, has been overcome by the building of a new railway through the heart of this grand through the heart of this grand territory, opening up the way for the summer visitors who are looking for new fields to explore and to the lover of nature and outdoor recreation.

Without a personal visit to "Tema. gami" no one has any idea of the am-ount of pleasure that is expressed in this one word and versatile language is not subtle enough to impart an adequate description of its natural beauties and the story of its fourteen hundred odd islands in Lake Temagami, the principal lake of the district, and its thousand and one smaller lakes within a comparatively small area, holding forth unlimited attractions to the canoeist and lover of rod and gun. The Temagami region is a forest reserve under control of the Un-tario Government and covers an area of 1,400,000 acres. It is a land of lakes and rivers, incomparable in natural beauty, and scenery, with its heavily wooded forests, its cathedral pines, whispering

health and strange sweet music. This region is a part of Canada that a few years ago was visited only by the Indians and the Hudson Bay Company's war cances, and which to-day is visited by dozens of college students and others who have heard of its attractions, though it is still the same untouched and unin-habited wilderness, with the addition that all the necessary accessories are at hand in the locality to make a trip of any length with comfort. This form of vacation is typically Canadian. No other civilized country has a great north-woods, combined with lakes and rivers, where the lover of nature can study her unadorned loveliness in all its grandeur The shores of the mainland around the lakes are high and rocky and thickly wooded, while the islands in the larger wooded, while the islands in the large lakes are covered wiht dense foliage to the water's edge. Of the two principle bodies of water Lake Tamagami is the largest and covers an area of about 100 square miles, with a shore line of nearly square miles, with a shore line of nearly 3,000 miles. It is dotted with islands of all proportions from the tiny one bear-ing a single cedar to those of hundreds of acres in extent. The lake is of a peculiar shape and by a glance at the map one will observe it in the form of an octopus with arms branching out in all directions. The coast line runs into innumerable bays and inlets, all biding in their seclusion views of charming wonder and delight. The water of these

THE CLEARNESS OF WATER

Characteristics Which May Be Modified by a Number of Things.

A scientist in the Department of Agriulture gives some interesting facts with reference to the color of water. The fact is generally known that pure wate rappears blue when light is trans-mitted through a sufficient thickness of it, and that when opaque particles are suspended in it the hue of the water clean" milk given.

is greenish. But, while pure water looks blue when light passes freely through it, yet when it is contained in a deep, opaque receptacle, like the basin of a lake or the ocean, it ought to absorb all light and look black. Experience

shows, however, that the deepest parts of the Mediterranean, for instance, appear not black, but intensely blue. This has been supposed to be caused by minute particles held in suspension, but the re-cent experience of the scientist quoted suggests a different explanation. He has found that warmer currents

Mrs. I. Hunter. Mrs. I. Hunter. bassing through pure water interrupt its weary feeling nearly all the time. "I tried almost every medicine, was treated by doctors and druggists, with little or no benefit. transparency, even when the difference of temperature is very slight. Such of temperature is very slight. Such currents may cause deep water to ap-pear blue by reflecting light back from its depths through the transparent lay-ers above. This, it is suggested, ex-plains the fact that fresh water lakes are more transparent in winter than in summer, because in winter currents of heated water are not transparent Such

heated water are not traversnig them. Even the shadow of a mountain falling on a lake may increase the transparency of the water by cooling the surface.

Ointment quickly cures Itching Piles, Eczema, and other skin troubles.

other skin troubles. Leo Corrigan, 475 Ferguson Ave., N. Hamilton, had Eczema since childhood. He consulted specialists—lay weeks and weeks in hospitals— and despatied of ever getting better. "I thought Mira would be this other vemedics I had tried," he write, "but, to my delight, a few hours after the first application I felt great velicf. It has worked woulders for me." Don't put it off—get a box of Mira Ointment at once and be relieved. Price 50c.—66 or \$2.50. At druggits —or from The Chemists' Co. of Canada, Limited, Hamilton—Toronto.

What Is a Gentleman?

Among the Persians at the time of Cyrus the boys were taught to ride, to speak the truth and to draw the bow. That meant manliness, truthfulness and courage, all essential to the character of a gentleman. The knights of chivalry, who were the gentlemen of their time, added the duty of rescuing the oppressed and distressed and this completed the eal by teaching unselfishness and vice. If a boy is taught to be always self-respecting, courageous and truthful and invariably considerate, not outward y but as the expression of true kindli ness of spirit, of the rights and feeling of others he will grow up, whether h be rich or poor, a professional man or a laborer, to have the right to claim not by any artificial distinction but in his own right, with all that it implies, "the grand old name of gentleman."-Washington Post.

danced in their weary eyes, and the po-licemen folded their arms and listened with satisfaction. There was nothing else for them to do. In that big crowd a portion of the Embankment and the entrance of the Gaiety Theatre. Since those early days it has passed through man ystages of improvement, but at each o fthem it has been met by a correspondof listeners almost every nationality was represented. There were Germans, Ital-ians, Hebrews, Russians, Hungarians, ing improvement in gas lighting, and it has had a hard struggle to keep a place in London streets. Apparently even the rosy glow of the "flaming" 'arc fails to illuminate the atmosphere of darkest London as successfully as pressure gas; and it is more averaging and even a Chinaman or two, but al were under the spell of the music, for melody's language is universal and requires

no interpreter. The power of music was shown here as never before. It aroused sunken and

as never before. It aroused sunken and depressed spirits; it gave new life to the disheartened and discouraged; it held the attention of the unruly and rough ele-ment and soothed the weary. And when the concert was over the crowd weut homeward with lighter hearts than they had had for many a day.

had had for many a day. Said a policeman and a philosopher: "The good these concerts do cannot be reckoned in money. They are better than talks and addresses and schools in that talks and addresses and schools in that they reach every one, young and old, and influence for good so quickly. Do you know on the nights that the concerts take place we have really nothing to do to speak of. The music seems to have such a refined and elevating influence on everybody that the police can really take a night off in the precinct. Of course, on the fringe of the crowd there are some mischievous boys alwars, but when the band strikes up a popular mel-ody even the youngston forget about their mischievousness and become spell-bound. I tell you music is a great their mischievousness and become spen-bound. I tell you music is a great thing, and we cannot give these people too much of it. It means less crime, less poverty and less discouragements, for it engenders hope, ambition and a clean mind and heart."-New York Herald.

ASSASSINS' WEAPONS

Unwritten Law That Commands Their Destruction,

Destruction, To obvious reasons it was natural that bomb which did not explode when thrown at the royal copie. There was a reason behind the desire to it in the bud chance of further damage. There is an unwritten law in the reigning houses of Europe, says the London Siandard, that all relicts of attempts upon royal lives, as well as the instruments used for treating the wounds caused in such attempts, shall be destroyed. There was a solemn assembly in Geneva of Austro-Hungarian officials to witness which caused the death of Empress Elizabeth and of the surgical implements used in making the post-mortem examination. The custom is based to a certain upon struction, but more solidly upon the de-ing the bands of exhibitors of such tragic trides. The custom in this matter once was to which charts dever, the dagger was secured with which Martin Merino attempted thor to be cantury ago, the blade was that to the solid of Spain, rather more solid of Spain, rather ing the solid of Spain, rather ingender Queen Isabelia of Spain, rather ingender due and the surgical implements of the custom of the syn the band was that the spain of the syn the band was that the construct finely tempered steel that the cabinet was caused when ingende that there must been magic in the bander of the syn the band was that the there is the band was that the custom in this matter the spains peasants ingende that there must been magic in the bander of the syn the band was that the syn the band was the the steel that the syn the the syn the band was that the syn the syn the band when ingende that there is the syn the band was the the syn the the syn the band was the the syn the the syn the band was the the syn the syn the band was the syn the syn the syn the band was that the syn the syn the band was the the syn the syn the syn the band was the the syn the syn the syn the syn the syn the syn the bander of syn the band was the the syn the sy

to deal with the crisis, and it was deter-mined to submit the steel to the influence of acids. This proving successful, all im-plements used for the like foul purpose have undergone the like treatment-knives, swords, daggers, revolvers, and, presumably bombs.

Patti was in all her glory. Nilsson was singing at the Grand Opera. At French balls the cotillon was danc-

ed to perfection. The cab service was poor compared with that of to-day. Americans were shining resplendently

as entertainers.

breathe. I tried all kinds of liniments and they did me no good. One bottle of MINARD'S LINIMENT, warmed on flannels and applied to my breast, cured me completely.

and it is more expensive.

lakes is cold and pure and so translua depth of from thirty to forty feet. Though 300 miles due north of Toronto, the weather during the day is warm and balmy, with little rain, and the nights pleasantly cool for sleeping. When the day's work of fishing and padding is over and the pipes lighted around a cozy camp fire it just begins to dawn on one that, after all, the chase for filthy lucre is not the only motive in life and lucre is not the only motive in life and that there are two sides to every ques-

worthy of consideration. The fishing grounds in close contiguity to the Muskoka lakes proper and within a distance of from five to ten miles are of the best in this northern country and excellent sport may be had if the an-gler cares to look for it. Near Beaugler cares to look for it. Near Beau-maris, on Lake Muskoka, there is a very

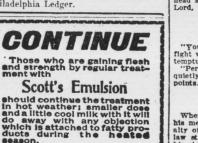

good fishing in Brandy Lake, three miles black bass running from one to four poinds and pickerel from six to twenty ounds. Leonard lake, two miles, goo fishing—same species as found in Brandy lake. Near Banesdale, on Lake Joseph, there is excellent fishing on Kah-Pee-Gog and Six-Mile lakes, as well as half dozen small lakes in the same vicinity the fish caught here are chiefly bass and pickerel. A party left Barnesdale last summer for Six-Mile lake; their catch was a pike weighing twenty-two pounds and a heavy string of black bass running from four to six and a half pounds. At Six-Mile lake there is a small house where tourists can be accommodated at reasonable rates and where guides can be secured. In close proximity to Gor-don bay, on Yake Joseph, there are a number of lakes affording very good number of lakes affording very good fishing within a radius of from three to ten miles. Near this place there is a cluster of small lakes which, in addition to the celebrated Blackstone and Cranlakes, are noted for their abundance of fish, known as Portage lake, Clear lake Silver lake, Long lake and several oth ers. These lakes are easily accessibly wagon road or can be reached by series of short portages. Bass, pickerel and salmon trout are very numerous and excellent sport is assured to the perse-vering angler. Near Rosseau, on Lake Rosseau, there are three lakes which can be erached by portage from Roseau, a distance of about three miles, with port-ages of 200 yards. These are lakes in which bass and salmon trout are abundant. Sucker lake and Watson lake fine bass fishing. Within a radius of nine miles from Rosseau are Black, Tur-tle, Star, Hicks, Whitefish, Trout and Clear lakes.

The Negro in the North

Forty years ago there were 350,000 negroes in the Northern States; to-day there are 1,000,000. Then 7.8 per cent. of the total number of negroes in the country lived in the north; now more than 10.3 per cent. live here. This fact is the more significant when it is reis the more significant when it is re-membered that the negro does not flour-ish in the north. The bith rate here barely equals the death rate. Our in-creasing black population wasborn south of the line; it has migrated hither. Last winter Virginia found itself forced to invite become memory. invite laborers from abroad. Two-thirds of the counties of thas State have de-creased in colored population since 1880. The soil of Virginia is going out of cul-tivation because of the lack of labor.-Philadelphia Ledger.

How the Professor Praved.

How the Professor Prayed. A Kansas university professor seated hims head, started, "Dear Lord, we thank," when the telephone bell rang. He went to the phone, had a short talk with the calling party and returning to the table bowed his head and made another start. Three words were per-mitted to issue this time when "tin-a-ling" went the phone and the performance was re-peated. He made the third and fourth at-tempts to say grace, only to be interrupted by the phone. At the fifth trial he seated himsift at the table, reverently bowed his head and in stenorian tones bellowed: "Dear Lord, hello!"

Painful Points, Too. (Philadelphia Public Ledger.) "You're a queer looking thing to want to ght with me," said the young buildog, con-mptuously. "You're not in my class." "Perhaps not," replied the porcupine, iletly, "but I think I can give you a few ints." points." Sunday Observance Law.
