HYDRO INSISTS UPON MONOPOLY.

Concessions Already Made to Hamilton Withdrawn—Other Unfair Restrictions.

The Hydro-Electric Commission, as predicted in the Times, when it met yeserday afternoon to consider the amendments to the draft form of contract suggested by the power committee, rejected the city's demands. The decision practically means that the commission has taken Hamilton by the throat, determined to make it bolt the entire contract. Mayor McLaren has promised to call a meeting of the power committee to-morrow afternoon to prepare a report for the Council, which will likely nold a special meeting before the end of the week at hitself-inheritance. port for the Council, which will likely noid a special meeting before the end of the week. A bitter right is promised as the aldermen are incensed at the commission's flop in rejecting conces-sions which it had already promised the city.

The meeting at which the matter was The meeting at which the matter was discussed in Toronto yesterday afternoon was attended by Sir James Pliny Whitney, Premier of Outario, the Cabinet Ministers, Hon. Adam Beck and other members of the Government. The decision shows that Hamilton will not only have the commission but the Government to buck, too, and the score or so of western municipalities will have it within their power to crimp Hamilton's industrial progress. This city will be forced to play a lone hand, and its influence promises to count for little against practically the whole of Western Ontario, when the game is played along political lines.

Officiatio, ween the game is prayed along political lines.

Solicitor Lobb, in his letter to City Solicitor Waddell this morning, denies that Hamilton was promised the same benefits as other municipalities. This is evading the issue. What the aldermen were promised at the conference was that Hamilton's distance from the Falls would be considered in adjusting the annual charges. To this the commission gave its consent. Even Alderman Cooper, the Hydro champion, admitted this at the last meeting of the power committee. power committee.

Rev. I. G. Ranson, Burk's Falls, said he had always previously advocated the Canadian Baptist, but after the appearance of the criticism he wrote to the editor, and his views were not printed. Dr. McKay, the editor of the Canadian Baptist, said the proper thing for the person who objected to his editorials to do was to write him first, and if possible have an interview. There was a difference between what was published and what was published editorially. In the same issue as the article to which the objection was raised he had pub-

the objection was raised he had pub-lished an editorial, which, if looked up, might throw some light on the matter. He had been accused of heresy, but he did not see why such statements should

have been made.

Dr. Elmore Harris said he had not intended that his words should imply that Dr. McKay was a heretic, as the thought had never entered his mind. All that he wanted was that both sides should be treated fairly. What he had in view was not the past, but the future.

The report was passed unanimously.

Mr. J. G. Cloke was this morning re-elected president of the Book. Sta-tionery and Publishing Association of Canada.

Clause 2 b, drafted by City Solicitor Waddell, and which gave the city authority to get power from any other source, another concession that the Commission consented to, is struck out as a result of yesterday's decision, and a new clause, drafted by Mr. Lobb, inserted. It distinctly provides that while Hamilton may take power from other sources until the Commission is ready to deliver, when the Niagara power is ready the city must take it from the Commission. The Hydro people say this only applies to the thousand horse-power, but the document does not say so. The agreement is silent as to the city's rights to take power from any other source. If the city is to have this concession the aldermen cannot see why the Commission will not have it so stated in black and white.

The Hydro people argue that the general see every Heritter's deciment that it.

distance from the Falls should be considered. Hamilton will not be under the general act. It will be tied to the special agreement it is making with the Commission, and Mr. Lobb's riders to clause 10 clearly state that Hamilton shall not have any reductions through increased orders from other municipalities. In other words, if Hamilton takes a thousand horse-power, unless it goes into the scheme without reservation, it will be obliged to pay in annual charges for thirty years, practically what it pays the first year.

This is the lever the Hydro addermen will use to force the city into the contract. Another unfair restriction made by the Commission is that Hamilton is only to have until the end of December, 1910, to say whether it wants paragraph; a and b of clause 13, which would give it all privileges, inserted. This gives the city only seven months on which to figure out the cost of power, while it is quite clear that this can only be done after Hamilton has been using the power a full year, so that the quantities used in every month throughout the year may incoming the power a full year, so that the quantities used in every month throughout the year may (Continued on Page 10.)

The report was adopted.

The officers elected to fill the vacancies on the Board were: Rev. W. T. Graham, Rev. A. L. Huddleston, Rev. A. McNee, Mr. H. McBrayne and Mr. S. J. Moore.

The report of he Publication Board was presented by Fred L. Ratcliffe. It showed the total receipts from the book room to amount to \$30,182, which enabled it to pay off the \$1,124 loss from the work of the previous year. On the Roblin, in response to an invitation to speak at a local Conservative Associaspeak at a local Conservative Associa-tion, wrote: "At the present there are reasons which prevent me from speaking on political questions outside my own Province. London, Ont., Oct. 27.-Arrangements are under way for the degree team of Hamilton Oddfellows and 500 brethren to visit London, early in December, and put on the degree work at a general gathering of Oddfellows from all over Western Ontario. At present there is a stiggth thich in the arrangements ow-ing to the failure of the railroads to give the Oddfellows a satisfactory rate.

ASTOR SEPARATION.

New York, Oct. 27.—Hearings, it is understood have already begun before Charles H. Young, said to have been appointed referee in an action by Mrs. John Jacob Astor for a separation from her husband, with the expectation that the testimony, mostly in the form of affidavits, would all be taken, and the referee's report published within a month.

Y. W. C. A. BUILDING, NEARING COMPLETION.

The above cut shows the Y. W. C. A. building for which the people of Hamilton are being asked for \$15,000. The picture is taken so as to show the extension. The front part, the old building, it will be seen, is small compared with the addition, which will be modern in every way. Looking to the future the addition has been so constructed that, whenever necessary, the building can be extended right out to the street by the removal of the present front part.
