

City Council.

A full Board was present at last night's meeting.

Councillor Mullaly disclaimed any credit for the decision to root out the fever on Pope Street by destroying the houses. The whole credit of the suggestion belonged to Councillor Channing, whom he congratulated.

Councillor Martin took exception to this and pointed out that he himself had done something and had suggested the precaution taken to prevent the spread of the disease.

Mayor Ellis said that he did not think it was in the interest of the good government of the city at all that any individual Councillor should be singled out for special credit for doing what is his duty. The whole Councilors agree to a proposal from a member, orders are given to the officials and the work is done. He believed that the discussion was childish and unworthy the dignity of serious men. Besides, there was an implication that the other Councilors were not doing their duty.

The committee on Mr. Rooney's claim reported that it was just and had been paid.

A discussion followed on the typhus fever outbreak. The majority of the Board expressed their opinion strongly that there had been unjust criticism of the Council and the Board of Health. The papers should go to the right source when they want information and not be publishing flying rumors.

The Health Officer reported that all the houses on Pope Street had been thoroughly disinfected and cleaned up. He denied the report in the papers that clothing that had not been disinfected had been taken from infected houses and given around amongst the neighbors.

The Mayor then introduced Hon. John Harvey, whose excellent address on the suggestions to improve the condition of the poor in the city will be found in another column.

The Colonial Secretary wrote the Council in reference to charges for Allan and Puruss lines. Further particulars will be asked.

The question of the title to land where the Parade Rink is located was referred to the Solicitor.

The claim of Mr. T. Kent was also referred to the Solicitor, enclosing the letters of Howley & Hezler, his solicitors.

E. M. Jackson is permitted to repair buildings on Water Street.

Shen & Co. asked permission to build a wooden shed on their premises. Councillor Ryan expressed the opinion that permission should not be given to erect any other than a fire proof or iron covered shed.

J. P. McLoughlin will erect a workshop on Job's Street.

David Smallwood will build a stable on Coronation Street when he gets the Health Officer's approval.

The Reid Nfd. Co. reported that the street railway earned \$35,085 the past year.

Councillor Mullaly, who had asked for a report on duties of Dr. Brohm, was informed that the statement would be ready next meeting.

Councillor Mullaly then proposed the following resolutions:

Whereas there has recently appeared in the local press a scale of fees purporting to be the result of a meeting of the medical practitioners of the city, which fees are largely in excess of those heretofore in force;

And Whereas there has since appeared a scale of fees likewise adopted, which is stated to have been intended as a reduction of the excessive rates above referred to;

And Whereas the last mentioned scale is still much beyond the means of the average citizen, even the minimum rates being such as would bear most heavily upon the great majority of the heads of families in this town;

And Whereas the making of any such scale of fees is apparently under the entire control of the said medical practitioners, who are strengthened in their position by reasons of the provision of the Medical Act;

Resolved that this Council recognizing its duty in matters which affect citizens generally, do hereby recommend to the Government that whilst every precaution should be taken to maintain the highest possible standard for those who wish to be admitted to the medical profession in the city, the provisions of the present Medical Act should be so amended as to prevent the possibility of the carrying out of a policy which

is fraught with such serious consequences to the community.

Councillor Ryan and Mayor Ellis supported them. Councillor Martin was absent. Councillor Channing expressed the opinion that the resolutions were good but that the Council Board was not the proper place to deal with them. Councillors Coaker and Myrick spoke to the same effect. On the motion being put it was carried unanimously.

Councillor Myrick gave notice of a motion to ask the Government to amend the Municipal Act so that all house taxes for water be paid by the owners of the houses and not by the tenants. The landlord could govern himself accordingly with regard to the house. Under present conditions tenants flit about from one house to another and pay no water rates, so that a large sum is lost every year to the Council's revenue.

The Liquor Question.

Editor Evening Telegram.

Dear Sir,—I was pleased to find in the "Daily News," of Friday last, on no less an authority than the Assistant Collector of Customs, that our consumption of Rum for the year 1910 was less than that for 1909 by 2,124 gallons.

This is, indeed, gratifying news to the 3,200 voters and workers for the cause of Temperance who waged such an earnest fight two years ago.

Although we were deprived of the blessing of Local Option at that time owing to the strong drink sentiment of the extra districts which was the cause of much comment during the polling, still we have much to be thankful for in the reduction of the consumption of Rum which is the popular drug of the poorer classes. With an abundance of labor and money plentiful this curtailment can only be attributed to the early closing of the saloons. We should all therefore take heart and by a determined effort keep up the good fight and still further remove the facility of obtaining liquor by closing the bars at 6 p.m.

This arrangement while doing no injury to monopolists would tend to keep much money in the pockets of the poor.

Surely, Mr. Editor, the 3,200 voters who were desirous two years ago of preventing the sale of liquor entirely in the city are not unreasonable in demanding at least that their opinions and feelings on this subject should be given some attention by our legislators.

Yours truly,

MODERATION.
St. John's, Nfld., January 14, 1911.

No More Misery in the Stomach.

Indigestion, Gas, Heartburn or Dyspepsia vanish in five minutes.

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch Gas and Eructate sour, undigested food, or have a feeling of Dizziness, Heartburn, Fullness, Nausea. Bad taste in mouth and stomach headache—this is Indigestion.

A full case of Pape's Diapiesin costs only 50 cents and will thoroughly cure your out-of-order stomach, and leave sufficient about the house in case some one else in the family may suffer from stomach trouble or Indigestion.

Ask your pharmacist to show you the formula plainly printed on these 50-cent cases, then you will understand why Dyspeptic trouble of all kinds must go, and why they usually relieve sour, out-of-order stomachs or Indigestion in five minutes. Diapiesin is harmless and tastes like candy, though each dose contains power sufficient to digest and prepare for assimilation into the blood all the food you eat; besides, it makes you go to the table with a healthy appetite; but what will please you most, is that you will feel that your stomach and intestines are clean and fresh, and you will not need to resort to laxatives or liver pills for Biliousness or Constipation.

This city will have many Diapiesin cranks, as some people will call them, but you will be cranky about this splendid stomach preparation, too, if you ever try a little for Indigestion or Gastritis or any other Stomach misery.

Get some now, this minute, and forever rid yourself of Stomach Trouble and Indigestion.

Big Mail Theft Reported

Sacks Valued at \$50,000 Disappeared at San Francisco.

San Francisco, Jan. 6.—Three bags of registered mail, with contents valued at \$50,000, have been stolen during the last few days in San Francisco, or on the journey across the harbor to Oakland, according to the "Call."

The stolen sacks, the "Call" says, contained late Christmas shipments and money orders, drafts, cheques and surpluses forwarded by local banks to close their year's accounts in the east and north-west. The loss will fall heavily on the banks.

HOUSING AND PUBLIC

Synopsis of An Address by John Harvey, President of the Housing Committee, Made to the Council, Last Night.

Hon. John Harvey, being introduced by the Mayor, stated that he had come to overrule the Council's criticisms or suggestions, but to speak about the housing question, which he already occupied considerable of the attention, and with the view of which they were quite familiar. He stated that he was quite aware from personal conversations that both the present Mayor and the last Mayor were individual members of the Council, were alive to the necessity of trying to improve these conditions. His object was to emphasize the facts which they already knew.

Before going into that matter, however, he suggested that it might be valuable to the Council in its deliberations to obtain the services of a Building Auditor or Expert from abroad for a few weeks, which would probably be very expensive, and that such a person should be invited to come down and investigate the Council's resources and system. He stated that the Secretary would probably be of the advice of such a person, and that it was obvious that the Council themselves had not time to make such an investigation thoroughly, but he thought that a person versed in the subjects and coming here with a fresh mind would be of considerable value to them in solving the various problems which confronted them.

Mr. Harvey went on to say that the Commission of Public Health, now sitting, had had a number of discussions regarding the situation in St. John's, and the following points might possibly be some time brought officially before the Council by that body:—

(1) The supply of Milk, on which the infantile mortality is so largely dependent;

(2) The Meat supply, which is not so plentifully had.

He stated that he was aware that the Council had already considered the possibility of insisting that all meat imported for food in St. John's should be slaughtered in a Municipal abattoir. This would enable proper inspection to be made of the animals which are now sent down from the neighbouring Provinces.

He also stated that there certainly ought to be an Anti-Spitting Law, which would make it possible to prevent the sidewalks in St. John's from being covered with excrementation, which was picked up on men's boots
