THE FLYING DORDONS

One of the Attractions That Will Be Given Twice Daily at the Western Fair.

Sensational aerial gymnasts are the Flying Dordons, consisting of four men and one woman. This quintette, among other things, introduces the cutaways, pirouettes, doubles, trapeze, high dives and somersaults of all kinds. There is nothing under the sun too difficult for them to successfully accomplish in this varied line of entertainment. The double somersault of the woman, as she leaps from one man to another on the swinging trapeze, never fails to bring forth abundant applause for the spectators realize that this is one of the greatest acts tion and non-support. of its kind ever performed by a woman. Quick as a flash the members of this troupe jump from one difficult feat to another, the men swinging in the air by their hands, feet and teeth, and their bodies shoot from ring to ring and trapeze to trapeze as if cast out by an explosion. The difficult manoeuvres of the body and the various poses and the formation of a human pyramid are other exhibitions that have earned for the Flying Dordons the well-earned title of kings of the

ADDRESS BY MR. TROTTER

British Representative of Trades Congress Will Speak Tonight.

Mr. W. R. Trotter, British representative of the Trades and Labor Congress of Canada, will deliver an address at St. George's Hall this evening. Mr. Tretter was appointed by the trades congress at Winnipeg in 1907, and his mission proved so successful and useful that he was reappointed by the Halifax congress in 1908. The last two winters he has spent in the British Isles, securing a large amount of trades union informaon, more especially such as relates to immigration. Through his efforts, old country trades unionists have been enlightened as to conditions in Canada. As to immigration, Mr. Trotter discovered that many societies were sending out 'new citizens for the Dominion from selfish motives, their fitness not being considered, and he has succeeded in turning towards the Dominion only the most desirable and needed class.
