# Re Offering of Securities of

# PAGIFIG-BURT GO.,

### TO SMALL INVESTORS

Because of the attractiveness of this offering all signs point to a large oversubscription if the books remain open for the maximum time stated in the advertisements, viz., until Tuesday afternoon next at four o'clock.

With such oversubscription there is always dissatisfaction, through the cutting down of amounts applied for, and this should be avoided as far as practicable.

At the same time, the object of public flotations is the widest possible distribution amongst those who may be called permanent investors, and our experience is that an important percentage of the smaller subscriptions usually come in during the last two days for which the offering remains open.

This notice is to suggest that intending investors send in their subscriptions without delay. so that the books may be closed at a time involving the least friction consistent with allotment amongst the largest number.

Roberts haded for Michigan when he escaped from London jail, and started in to make things lively in the vicinity of Bad Axe. A small factory there was entered and money taken and it is on this charge that Roberts

will be tried on Monday. Should Roberts get the five-year term on the Michigan count, he will be handed over to finish his three-year burglary term here when the former sentence is concluded. This latter term will also be enlarged on a charge of jail-breaking. It was reported morning that the sentence which Roberts had commenced here is still being served, despite the fact that he broke away, but this is not the case.
