IN SEARCH OF ANDREE.

French Balloonists New at Vancouver and the Plans for Their Northern Expedition.

Reasons Why They Hope That the Intrepid Explorer is Still Alive.

Vancouver, June 4.—(Special)—The French balloon expedition to Klondike has been talking to good effect recently. Nearly two months ago the French scientists, headed by M. Anthony Variele, arrived at Montreal, with their balloons and were said to be coming straight to Vancouver, but it was only the other day that the members of the party, except the leader, turned up in Vancouver, where they were now stopping at the Hotel Vancouver. They are Dr. A. J. Terwagne and Messieurs Edouard Fect and Louis Vernet, the English-speaking contingent was due to the interesting fact of negotiations being entered into and the final return of M. Variele to Paris for the purpose of securing an authority second to none in Europe. He is a personal friend of Andree, the Arctic explorer, as is also M. Terwagne, who kindly consented to give a World representative an interview at his hotel last evening. M. Terwagne has for years been classed among the well-known scientists and his studies in connection with balloon navigation are as nearly perfect as they can be. He is a gentleman of very genial disposition, and is only too ready to give his physical illustrations of his statements as the interview progressed. Having not travelled long in English-speaking countries to learn the language well, he kindly acted as interpreter.

You see, he said, in giving a short history of balloon experimenting, "the people of nearly every country have considered that balloon and aerial navigation is more of a pastime than anything else, but it seems now as if the balloons were as near perfect as possible. Most of the systems of aerial navigation are very interesting in France, Germany and other European states there are now parks and schools for teaching it, and officers of high rank in the armies practice with it. The English-speaking countries use it for naval purposes, especially in times of war. Thus the task of experimenting has perforce fallen into the hands of men of intellect and ability. The bicycle craze has come and everybody has deemed how to ride, but of course the balloon is very different, and enormous amounts of money required does not admit of persons of ordinary means studying aerial navigation. Capital is necessary for it."

"When Andree left Spitzbergen his name was brought before all the scientific societies of Europe. The King of Sweden and Baron Dickson were his patrons and they did their very best to give him every possible help. Andree, being only a professor of an academy, was not expected to have the experience of an aeronaut, having only once or twice undertaken to make journeys by balloon. Neither were his companions, M. Struberg and M. Frenckel, professionals, having gone on only a few trips with M. Lachambre and M. Malot. Naturally, being men of science, in one or two trips they learned more than an ordinary novice would in a great many times, but it is justly to be said that they were not experienced to undertake travel of the sort they did. Having not had the actual experience they could not foresee the possible contingencies.

"According to a new principle, which will be described further on, a good deal of difficulty is avoided. By the old style of balloon, the air diminished while the density of the air diminished the consequent pressure became less, and the pressure from the inside, being lighter, being men of course, escapes. Then you begin to descend and when you come to the density in which your balloon floated the men would rise and fall, having lost some of your gas. To prevent striking the ground you throw out ballast, consisting of sand or earth, and the balloon rises again. By and by you have thrown away all your ballast and all the gas has gone from your balloon, and the only thing to do is to descend to earth again. Andree has undertaken to do this and to preserve his gas as long as possible.

"My principle is to do the balloon up to a certain distance and there regulate it at will. Suppose we were leaving on an aerial trip. We have a hemp rope, 150 yards long, and we have 30 yards in the balloon. The remainder is laid out on the ground, snake fashion, so as not to become tangled. Of course that rope weighs as much as it is let out at first the balloon rises. Then the sand is thrown out until there is an even rise to a convenient height with the end still trailing along the ground, the balloon of course supporting the part in the air. While the sun is shining the balloon is much more buoyant, but we happen to run through a moist cloud and our house for the meantime begins to descend. As we go down the rope becomes lighter and lighter, because more of it rests on the ground, and at last we reach a place, perhaps only 25 yards from the ground, where the balloon can hold that much rope. Thus you can sail along as nicely as possible, that is if you know the many other points which experience teaches."

"Now, Andree did not reflect that one of these ropes, which are called kites, would do just as well as a dozen, so he took several. The system whereby if the end of the rope became caught he can let it off in pieces. Little swivels of dynamite or powder were run down the rope, so that if caught it might be cut and the powder burning down to the obstacle explodes at that point and the rope is broken. When sailing Spitzbergen the ropes were terminated and he had to let go. His balloon, being a large one of 5,000 cubic metres, and having been discharged of 400 pounds weight, naturally soared away to a great height. Thus he has not been master of his balloon ever since, but this in itself is not particularly serious for he has only to lose his gas and come down again. He intended to go North which was not straight before the wind and which could have done had he used a kite, but according to the reckoning of French scientists he was drifted away in a contrary direction

to Franz Josef land. Now no one knows where he is, but there is every reason to believe that he is in Northern Alaska or Siberia. It would be lucky if he came to Alaska, but if he came down to Siberia, it would be a critical moment for him to pass," was the literal translation given to the reporter. "Of course," he continued, "some people think Andree is dead because he had only six months' provisions, but Nansen made an overland journey under much worse circumstances and in a much harder country and climate. Andree has guns and powder and could kill game to replenish his larder, or when a man goes north he knows he is not at a feast, you know. Every man should do his best for science and before scientific men will believe Andree dead a good many years will have passed. Mr. Variele is authority for the statement that one kite for a balloon will do as well as several. One will never get as well fastened to trees or houses. Mr. Variele has remembered the principle of Archimedes, "Give me a point of strength and I shall overthrow the earth." The difficulty has always been in the conducting of a balloon that they have not had a point of strength, but now with the rope on the ground they have it. "So you see we are going to Klondike and northern Alaska," he said, "to find if possible if Andree is there."

The interviewer, who had seen the party taking lessons in gold mining in the school on Cordova street, asked if they intended to do gold-mining. M. Terwagne replied that he would pick up whatever came in his way. He was to see and report on the country for the French government and would also act as special correspondent for the Figaro.

PHILIPPINE PRISONERS

Eighteen Hundred Now at the Tender Mercies of the Savage Insurgents.

Speculation as to Their Treatment and Dewey's Responsibility for Allies' Actions.

Washington, June 6.—After a lot of conflicting rumors of naval engagements, the landing of troops, and such matters at the navy department these cases at the close of the day one important bit of news, embodied in a report from Admiral Dewey, of an important success achieved by the insurgents at Manila. The officials have been more anxious than they cared to betray as to Admiral Dewey's condition. They were seriously apprehensive of danger to the fleet, but an impression was gaining ground that the Admiral had not had the same measures of success in his operations in Manila as he had in the first efforts. Now the report received goes to show that his plans are working out admirably, that he has succeeded in placing upon the insurgents the burden of conducting military operations against the Spanish, while he himself is lying in enforced idleness awaiting the arrival of troops, and that he has succeeded in preventing the corruption of the insurgent leaders by the Spanish, which appeared at one time threatening.

There is some speculation here by anxious minds as to how the insurgents will treat the prisoners they have taken, who are more numerous, it is said, than all the captures made by the Cuban insurgents since their war began. It is reported by cable soon after he had secured the co-operation of the insurgent chief, Aguinaldo, that Admiral Dewey would see to it that the insurgents observed the rules of civilized warfare. This caution was made necessary by the terrible tales that had been circulated of the brutal world held the prisoners captured by the insurgents.

It is sincerely hoped that Aguinaldo will see to it that this agreement is observed in the case of the 1800 prisoners he now holds, for it is believed in official circles that the nations of the civilized world will hold the United States morally responsible for any great excesses that may be committed in the Philippines as a result of their action there. The navy department officials declare that Dewey is not responsible for the safe keeping and maintenance of these prisoners, which is most fortunate, considering the limited resources of the admiral in the matter of provisions. The Cadiz fleet, which was reported to be doing strange things in the West Indies yesterday, is not giving the naval officials any concern. They have devalued the state department ship, the Spanish ships were at Cadiz last Friday, so they could not well have been in the West Indies two days later.

Up to the close of office hours it could not be learned at the war or navy departments that any news had reached there to show that troops had landed in force near Santiago, and the officials, high and low, made no concealment of their incredulity.

SPOILS OF OFFICE.

Commissioners in Permanent Corps and Gas Meters Made Use of.

Ottawa, June 6.—(Special)—In answer to a question by Dr. Borden asked a son of Mr. Lister, M. P., had received a commission in the permanent corps although not qualified.

Another answer showed that the Frederick Gas Works company, of which Mr. Blair is a leading stockholder, have been paid an undue amount for gas supplied to military barracks.

DOMINION NEWS NOTES.

Methodists Ask a Million—British and Foreign Emigration to Canada—Gananoque Works Burned.

ference on Monday Judge Dean urged that steps be taken to raise a million dollars among the Methodists of Canada to mark the opening of the twentieth century.

Part of the buildings of the D. P. Jones Manufacturing Company, of Gananoque, was burned on Monday afternoon. The premises and machinery were insured for \$3,000.

Official announcements of the C.W.A. Dominion racing horses include the following: The suspension of the following riders expires June 8, 1898—A. McLeod, T. B. McCarthy, A. Blake, L. Long, head, F. Dunbar, E. Cooper, C. E. Schawl, Vancouver, B. C., is transferred to the professional class.

The Toronto lacrosse team was beaten by the Shamrocks in five straight games in the opening championship match at Montreal on Saturday.

A despatch to the Winnipeg Free Press from Warden, B. C., says that Edward Rawlin, a resident of Winnipeg, is dead at Warden from the effects of a blow on the temple given by a half-breed named Phillips.

A bill has been introduced in the Commons giving mill-owners another year's grace to make provision for the disposal of mill refuse other than by dumping it into rivers. This is the third session. The mill owners promise by next year to establish a plan to manufacture pyroligneous acid from sawdust.

The one shipment from Rossland for the seven days from May 28 to June 4, inclusive, were as follows: War Eagle, 1,280; Centre Star, 30; Iron Mask, 65; total, 1,375 tons. The shipments to Nelson 105 tons and to Trail 1,270 tons. The shipments from the camp since January last aggregated 16,570 tons.

A special cable to the Toronto Evening Telegram from London says that for the month of May the returns of emigration to Canada from British ports were: English, 1,514; Irish, 51; Scotch, 288; foreign, 1,019. The totals for the five months of the present year are: English, 5,769; Irish, 301; Scotch, 701; and foreign, 3,540.

A LAWYER DISAPPEARS.

Well Known Resident of Revelstoke the Object of Fruitless Search.

Revelstoke, June 6.—(Special)—A. G. M. Sprague, a well known attorney, disappeared on June 1. He had several cases in court in the morning and in the afternoon took a gun and dog and has not been seen since. The dog returned next day. Searching parties have been out four days, but have found nothing. He is believed to have met with an accident or committed suicide, though no reason can be assigned for the latter unless perhaps financial embarrassments.

SEALERS' MONEY.

British Government Does Not Look for Unnecessary Delay in Paying It.

Toronto, June 6.—The following is a special cable to the Evening Telegram dated London, June 6: "In the House of Commons to-day Hon. Geo. N. Curzon, parliamentary secretary of the foreign office, in reply to a question of Mr. Geo. Eaden Powell, said he did not suppose there would be any unnecessary delay on the part of the United States in paying the claims of the Canadian sealers."

AFTER TWENTY-FIVE YEARS.

London Man Charged With Bigamy Committed a Quarter of a Century Ago.

London, June 4.—George Gibson was arrested yesterday charged with having committed bigamy twenty-five years ago. Mrs. Fanny Gibson, who lived with her husband until December last, charges that he married Mary Ann Gibson twenty-five years ago, and two years afterwards he married another woman, entirely forgetting his alleged vows to his first wife. Gibson was fifty-five years of age when he was arrested. He is now in the custody of the police. He is reported to have been a first-class compartment. Five minutes later the real Lord Rosebery stroled into the station, to the consternation of the bystanders. The bewildered officials placed him in the same compartment, and when Lord Rosebery recognized his counterpart, and smiled as he grasped the situation.

The German emperor is now in that part of Lorraine which used to be France. The chateau of Etzelle, near Metz, is his favorite hunting seat. He also calls his school-rooms for his young sons, and the study of military devices, for which he utilizes the blackboards and slates of his sons. The latest hobby is an internal machine, which the inventor declares sufficient to move down the river. One of the oddest bequests on record is that of the late George Russell, the well-known sculptor of Aberdeen. He left a fortune of \$75,000 for the benefit of scavengers and policemen.

SIR HIBBERT'S VIEWS.

He Tells Why People in the East Are Turning Against the Government.

Winnipeg, June 7.—(Special)—Sir Hibbert Tupper reached here last night en route from Ottawa to the Pacific Coast and has been interviewed at length by the city papers. To a Tribune reporter he said: "Looking at the prospects of the Conservative party he thought they were very bright. The people in the East are turning against the government. Take last session, for example. Here was a session of four months, after the government had been in power and had everything at its disposal with time to get matters ready, and yet it was admitted to be the most barren session ever held. Outside of settling Manitoba's claims which could hardly be put as a matter of policy, what had the government done for the people of Canada? As to policy, it was difficult to tell what the policy of the government was. Take their trade measures. They no sooner get their preferential trade with Great Britain that they rush off to Washington to give them special privileges. The Conservative party had had its differences with the result that every body knew, and now it was thoroughly united again and ready for the next election when it came on."

C.P.R. VICE-PRESIDENT.

Mr. Shaughnessy on the New Connections With Rossland and Boundary Creek.

Smelting at Cost but Foreign Control of Lead Will Hamper Enterprise.

Denial of Charter to Mr. Corbin Will Not Delay Mining Enterprise.

Rossland, June 8.—Vice-President Shaughnessy, of the C.P.R., arrived here to-day to express himself as well pleased with what he has seen so far and regards the future of the West very optimistically. Mr. Shaughnessy's progress throughout the Kootenays since his last visit. He is also well pleased with what he has seen of the progress of the passenger and traffic service of his company. In the few minutes that Mr. Shaughnessy devoted to an interview with the editor of the Evening Telegram in widening the Columbia and Western tracks between Rossland and Trail to standard gauge, he fully expects to commence within the next few days, in fact Mr. Gutelius, superintendent of the road, has already received his instructions in this respect. As soon as the line is standard gauge the train service to and from Rossland will be greatly improved, and it is not improbable that the present schedule will be re-arranged for the better in the near future.

Speaking of the Robson-Penticon railway, Mr. Shaughnessy said that the company was in that business solely to foster and encourage the development of the country. For that reason the works there will treat the district as a unit at cost. He stated that for years the C.P.R. has worked for a revision of the Pacific coast tariff. He is of the opinion that the best smelting and manufacturing industry of Canada will be at a disadvantage so long as the situation is controlled by a paying tariff. He did not give his opinion concerning what might be expected of parliament in this connection.

In reply to several questions regarding the railway situation in the Boundary Creek country and Mr. Corbin's desire to build a road from Trail to the Boundary, Mr. Shaughnessy said that he did not know of any arrangement that had been or would likely be made between the Boundary Creek country and Mr. Corbin by which the latter would use the C.P.R. tracks along the Kettle river as far as Midway, nor did he know of any arrangement by which the C.P.R. would gain an entrance to Spokane over the Spokane Falls & Northern tracks on a special advantage route.

Mr. Shaughnessy stated that he had inspected the construction work on the Crow's Nest Pass railway and judging from what he saw, he fully expects the road will be in operation as far west as Kootenay lake this year.

DOMINICAN TROUBLES.

President With a Gunboat in Chase of Insurgent Leaders.

Cape Haytien, June 8.—Mystery was observed regarding the visit of the Dominican gunboat Restoration to this port yesterday evening. It transpires this morning that President Heureux, of Santo Domingo, was aboard the vessel and that from there he goes to Inagua where the Dominican leader, who is now to be located. The Restoration left Cape Haytien before five o'clock this morning. One of the oddest bequests on record is that of the late George Russell, the well-known sculptor of Aberdeen. He left a fortune of \$75,000 for the benefit of scavengers and policemen.

Spain Says It Is No Use To Send Troops if the Natives are Hostile.

Madrid, June 8.—The minister of war, General Correa, received news from the Philippine Islands to-day, and communicated it to the Premier, Senor Sagasta, saying that the governor-general of the colony, Augusti, asked for full liberty of action. He added that Augusti, the insurgent leader, continued to excite a general insurrection in the Philippines. A despatch from the commander of the island of Visayas says that officials sent two gunboats to the island of Luzon, with instructions to try and communicate with Manila, but he adds they were compelled to return unsuccessful. The government replied instructing the commander of the island of Visayas to restore communication with Manila at all costs. General Correa declined to furnish the text of the despatches for publication on the ground that it would be prejudicial to the country's interests. A member of the government admitted, however, that the despatch from Manila regarding the Philippine islands could not change the situation. He said: "We could send 6,000 troops, but if the natives are against us, such a force would be inadequate. If they were with us it would not be necessary to send troops to the Philippines."

If you once try Carter's Little Liver Pills for sick headache, biliousness or constipation, you will never be without them. They are purely vegetable, and easy to take. Don't forget this.

HEART DISEASE BELIEVED IN 30 MINUTES. Dr. Agnew's Cure for the Heart gives perfect relief in cases of Organic or Sympathetic Heart Disease, in 30 minutes, and speedily effects a cure. It is a perfect remedy for Palpitation, Shortness of Breath, Smothering Spells, Pain in Left Side and all symptoms of a Diseased Heart. One dose convinces.

NEWS OF VANCOUVER.

Suggestion That New Leadership May Bring Religious Discord Into Politics.

Four Rescues of Drowning Persons—Venerable Totem for Westminster Museum.

Denial of Charter to Mr. Corbin Will Not Delay Mining Enterprise.

Vancouver, June 7.—J. McCook, the newly appointed United States consul for Dawson City, was overcome with heart failure while bathing in English Bay and rescued from certain death by a colored man named Joe Fortes, after he had disappeared for the third time. Fortes dived under his body and brought him to the surface and resuscitated him. It is stated on apparently good authority, that the P.P.A. element desires to introduce a new issue into the provincial election contest. The P.P.A. men mean so they say, to ask a pledge of candidates that they will support legislation by the province to provide for the state establishment of literary and scientific establishments generally. They favor the adoption of a strong policy of anti-unionism to the Roman Catholic church at all costs and some of them believe, though it is not known that they have sufficient authority for their faith, that they will find in Mr. Jos. Martin a Protestant champion of the cause. The threat may of course come to nothing, but whippers of it are in the city and the news of better sermons, P.P.A. order, who claim that they will give a big support for the policy above indicated from a large body of Orange voters in the province. Meanwhile the Rev. Mr. Christmas in Vancouver is fomenting amongst his gatherings which attend to hear his preachings, a strong anti-Roman Catholic sentiment. The city council had a timely discussion yesterday about the sanitary state of the city and the need of better scavenging and other precautionary arrangements. The very shallow waters of the upper end of False Creek are meanwhile squall littered with house boats and water sheds from polluting the creek by continuing to throw into it all manner of refuse, there is some danger of an outbreak of typhoid fever. The present state of the creek shows completely how extremely dangerous it would be to drain into any portion of the creek, as recently suggested, the effluents of large and some of the city.

Some of the vagrant toughs now in Vancouver are giving the police much trouble. One of these fellows, a man named White, received a well merited sentence yesterday of ten months imprisonment at hard labor for making a murderous assault on Police Officer Baines by means of a heavy stone in a sling. The blow smashed the officer's helmet and wounded him on the forehead. Indeed had it not been for the protective headgear Mr. Baines would have been killed.

An ex-lieutenant of the Royal Navy, named C. D. Graham, was yesterday sentenced to six months hard labor on each of three charges of passing forged bank checks, after pleading guilty and electing to be tried summarily.

Three gallant rescues from drowning have been made this week already on False Creek and English Bay respectively. In the first instance Mr. J. Colbrook rescued a young lady from drowning by the capsizing of a rowboat, by jumping overboard from his own craft with three out of a dozen passengers for half an hour until assistance came. In the second case Mr. Wm. Mackie plunged into False Creek and rescued a boy from drowning, and in the third Mr. J. Fortes, of the Alhambra hotel, swam out and rescued a bather at English Bay.

The Esquimalt and Nanaimo railway appeal against assessment of city property has been adjourned till Monday.

GIVING UP THE PHILIPPINES.

Spain Says It Is No Use To Send Troops if the Natives are Hostile.

Madrid, June 8.—The minister of war, General Correa, received news from the Philippine Islands to-day, and communicated it to the Premier, Senor Sagasta, saying that the governor-general of the colony, Augusti, asked for full liberty of action. He added that Augusti, the insurgent leader, continued to excite a general insurrection in the Philippines. A despatch from the commander of the island of Visayas says that officials sent two gunboats to the island of Luzon, with instructions to try and communicate with Manila, but he adds they were compelled to return unsuccessful. The government replied instructing the commander of the island of Visayas to restore communication with Manila at all costs. General Correa declined to furnish the text of the despatches for publication on the ground that it would be prejudicial to the country's interests. A member of the government admitted, however, that the despatch from Manila regarding the Philippine islands could not change the situation. He said: "We could send 6,000 troops, but if the natives are against us, such a force would be inadequate. If they were with us it would not be necessary to send troops to the Philippines."

NEWS OF THE CAPITAL.

Farewell Address to Aberdeen Endorsed by Both Parties in the Commons.

Novel Grant to Manitoba the Subject of Vigorous Protest by the Opposition.

Board to Determine Canadian Geographical Names—The Senate and the Franchise.

Ottawa, June 8.—Parliament to-day passed a farewell address to Lord Aberdeen, asking him to convey to the Queen the assurance of the unwavering loyalty and devotion of the Canadian people to the crown and Empire of Great Britain. The address testified to the courtesy and assiduity with which the Governor-General discharged the duties of the office and spoke of the encouragement he has given to literary and scientific pursuits. Sir Wilfrid Laurier moved the address without a formal speech. Mr. Foster gave it his hearty support. He said a difference of opinion on constitutional procedure had arisen between the leader of the Liberal-Conservative party and his Excellency, but this did not blind those who honestly differed from Lord Aberdeen to the many excellencies distinguishing the Governor-General's administration. The opposition fought vigorously the resolution granting \$250,000 to Manitoba on account of the legislative buildings. Many members thought this was opening the door to a class of claims which should not be recognized. A protest was entered by the opposition, and a vote of \$300,000 to Manitoba out of the capital of the school fund. Mr. Foster held that the grant should be safeguarded as to its application. Several other members maintained that the school fund was originally established so that the interest alone could be drawn in support of education.

The government has appointed a board to determine geographic nomenclature in Canada. The cabinet, deputy minister of marine, is chairman. Strange to say, Dr. Dawson, director of the geological survey, is not a member of the board.

The opposition fought vigorously the resolution granting \$250,000 to Manitoba on account of the legislative buildings. Many members thought this was opening the door to a class of claims which should not be recognized. A protest was entered by the opposition, and a vote of \$300,000 to Manitoba out of the capital of the school fund. Mr. Foster held that the grant should be safeguarded as to its application. Several other members maintained that the school fund was originally established so that the interest alone could be drawn in support of education.

TO COIN KLONDIKE GOLD.

San Francisco Mint Likely to Receive Many Millions in Next Two Months.

Washington, June 8.—Secretary Gage sent to the house to-day a recommendation for the payment of wages of workmen and the contingent expenses at the mints for coining gold and silver during the next year, together with elaborate statement of the gold bullion now in the treasury and the need for its conversion for prompt use. It was the appropriation to enable the mints to convert a large part of the gold bullion now on hand as well as to coin the current domestic deposits that will be necessary to meet the attention to the large amount held in the treasury on June 1 and the apparent necessity for its conversion into coin at an early date to meet the requirements of the treasury in case it should be required. Continuing, the secretary says: "The increase in the gold bullion in the treasury is due to large importations of foreign gold bullion and coin, deposited with the mint at San Francisco and the assay office at New York, amounting from July 1, 1897, to June 1, 1898, to \$72,437,500. The mints at Philadelphia, New Orleans and San Francisco are now working eight hours a day, to their full capacity, in coining gold, silver dollars and subsidiary silver. Of the gold for the treasury, \$32,000,000 is held at the assay office at New York and the mint at Philadelphia. To reduce materially the stock in a reasonable time, it will be necessary to run overtime at the Philadelphia mint for several months. While the stock of gold bullion on hand at San Francisco is about \$4,500,000, it will be doubled in July and August from the Klondike, most of which will be deposited in that institution. Consequently the estimates place the amount to be received from the Klondike during July and August at not less than \$10,000,000 to \$15,000,000 and probably it will be necessary to make the mint at San Francisco work overtime for two or three months. Specially will this be necessary should further importations of gold be made from Australia."

VANCOUVER OPPOSITION.

The Coalition Ticket Chosen at a Convention Held Last Night.

Vancouver, June 8.—At the opposition convention to-night the following four candidates were selected: F. C. Cottan, C. E. Tisdall, J. Martin, R.
