

Dr. M. A. Starr, 22 West Forty-eighth street, office hours, 9 to 12 a. m., New York, March 31st, 1892.—Dear Dr. Vought: If you have any record of a locomotor ataxia, by name of Quant, who says he came to the clinic 3 or 4 years ago, No. 14,037, of the O. D. Dept., Roosevelt, sent to me from Ware, will you let the bearer know. If you have no record send him to Roosevelt Hosp.

Yours, STARR.

By means of this letter access to the records was permitted, and a transcript of the history of Mr. Quant's case made from them as follows:—

"No. 14,037. Admitted September 16th, 1889, Charles A. Quant, aged 34 years. Born U. S. Married. Hoboken."

"History of the case:—Dyspepsia for past four or five years. About 14 months partial loss of power and numbness in lower extremities. Girdling sensation about abdomen. (November 29th, 1889, not improved, external strabismus of the left eye and dilation of the left eye) Some difficulty in passing water at times; no headache but some dizziness; alternate diarrhoea and constipation; partial ptosis past two weeks in left eye.

"Ord. R. F. Bi pep. and Soda."

These are the marked symptoms of a severe case of locomotor ataxia. "And Dr. Starr said a case with such marked symptoms could not be cured, and Quant who was receiving treatment in the outpatient department, was given up as incurable."

"There never was a case recovered in the world," said Dr. Starr. And then said: "Dr. Ware can tell you more about the case, as Quant was under his more personal treatment. I am surprised, he said, "that the man is alive, as I thought he must be dead long ago."

Our reporter found Dr. Edward Ware at his office, No. 162 West Ninety-third street, New York. He said: I have very distinct recollections of the Quant case. It was a very pronounced case. I treated him about eight months. This was in the early summer of 1890. I deemed him incurable, and thought him dead before now. Imagine my surprise when I received a letter from him about two weeks ago telling me that he was alive, was getting well and expected soon to be fully recovered."

"What do you think, doctor, was the cause of his recovery?"

"That is more than I know. Quant says he has been taking some sort of pills and that they have cured him. At all events, I am glad the poor fellow is getting well. For his was a bad case, and he was a great sufferer."

Dr. Theodore R. Tuttle, of 319 West Eighteenth street, to whom our reporter is indebted for assisting courtesies, said of locomotor ataxia? "I have had several cases of this disease in the course of my practice. I will not say that it is incurable, but I never knew of a case to get well; but I will say it is not deemed curable by any remedies known to the medical profession."

After this successful and confirmatory investigation in New York, our reporter,

Saturday, April 2nd, 1892, visited St. Peter's Hospital in Albany, corner of Albany and Ferry streets. He had a courteous reception by Sister Mary Philomena, the sister superior of St. Peter's Hospital, and when told the object of his visit, said she remembered the case of poor Mr. Quant very distinctly. Said she: "It was a very distressing case and excited my sympathies much. Poor fellow, he couldn't be cured, and had to go home in a terrible state of helplessness and suffering." The house physician, on consulting the records of St. Peter's Hospital, said he found only that Charles A. Quant entered the hospital March 14th, 1890, was treated by Dr. Henry Hun, assisted by Dr. Van Derveer, who was then, 1890, at the head of the hospital, and that his case being deemed not possible of cure, he left the hospital and was taken to his home, as he supposed to die.

Such is the full history of this most remarkable case of successful recovery from a heretofore supposed incurable disease, and after all the doctors had given him up, by the simple use of Dr. Williams' Pink Pills for Pale People. Truly, it is an interesting story of a most miraculous cure of a dreadful disease, by the simple use of this popular remedy.

A further investigation revealed the fact that Dr. Williams' Pink Pills are not a patent medicine in the sense in which that term is usually understood, but are a scientific preparation, successfully used in general practice for many years before being offered to the public generally. They contain, in a condensed form, all the elements necessary to give new life and richness to the blood, and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of la grippe, palpitation of the heart, pale and

sallow complexions, that tired feeling resulting from nervous prostration; all diseases depending upon vitiated humors in the blood, such as scrofula, chronic erysipelas, etc. They are also a specific for troubles peculiar to females, such as suppressions, irregularities, and all forms of weakness. They build up the blood and restore the glow of health to pale or sallow cheeks. In the case of men they effect a radical cure in all cases arising from mental worry, over-work, or excesses of whatever nature.

On further inquiry the writer found that these pills are manufactured by the Dr. Williams' Medicine Company, Brockville, Ontario, and Morristown, N. Y., and are sold in boxes (never in loose form by the dozen or hundred) at 50 cents a box, or six boxes for \$2.50, and may be had of all druggists or direct by mail from Dr. Williams' Medicine Company, from either address. The price at which these pills are sold, makes a course of treatment comparatively inexpensive, as compared with other remedies or medical treatment.

AMMONIA

in Baking Powder is a

Disease-producing Agent.

Its volatility is abridged by reaction with the gluten of the Flour.

The preparation of an UNOBJECTIONABLE Baking Powder containing AMMONIA is impracticable.

Avoid all risk and use
