## POTASH

FOR ALL CROPS.

ON ALL SOILS.

Potash is an Indispensable Plant Food.

No soil will produce a maximum crop unless it contains a supply of available POTASH sufficient for the crop's requirements. POTASH is the dominant ingredient in a fertilizer for Potatoes, Tobacco and most Fruit and Vegetable crops and is essential to all other crops.

### MURIATE OF POTASH and SULPHATE OF POTASH

can be obtained from the leading fertilizer dealers and seedsmen. Buyers of "Ready-Mixed" fertilizers should purchase brands containing a high percentage of POTASH.

A new edition of "ARTIFICIAL FERTILIZERS, THEIR NATURE AND USE" has been prepared. This is a complete treatise of 80 pages on this important subject and contains a complete index. This is a most helpful bulletin in the intelligent study of fertilizers and the fertilizing of the various crops. It will be sent FREE on request, together with any of the following:

- "The Principal Potash-Crops of Canada."
- "Fertilizing Orchard and Garden."
- "Fertilizing Grain and Grasses."
- "The Potato Crop in Canada."
- "Fertilizing Hoed Crops."
- "Farmer's Companion."

STATE WHICH YOU REQUIRE.
