POSITIVE PROOF

CANADA

TO TEST the respective values of brands of Galvanized Iron, Professor J. T. Donald, the well-known Montreal analyst, made several analyses of "QUEEN'S HEAD" and one of the best competing brands, and reports that "QUEEN'S HEAD" was not only more heavily coated, but that the Galvanizing is much more evenly distributed.

RESULT—It outlasts all other makes.

YUKON PROGRESS.
During the past winter various regulations which retarded development of the mining properties in the Yukon, have been removed and on Feb. 26 the whole territory was thrown open for mining location. The result has been that many claims have been re-located and business generally has revived greatly. The recording office in Dawson shows that for the three past

months applications were received for 1,100 relocations of placer claims and 750 new locations. Applications for quartz locations during the same period number 145 and 1,300 mine licenses were issued.

A change is noticeable in the method of working the claims. On many of these steam plants are now in operation and the claims are being worked more economically and systematically and it is, therefore, confidently expected that the output this year will exceed that of any previous season. Recently a number of hydraulic concessions have been thrown open also owing to the obligations existing under the grants not having been complied with.

A number of quartz ledges have been found, some of which have given very satisfactory assays, but it has

not been proven as yet whether or not these are of marketable value. It is said, however, that some of the owners of these properties will bring in stamp mills this year and test the value of the ore.
