

All our journals
are machine
ground perfectly
true.

We use cut
gearings on all
our machines.
Try them.

No. 322 Improved Scroll Saw with
tilting table and air pump.

A Scroll Saw Built Just Right

Our No. 322 Improved Scroll Saw, like all our other high standard woodworking machinery, enables you to do **more and better work**, and places you in a position to outstrip your competitors. It embodies at least a dozen features that place it in a class by itself, and still it sells at a comparatively low price. See full description in another column.

Every machine built by us is a "Profit-maker." Our experience in the machinery business has taught us what we **must and must not do** in designing and building a new machine, and it will pay you to consult us when you are in the market for "**Something better.**"

Don't place an order before seeing what we can do for you.
