

“Equipment, other than analytical instruments, especially designed or prepared for the separation of isotopes of uranium” includes each of the major items of equipment especially designed or prepared for the separation process. Such items include the following:

- (a) Gaseous diffusion barriers
- (b) Gaseous diffusion housings
- (c) Gas centrifuge assemblies, corrosion-resistant to UF_6
- (d) Large UF_6 corrosion-resistant axial or centrifugal compressors
- (e) Special compressor seals for such compressors

11. Plants for the production of heavy water:

A “plant for the production of heavy water” includes the plant and equipment specially designed for the enrichment of deuterium or its compounds, as well as any significant fraction of the items essential to the operation of the plant.
