REAL ESTATE

Building Operations,

But Prospects Are Good for a Big Season-Churches, Schools and Commercial Buildings-Property Trans-

The real estate market in London is more active than for some time past. While the number of transfers this spring has not, as yet, been much in excess of last year, there has been a marked increase in inquiries. Fair prices prevail.

Building prospects are particularly good. Many owners of building lots, who are prevented from breaking ground by the late spring, are now holding back because of the high price -Mrs. Wigmore, Dundas street, city, bricks command. Bricks are scarce in the city, and are selling at a much higher figure than for some years. Some recent sales were at \$8 50 per thousand. In past spring seasons the average price has been from \$6 50 to \$7. One reason given for the scarcity is, that last year one local yard-which formerly turned out a million bricks each year-was idle, and another reason is the bonding of large quantities of brick for the big buildings in course of erection about the city. It is expected that the standard June prices-\$5 50 to \$6will be restored when the new bricks come in.

Among the large buildings which will soon be under way are the St. James' Presbyterian Church, the addition to St. Andrew's Presbyterian Church, several schools, and a five-story addition to D. S. Perrin & Co.'s factory. These will represent an outlay of \$65,000.

Work will be commenced on the Perrin Company's building tomorrow morning. The board of managers of St. Andrew's Church meet tonight to consider their plans, and there will be a meeting of the board of managers of St. James' Church tonight also, when final action will probably be taken upon the tenders for the construction of their new church. The expenditure of the \$20,000 granted the board of education by the council will likely be as originally intended in the draft for \$24,000, with the exception of the pro-

posed West London school. Mr. Herbert Matthews, who is architect for the St. James' Church and the Perrin building, also has under way the construction of a four-story addition to Wyatt & Son's store, Talbot street; a pretty cottage on Ridout street south for Mr. T. H. Smallman; a red brick dwelling at the corner of Waterloo and St. James streets for Ald. Malloch; a double house at the corner of William and Dundas streets for Mr. J. G. Shuff: the renovation of the W. E. Saunders & Co. building, Clarence street, and other works. The total value of these buildings, excluding the church, will be about \$20,000.

Among the property transfers within the past week or two, Mr. P. Walsh has effected the following: Cottage, 847 Grey street, from John Maker to John Ward, formerly of Pe-

trolia, now of the city. Brick cottage and half-acre on Hamilton road, from John Madge to Mr. Garden property, Westminster town ship, from John Collyer to Gilbert

from William Conway to James Gillies. NEW YORK, April 19.—Flour-Re- warrant for the appearance at court of Two-story brick house, 389 Dufferin done it will do again.

Oscar H. Talbot. Cottage, Grey street, from Francis F. Miller to Richard McNeil. Mr. A. A. Campbell has sold the property at the northeast corner of Richmond and Oxford streets to Dr. N. Bice, of Mount Brydges.

A cottage, 622 King street, and the McKenzie estate, 73 Carling street, have been purchased by Mr. Campbell. Mr. W. D. Buckle reports the sale of a double house, Nos. 233 and 235 Talbot street, to Alf. Johnston, and of a building lot, part of No. 23, south side of Bathurst street, to George Gray; also a number of inquiries regarding the Renwick estate, adjoining the new St. James' Church site.

A meeting of the London Bicycle Club was held last night, at which it was decided to affiliate with the C. W. A.

The city council in 1888 discussed many propositions about putting the river in good shape if the village of London West would not take legal action against the city for allowing the sewage to enter the river. Mayor Wilson has a copy of a proposed agreement, dated May 25, 1888, in which the dredging of the river to the cove bridge, removal of the abrupt points along the banks of the river to make the current more direct, and two stop log openings in the waterworks dam are among the improvements the city was willing to undertake.

DUNWICH PEAT

Analysis by a Chemist Reveals a Good Percentage of Fuel in a Bog.

St. Thomas, April 19.—The analysis of Prof. Thos. Heys, consulting chemist, of the samples of peat taken from

the Dunwich bog is as follows: Dried to atmospheric degree the moisture is 12 per cent; volatile mat-ter, 54.51 per cent; fixed carbon, 26.60 per cent; ash, 6.89 per cent. Prof. Heys pronounces the peat "very good," "above the average." It will be noticed that the fuel substances of the analysis show a total of 81.11 per cent, which will yield a very high grade fuel. The parent company's experts also pro-

nounce the samples good. The quality of the peat having been tested with such satisfactory results, the formation of the company only now depends upon the results of the of manufactured fuel, for which the Elgin syndicate will send a car or two of dried material to the Welland works as soon as the weather will permit.

AMUSEMENTS

FRANK DANILS IN "THE IDOL'S EYE.

Daniels and his opera company come

The following is from the Detroit Free Press of Tuesday, April 18: Frank Daniels first presented "The Idol's Eye" in Detroit on the night of Sept. 27, 1897. It ran for a week, and achieved one of cesses of the season. It was then two weeks old. Now it is again on view in the Detroit Opera House. It has passthe period of infancy, and is apparently come to full estate. In the meantime Mr. Daniels has strengthened, developed and rounded in a remarkable degree. The military number in act first affords Mr. Daniels just the material that was needed to give the right measure of variety to his impersonation of the much-troubled aeronaut Regarding the score in its entirety, it is found to represent a higher order of composition than is customary with composers who deal with grotesque subjects. The representation by Mr. Daniels and his well-disciplined company was received with unanimous favor by a discriminating audience-peo-New Discovery for Consumption.
